**for Social Sciences and Arts** Mahouton Norbert Hounkonnou,Dragana Martinovic,Melanija Mitrović,Philippa Pattison,2024  
 This book addresses interconnections between contemporary advances in mathematics especially algebra with applications in  
 the social sciences and the arts It promotes the idea that knowledge cannot remain in disciplinary silos rather it belongs to  
 all people and is dedicated to associative relationships in a variety of mathematics applications from sociology to linguistics  
 including anthropology semiotics education and cognitive science Contributions illuminate some of the ways in which algebra

is developed learned understood communicated and applied in the social sciences and the humanities The content in this book has its origins in a conference Mathematics for Social Sciences and Arts Algebraic Modelling virtually hosted by the Faculty of Mechanical Engineering University of Ni Serbia from the 24th to the 26th of May 2021 This conference brought together scholars from various disciplines and geographic regions and focused on the juxtaposition of algebra and social science applications The conference organizers higher education institutes from four different continents invited leading scientists in social sciences and algebra to contribute to this volume The first part of this book addresses algebraic and mathematical thinking specifically learning and practicing mathematics from a cognitive science perspective as well as illustrative applications to distinctly human concerns like education and semiotics The second part focuses on algebraic semigroups and some of their generalizations This book and the conference that engendered it provide an example of a fruitful collaboration in which the skills and deep knowledge of algebraic structures modeling social sciences and arts brought in by the authors from different countries and continents merge in harmonious ways These expositions are a rich resource and are of interest both to mathematicians and non mathematicians
