**Resources in Education** ,2001-10      **Attitude Structure and Function** Anthony R. Pratkanis,Steven J.

Breckler,Anthony G. Greenwald,2014-03-18 Utilizing new wave research including new psychological theories new statistical techniques and a stronger methodology this collection unites a diversity of recent research perspectives on attitudes and the psychological functions of an attitude The objective of the editors was to bring together the bits and pieces of validated data into one systematic and adequate set of general principles leading to the view of attitudes as predictions As the volume reformulates old concepts explores new angles and seeks a relationship among various sub areas it also shows improvements in the sophistication of research designs and methodologies the specifications of variables and the precision in defining concepts      **Subject Guide to Books in Print** ,1993      *Educational Resources for Microcomputers* ,1986      **Verbal**

**Protocols of Reading** Michael Pressley,Peter Afflerbach,2012-12-06 Researchers from a variety of disciplines have collected verbal protocols of reading as a window on conscious reading processes Because such work has occurred in different disciplines many who have conducted verbal protocol analyses have been unaware of the research of others This volume brings together the existing literature from the various fields in which verbal protocols of reading have been generated In so doing the authors provide an organized catalog of all conscious verbal processes reported in studies to date the most complete analysis of conscious reading now available in the literature When the results of all of the studies are considered there is clear support for a number of models of reading comprehension including reader response theories schema perspectives executive processing models and bottom up approaches such as the one proposed by van Dijk and Kintsch The summary of results also demonstrates that none of the existing models goes far enough Thus a new framework constructively responsive reading is described This new model encompasses reader response schematic and executive processing and induction from word and phrase level comprehension to higher order meaning The important concept in this new model is that readers respond to bits and pieces of text as they are encountered all as part of the overarching goal of constructing meaning from text This volume also includes a critical review of the thinking aloud methodology as it has been used thus far This examination suggests that it continues to be an immature methodology and that much work is needed if a complete theory of conscious processing during reading is to be developed via verbal protocol analysis Finally after reviewing what has been accomplished to date the authors provide extensive discussion of the work that remains to be done and the adequacy of the verbal protocol methodology for permitting telling conclusions about text processing      National Assessment of Educational Progress 1969-1983 Theodore B. Pratt,1984 During its first 14 years of existence the National Assessment of Educational Progress NAEP was located at the Education Commission of the States ECS This annotated bibliography of 575 references lists all major publications by or about NAEP published between 1969 and 1983 References are in a classified arrangement by specific or special assessment Documents not dealing with a specific assessment are grouped by

Dickson, Barry B. Hughes, Mohammed T. Irfan, 2015-12-22 Education is one of the most fundamental prerequisites to economic growth and social stability in the world. It is also one of the most inadequately realised goals of development with the average education of global adults remaining essentially at primary levels. Advancing Global Education is the second in a series of volumes that explores prospects for human development: how development appears to be unfolding globally and locally; how we would like it to evolve; and how better to assure that we move it in desired directions. The first volume addressed the reduction of global poverty. The third will turn to the enhancement of global health. Advancing Global Education presents the most extensive set of forecasts of global education participation and attainment levels to date, providing and exploring a massive multi-issue database and proposing a scenario for accelerating educational attainment throughout major world regions and 183 countries.
