Oakes, 2014-05-14 Profiles over 200 scientists from around the world who made important contributions to the interdisciplinary field of science technology and society STS including Thomas P Ackerman Helen Caldicott James Watt and more Collins Biographical Dictionary of Scientists Trevor Illtyd Williams, 1994 Provides biographical information on 1300 eminent scientists and technologists Includes an appendix chronological table of birth and death dates and a subject index The Biographical Dictionary of Scientists: Abbe to Leavitt Roy Porter, Marilyn Bailey Ogilvie, 2000 Third Edition Vol 1 Abbe to Leavitt **Scientists, Mathematicians and Inventors** Doris Simonis, 2019-11-04 Scientists Mathematicians and Inventors provides biographies of 200 men and women who changed the world by leaving lasting legacies in the fields of science mathematics and scientific invention It fills a gap in the biographical reference shelf by offering far more than basic facts about a scientist s life and work each entry describes not only the immediate effects of the individual s discoveries but also his or her impact on later scientific findings **History of Mathematics** Craig

Smorynski,2007-12-03 1 An Initial Assignment I haven't taught the history of mathematics that often but I do rather like the course The chief drawbacks to teaching it are that i it is a lot more work than teaching a regular mathematics course and ii in American colleges at least the students taking the course are not mathematics majors but education majors and and in the past I had found education majors to be somewhat weak and unmotivated The last time I taught the course however the majority of the students were graduate education students working toward their master's degrees I decided to challenge them right from the start 1 Assignment In An Outline of Set Theory James Henle wrote about mathematics Every now and then it must pause to organize and reflect on what it is and where it comes from This happened in the sixth century B C when Euclid thought he had derived most of the mathematical results known at the time from five postulates Do a little research to find as many errors as possible in the second sentence and write a short essay on them The responses far exceeded my expectations To be sure some of the undergraduates found the assignment unclear I did not say how many errors they were supposed to find But many of the students put their hearts and souls 1 My apology to Prof Henle

at whose expense I previously had a little fun on this matter I used it again not because of any animosity I hold for him but because I was familiar with it and dealing with Euclid it seemed appropriate for the start of my course *Literature for Science and Mathematics* DIANE Publishing Company,1998

Representing the perspectives of educators in both the science and mathematics communities this publication is intended to serve as a resource for teachers of students in kindergarten through grade 12 in choosing science and mathematics related literature for their schools and classrooms It contains over 1 000 annotated entries on the physical sciences earth sciences life sciences and mathematics Formatted for easy use each entry provides information on the author publisher and publication date type of literature subject emphasis suggested grade span and illustrations Academic Genealogy of Mathematicians Sooyoung Chang,2011 Burn for Burn **The Biographical**

Dictionary of Scientists David Abbott,1984 Discusses the lives work and achievements of the people who have made outstanding contributions to physics *Encyclopedia of World Scientists* Elizabeth H. Oakes,2007 Contains short biographies of almost 1 000 scientists from around the world who made great contributions to science throughout history

The Biographical Dictionary of Scientists ,1983 **Guide to Information Sources in Mathematics and Statistics** Martha A. Tucker,Nancy D. Anderson,2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics

and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free Women's History as Scientists Leigh Ann Whaley,2003-08-13 A comprehensive historical review of the debates surrounding women s contributions and roles in science with emphasis on women s access to education training and professional careers This remarkable work illuminates the debates surrounding women s involvement with science throughout history covering a broad range of disciplines Unlike a biographical compendium of great scientists it examines the question posed throughout history Are women capable of doing science Whether people have the right to even ask the question is germane to the debate itself The coverage discusses Hypatia the first female scientist about whom we have information examines the contradictory behavior of the church in the treatment of women during the medieval era and covers the 17th century debates over women s education It examines women physicians discusses feminism and science and delves into why there are so few women in science even today The debate that began during the time of Plato and Aristotle continues to this day
