Fundamentals of Gas-Surface Interactions Howard Saltsburg, Joe N. Smith, Milton Rogers, 2013-10-22 Fundamentals of Gas Surface Interactions presents the study of the surface itself and the study of the gas phase partner of the interaction in which physical or chemical transformation of the gas resulted from that interaction This book discusses the study of the energy and momentum exchanges resulting from the gas solid physical interaction in which either gas or solid phase properties can be measured Organized into three parts encompassing 33 chapters this book begins with an overview of the different sensitive physical methods for the study of surface topography surface defects and surface irregularities to an accuracy of a few Angstroms This text then reviews the adsorption at very low coverage that has yielded to equilibrium analysis Other chapters consider the measurement of surface area by adsorption and optical techniques The final chapter deals with scattering processes including momentum and energy transfer This book is a valuable resource for engineers

Ion Surface Interaction, Sputtering and Related Phenomena Rainer Behrisch, 1973 **Frontiers in Surface**

Science and Interface Science C.B. Duke, E. Ward Plummer, 2002-05-21 Any notion that surface science is all about semiconductors and coatings is laid to rest by this encyclopedic publication Bioengineered interfaces in medicine interstellar dust DNA computation conducting polymers the surfaces of atomic nuclei all are brought up to date *Frontiers in Surface and Interface Science* a milestone publication deserving a wide readership It combines a sweeping expert survey of research today with an educated look into the future It is a future that embraces surface phenomena on scales from the subatomic to the galactic as well as traditional topics like semiconductor design catalysis and surface processing modeling and characterization And great efforts have been made to express sophisticated ideas in an attractive and accessible way Nanotechnology surfaces for DNA computation polymer based electronics soft surfaces interstellar surface chemistry all feature in this comprehensive collection

Dynamics of Gas-Surface Interactions Ricardo Diez Muino, Heriberto Fabio Busnengo, 2013-02-26 This book gives a representative survey of the state of the art of research on gas surface interactions It provides an overview of the current understanding of gas surface dynamics and in particular of the reactive and non reactive processes of atoms and small molecules at surfaces Leading scientists in the field both from the theoretical and the experimental sides write in this book about their most recent advances Surface science grew as an interdisciplinary research area over the last decades mostly because of new experimental technologies ultra high vacuum for instance as well as because of a novel paradigm the surface science approach The book describes the second transformation which is now taking place pushed by the availability of powerful quantum mechanical theoretical methods implemented numerically In the book experiment and theory progress hand in hand with an unprecedented degree of accuracy and control The book presents how modern surface science targets the atomic level understanding of physical and chemical processes at surfaces with particular emphasis on dynamical aspects This book is a reference in the field

Inelastic Energy Transfer In Interactions With Surfaces And Adsorbates B Gumhalter, Andrea Levi, F Flores, 1993-11-30 The aim of this volume is to underline common aspects of dynamical properties of surfaces and adsorbates which can sustain energy transfer and to assess the role and importance of specific energy and charge transfer mechanisms in constituting the properties of surface and adsorbate electronic vibronic photoabsorption and similar spectra the dynamics of adsorption desorption and trapping processes surface scattering phenomena involving electrons ions or neutral particles etc In this regard special attention has been paid to model descriptions and discussions of inelastic interactions screening and charge transfer processes encountered in XPS AES EELS NEXAFS and electron atomic molecular and ion beam scattering experiments
