The Vegetation of Antarctica through Geological Time David J. Cantrill, Imogen Poole, 2012-11-22 The fossil history of plant life in Antarctica is central to our understanding of the evolution of vegetation through geological time and also plays a key role in reconstructing past configurations of the continents and associated climatic conditions This book provides the only detailed overview of the development of Antarctic vegetation from the Devonian period to the present day presenting Earth scientists with valuable insights into the break up of the ancient supercontinent of Gondwana Details of specific floras and ecosystems are provided within the context of changing geological geographical and environmental conditions alongside comparisons with contemporaneous and modern ecosystems The authors demonstrate how palaeobotany contributes to our understanding of the paleoenvironmental changes in the southern hemisphere during this period of Earth history The book is a complete and up to date reference for researchers and students in Antarctic paleobotany and terrestrial paleoecology

Plants in Mesozoic Time Carole T. Gee, 2010-07-16 Plants in Mesozoic Time showcases the latest research of broad botanical and paleontological interest from the world s experts on Mesozoic plant life Each chapter covers a special aspect of a particular plant group ranging from horsetails to ginkgophytes from cycads to conifers and relates it to key innovations in structure phylogenetic relationships the Mesozoic flora or to animals such as plant eating dinosaurs The book s geographic scope ranges from Antarctica and Argentina to the western interior of North America with studies on the reconstruction of the Late Jurassic vegetation of the Morrison Formation and on fossil angiosperm lianas from Late Cretaceous deposits in Utah and New Mexico The volume also includes cutting edge studies on the evolutionary developmental biology evo devo of Mesozoic forests the phylogenetic analysis of the still enigmatic bennettitaleans and the genetic developmental controls of the oldest flowers in the fossil record

Antarctic Paleobiology Thomas N. Taylor, Edith L. Taylor, 2012-12-06 Antarctic Paleobiology discusses the current status of paleobiology principally paleobotany and palynology in Antarctica and the interrelationship of Antarctic floras to those of other Gondwana continents It provides a broad coverage of the major groups of plants on the one hand while on the other seeking to evaluate the vegetational history and the physical and biological parameters that influence the distribution of floras through time and space The biologic activity is discussed within a framework of the geologic history including the tectonic and paleogeographic history of the region Finally the reader will find a comprehensive bibliography of Gondwana paleobotany and palynology

Biology of the Sauropod Dinosaurs Nichole Klein, Kristian Remes, Carole T. Gee, P. Martin Sander, 2011-04-22 Sauropods those huge plant eating dinosaurs possessed bodies that seem to defy every natural law What were these creatures like as living animals and how could they reach such uniquely gigantic sizes A dedicated group of researchers in Germany in disciplines ranging from engineering and materials science to animal nutrition and paleontology went in search of the answers to these questions Biology of the Sauropod Dinosaurs reports on the latest results from this seemingly disparate group of research fields and integrates them into a coherent theory regarding sauropod gigantism Covering nutrition physiology growth and skeletal structure and body plans this volume presents the most up to date knowledge about the biology of these enormous dinosaurs
