Mathematics And The Unexpected:

Mathematics and the Unexpected Ivar Ekeland,1990 *The Broken Dice, and Other Mathematical Tales of Chance*
Ivar Ekeland,1996-06-15 Contemplating the randomness of nature Ekeland extends his consideration of the catastrophe theory of the universe begun in Mathematics and the Unexpected drawing upon rich literary sources and current topics in math and physics such as chaos theory information theory and particle physics Line drawings Council for African American Researchers in the Mathematical Sciences: Volume III Council for African American Researchers in the Mathematical Sciences,2001 This volume presents research and expository papers presented at the third and fifth meetings of the Council for African American Researchers in the Mathematical Sciences CAARMS The CAARMS is a group dedicated to organizing an annual conference that showcases the current research primarily but not exclusively of African Americans in the mathematical sciences including mathematics operations research statistics and computer science Held annually since 1995 significant numbers of researchers have presented their current work in hour long technical presentations and graduate students have presented their work in organized poster sessions The events create an ideal forum for mentoring and networking where attendees can meet researchers and graduate students interested in the same fields For volumes based on previous CAARMS proceedings see African Americans in Mathematics II Volume 252 in the AMS series Contemporary Mathematics and African Americans in Mathematics Volume 34 in the AMS series DIMACS *Driver Behaviour and Training* Lisa Dorn,2005 This second volume of Driver Behaviour and Training covers recent advances in the study of driving behaviour and driver training how driver characteristics goals and motivations contribute to unsafe driving behaviour and the development of driver training courses that consider all the skills essential for road safety Readership includes road safety researchers from a variety of different academic backgrounds senior practitioners in the field of driver training from regulatory authorities and professional driver training organizations such as the police service and private and public sector personnel who are concerned with improving road safety *Rhetoric and Public Memory in the Science of Disaster* Jeremy R. Grossman,2024-06-18 Rhetoric and Public Memory in the Science of Disaster grapples with the role of science in the public memory of natural disasters Taking a psychoanalytic and genealogical approach to the rhetoric of disaster science throughout the twentieth century this book explores how we remember natural disasters by analyzing how we try to prevent them Chapters track the development of predictive modeling methods alongside some of the worst and most consequential natural disasters in the history of the United States From miniaturized physical scale models to cartographic renderings within a burgeoning statistical science to ever more complex simulation scenarios disaster science has long created imaginary versions of horrific events in the effort to prevent them Through an exploration of these hypothetical disasters this book theorizes how science itself becomes a site of public memory an increasingly important question in a world of changing weather *Success with Mathematics* Heather Cooke,2003 This study guide has been

designed to support students studying mathematics to prepare themselves for self directed study and provides guidance and ideas to help make their learning efficient and effective *Women and Mathematics* Susan F. Chipman,Lorelei R.

Brush,Donna M. Wilson,2014-01-14 First published in 1985 In the mid seventies there was growing concern that early decisions not to study mathematics in high school might be limiting the occupational options available to women As part of a larger program on career development the Career Awareness Division of the Education and Work Group then one of the major organizational units of the National Institute of Education NIE initiated a special research grants program on women and mathematics Research information that would sort out the competing explanations for women s lower rate of participation seemed a useful contribution to debates about possible remedial actions Should there be for example widespread development and implementation of programs designed to reduce mathematics anxiety This volume represents the culmination of a research program with many contributions **ADHD Comorbidities** Thomas E. Brown,2009 The only book that covers the multiple ways in which ADHD is complicated by other psychiatric and learning disorders in both children and adults ADHD Comorbidities Handbook for ADHD Complications in Children and Adults features comprehensive research based information on ADHD and its full range of coexisting syndromes Contributing researcher clinicians familiar with the complications that additional disorders pose summarize in accessible language what is currently known about ADHD and its comorbidities from preschool age to adulthood These authors describe how ADHD leads to different profiles at different stages of development and how to adjust treatment strategies for both ADHD and additional disorders to reduce the impairments resulting from their combination The book offers a new paradigm for understanding ADHD viewing it not as a simple behavior disorder but as a complex developmental impairment of executive functions in the brain This important handbook gives developmental context to ADHD by describing how symptoms at preschool onset differ from those of older age at onset Clinicians will find practical help for patients whose ADHD appears in conjunction with 11 other syndromes from mood disorders to developmental coordination disorder and acquire valuable guidance on adapting and adjusting medications and other interventions to optimize treatment effects for the wide diversity of complex cases that embody ADHD
