BACKGROUND OF THE BOOK

The book was inspired by the obvious need to address issues in mathematics teacher education. In particular, the following mission statement for the newly established Journal of Mathematics Teacher Education (JMTE) reflects the mission of this book as well: The Journal of Mathematics Teacher Education is devoted to topics and issues involving the education of teachers of mathematics at all stages of their professional development. JMTE will serve as a forum for research on teachers learning for considering institutional, societal, and cultural influences that impact the education of mathematics teachers and for creating models for teachers of mathematics.

Editorial JMTE 1.1 p. *Handbook of Research on Mathematics Teaching and Learning* Douglas Grouws, 2006-11-01. Sponsored by the National Council of Teachers of Mathematics and written by leading experts in the field of mathematics education, the Handbook is specifically designed to make important, vital scholarship accessible to mathematics education professors, graduate students, educational researchers, staff development directors, curriculum supervisors, and teachers. The Handbook provides a framework for understanding the evolution of the mathematics education research field against the backdrop of well-established conceptual, historical, theoretical, and methodological perspectives. It is an indispensable working tool for everyone interested in pursuing research in mathematics education, as the references for each of the Handbook's twenty-nine chapters are complete resources for both current and past work in that particular area.
