Grudin, 2017-10-20 This book explores Andy Warhol's creative engagement with social class During the 1960s as neoliberalism perpetuated the idea that fixed classes were a mirage and status an individual achievement Warhol's work appropriated images techniques and technologies that have long been described as generically American or middle class Drawing on archival and theoretical research into Warhol's contemporary cultural milieu Grudin demonstrates that these features of Warhol's work were in fact closely associated with the American working class The emergent technologies Warhol conspicuously employed to make his work home projectors tape recorders film and still cameras were advertised directly to the working class as new opportunities for cultural participation What's more some of Warhol's most iconic subjects Campbell's soup Brillo pads Coca Cola were similarly targeted since working class Americans under threat from a variety of directions were thought to desire the security and confidence offered by national brands Having propelled himself from an impoverished childhood in Pittsburgh to the heights of Madison Avenue Warhol knew both sides of this equation the intense appeal that popular culture held for working class audiences and the ways in which the advertising industry hoped to harness this appeal in the face of growing middle class skepticism regarding manipulative marketing Warhol was fascinated by these promises of egalitarian individualism and mobility which could be profound and deceptive generative and paralyzing charged with strange forms of desire By tracing its intersections with various forms of popular culture including film music and television Grudin shows us how Warhol's work disseminated these promises while also providing a record of their intricate tensions and transformations Social Psychology Ralph Turner, 2017-09-29 A valuable compendium broad In scope rich In detail It should be a most useful reference for students and teachers This is how Alex Inkeles of Stanford University described this text It is made more so in this paperback edition aimed to reach a broad student population in sociology and psychology The new Introduction written by Rosenberg and Turner brings the story of social psychology up to date by a rich and detailed examination of trends and tendencies of the 1980s Although social psychology is a major area of specialization in sociology and psychology this text Is the first comprehensive and authoritative work that looks at the subject from a sociological perspective Edited by two of the foremost social psychologists in the United States this book presents a synthesis of the major theoretical and empirical contributions of social psychology They treat both traditional topics such as symbolic interaction social exchange theory small groups social roles and intergroup relations and newer approaches such as socialization processes over the life cycle sociology of the self talk and social control and the sociology of sentiments and emotions The result is an absolutely Indispensable text for students and teachers who need a complete and ready reference to this burgeoning field *Social*

Hearings, Reports and Prints of the Joint Economic Committee United States. Congress. Joint Economic Committee, 1973 [Rural Development And Migration](#) Sally E. Findley, Calvin Goldscheider, 2019-10-16 Perhaps because I grew up on a farm in Ohio I have long been interested in rural development Although I fl St became a migrant at the age of 17 when I left the farm to continue my studies in a city college I was not aware of the relation between rural development and migration until many years later when I began studying patterns of urban and rural poverty This research has grown out of my continuing investigation of the ways that migration has been seen as both a response to chronic conditions of rural poverty and a factor potentially exacerbating urban poverty conditions If governments wanted to deal with urban poverty they would want to restrict urban in migration yet if they reduced urban in migration this would remove one of

the important means available to persons seeking to raise themselves out of rural impoverishment This would clearly be a no win situation for the rural poor the only way to deal fairly with both urban and rural poverty would be to foster socio economic development of rural areas Thus I became interested in studying the patterns of rural development which actually have had an effect on the migration decisions of rural families
