Contemporary Perspectives on Mathematics in Early Childhood Education Olivia Saracho,Bernard Spodek,2008-02-01 This volume provides a comprehensive critical analysis of the research in mathematics education for

young children The researchers who conducted the critical analysis focused on the relationship between 1 mathematics learning in the early years and domain specific approaches to cognitive development 2 the children s social learning and their developing understanding of math and 3 the children s learning in a natural context and their understanding of mathematics concepts The work of these scholars can help guide those researchers who are interested in pursuing studies in early childhood mathematics in a specific area of study This volume will facilitate the research conducted by both novice and expert researchers The volume has accomplished its major goals which consists of critically analyzing important research in a specific area that would be most useful in advancing the field and provide recommendations for both researchers and educators

Mathematics Learning in Early Childhood National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Early Childhood Mathematics, 2009-12-13 Early childhood mathematics is vitally important for young children s present and future educational success Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics Furthermore young children enjoy their early informal experiences with mathematics Unfortunately many children s potential in mathematics is not fully realized especially those children who are economically disadvantaged This is due in part to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities Improvements in early childhood mathematics education can provide young children with the foundation for school success Relying on a comprehensive review of the research *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children s early mathematics education explores the extent to which they are currently being incorporated in early childhood settings and identifies the changes needed to improve the quality of mathematics experiences for young children This book serves as a call to action to improve the state of early childhood mathematics It will be especially useful for policy makers and practitioners those who work directly with children and their families in shaping the policies that affect the education of young children

Children Are Born Mathematicians Eugene Geist,2015-10-08 Developed to address the new NCTM focal points which use a chronological approach to thinking about what should be taught in early childhood mathematics The book views mathematics as a developmental and constructive process in which the teacher acts as an instructor and facilitator The book takes a 3 E approach to thinking about how math is presented to each age group For infants and toddlers best introduced and presented through interaction with the environment so designing a mathematically active and interactive classroom should be the focus For Preschool and Kindergarten children mathematics is best learned through experiences with materials or projects in the classroom For grade school children more traditional educational experiences become more developmentally appropriate in combination with environment and experience The approach is to see math as a developmental process that children engage in as they grow and develop The teacher's role is to promote

concept understanding and development through active experiences and questioning techniques in combination with teaching skills in developmentally appropriate ways

Mathematics in the Early Years David Clemson, 2006-11-22 The Clemsons clear and readable book takes the reader from debates about how children learn and what children know and can do when they start school through to a discussion of how mathematics can be managed assessed and evaluated in the school and classroom Linking these two parts of the book is a section on the subject of mathematics itself from which the non specialist reader can gain a view of what mathematics is what needs to be thought about in planning and offering a curriculum and the special dilemmas faced in teaching and learning mathematics as a subject A bank of case studies offers an opportunity to see mathematics in action in a variety of classrooms

Forging Connections in Early Mathematics Teaching and Learning Virginia Kinnear, Mun Yee Lai, Tracey Muir, 2017-12-12 This edited book promotes thinking dialogue research and theorisation on multiple ways of making connections in mathematics teaching and learning in early childhood education The book addresses some key challenges in research policy and practice in early childhood mathematics education It examines diverse ways for learning experiences to connect young children to mathematics and the importance of forging connections between mathematics and young children s lives as key elements in their engagement with mathematics Each chapter provides research or theoretical provocations and pedagogical implications for connecting children s lived experiences and ways of learning in mathematics teaching The chapters are drawn from a range of international authors who raise important ideas within the overall context of current research and consider the theoretical and practical implications of their research As such the book advances current thinking on mathematics teaching and learning for children in the early years from birth to eight years with an emphasis on children aged birth to 5 years It considers the purpose and value in connecting mathematics teaching and learning to children s lives and provides provocations for both educators and researchers on the many under researched and under represented aspects of early years mathematics teaching and learning

Children's Mathematics Elizabeth Carruthers, Maulfry Worthington, 2006-08-30 In Case Study 5 a grassroots Children s Mathematics Network group the initiative supported the participants in their professional change by giving them a space for the detailed and joint consideration of children s mathematical thinking Another significant feature of this initiative is its focus on careful consideration and analysis of children s mathematics and the ways in which professionals can support and encourage the children s mathematical thinking and reasoning The standard of the mathematical understanding thinking and reasoning that the displays revealed was far higher than the specified curriculum objectives for children of this age

Researching Effective CPD in Mathematics Education RECME project NCETM 2009 The review also plays great score by play based learning of a mathematical nature and makes specific recommendations regarding early mark making as a precursor to abstract mathematical symbolism Section 115 features children s mathematical graphics and emphasises The role of mark making in children s cognitive development is set out in the taxonomy Carruthers and Worthington 2006 The report

recommends that local authorities leaders managers and head teachers should provide a culture with a significant focus on mathematical mark making and a learning environment that encourages children to choose to use their own mathematical graphics to support their mathematical thinking and processes The Williams Maths Review DCSF 2008 At the very heart of the success of the book is the authors ability to see mathematics through young children s eyes by listening to and reflecting on the constant efforts made by children to make sense of their world This is a liberating book which proposes that the teaching of mathematics could and should be a highly creative and enjoyable process Branwen Llewelyn Jones Early Years Consultant at PACE Ltd TACTYC Ground breaking To single out any one chapter would be unfair because there is something thought provoking and inspirational throughout If you want to expand your understanding upwards and outwards then get a copy soon Times Educational Supplement I first read Children s Mathematics Making Marks Making Meaning a couple of years ago and it had an immediate impact on my own thinking and teaching and the work I do with trainee teachers I m sure you will find it compelling reading too I think it has the potential to change in a fundamental way how we think about early mathematical development Lynne McClure Editor Math Coordinator s File Mathematics Association In their exceptionally readable and informative book Children s Mathematics Making Marks Making Meaning Carruthers and Worthington 2006 draw attention to one of the main goals of early years teaching that is to help children make links between the mathematics they have already encountered and continue to engage with at home and the more abstract mathematics of the school These authors suggest that by encouraging children to represent mathematical ideas in their own ways and crucially by talking to the pupils about the marks they have made we are given a window onto their thinking that may otherwise be inaccessible Liz Pumphrey NRICH This book draws on the authors many years of teaching children aged three to eight years and also on their extensive research with children in the home nursery and school The authors explain the development and range of young children s mathematical marks and visual representations showing how children make mental connections between their own early marks and subsequent abstract mathematical symbolism and go on to develop their own written methods Combining theory and practice this acclaimed book demonstrates how children s own mathematical graphics are highly creative and show deep levels of thinking The authors show how this is the key to success in school mathematics and to higher levels of achievement The authors are winners of TACTYC s 2003 Jenefer Joseph Award for the Creative Arts 3-8 awarded for their innovative work with children on mathematical graphics Mathematics Through Play in the Early Years Kate Tucker,2014-01-14 The book is grounded in the latest research about how children become effective learners particularly in relation to mathematics Bringing together research and practice in an accessible way Kate Tucker provides an essential resource for all those who work with young children I strongly recommend it Dr Sue Rogers Head of Department of Early years and Primary Education Institute of Education Offering practical examples of focused playful teaching this popular book is back for a third edition with even more activities to use in your setting with children aged from 3 to 8 Completely updated

to include the revised Early Years Foundation Stage this new edition covers all the hot topics in the field and now includes a new section on teaching mathematics in Forest School more coverage of using ICT to teach mathematics more coverage of children with Special Educational Needs SEN a key vocabulary section at the end of each chapter and a detailed glossary expanded and updated suggestions for Further Reading even more activities to use in lessons with some extended to include 7 8 year olds With a user friendly layout this new edition is an ideal resource for practitioners wishing to enhance their mathematics teaching and for students wishing to develop their knowledge and understanding of how to use play to teach mathematics Kate Tucker is an early years teacher trainer and writer based in Devon

Looking at Early Years Education and Care Rose Drury, Robin Campbell, Linda Miller, 2013-07-04 First published in 2000 This book will serve as a reader for students on early childhood courses and reflective practitioners working with or for young children in a range of early years settings It provides an introduction to current research and thinking in early years curriculum health issues special educational needs bilingualism the role of adults working with young children and the role of parents in young children s development and learning It takes account of the new curriculum framework and Foundation Stage for early years recognising the demands of the National Literacy and Numeracy Strategies The contributors wide range of backgrounds in early years health and education ensures that the text will meet the needs of students on HNC D and BA degree courses in Early Childhood Studies and those taking BEd courses for Primary Early Years teachers

Mathematics Education in the Early Years Martin Carlsen, Ingvald Erfjord, Per Sigurd Hundeland, 2020-03-13 This book gives insights in the vivid research area of early mathematics learning The collection of selected chapters mirrors the research topics presented at the fourth POEM conference in May 2018 Thematically the volume reflects the importance of this evolving area of research which has begun to attract attention in the spheres of education and public policy due to increased interest in early years learning The research foci of the chapters comprise children s mathematical reasoning early years mathematics teaching and the role of parents for children s mathematical development The 2018 conference included a wider range of researchers than previous years

Mathematics Education in the Early Years Tamsin Meaney, Ola Helenius, Maria L. Johansson, Troels Lange, Anna Wernberg, 2016-01-22 This book presents chapters based on papers presented at the second POEM conference on early mathematics learning These chapters broaden the discussion about mathematics education in early childhood by exploring the debate about construction versus instruction Specific sections investigate the teaching and learning of mathematical processes and mathematical content early childhood teacher development transitions for young children between home and preschool between home and school and between preschool and school The chapters use a range of innovative theoretical and methodological approaches which will form an interesting basis for future research in this area
