Overcoming Difficulties

with Number Ronit Bird, 2009-09-30 In writing this practical book Ronit Bird has drawn on her teaching and training experience to create teaching plans for key numeracy topics aimed at those working with students aged 9-16. She provides detailed strategies for teaching numeracy skills through a progression of practical activities and visualisation techniques which build the self-esteem of students who need extra help and give them a basic foundation in number. While the plans cover the National Numeracy Strategy they can also be used in any setting where maths is being taught. Topics covered include games and puzzles for learning number components, bridging multiplication, division, reasoning strategies. A bank of accompanying resources, games, activities and Su Doku puzzles is available on the companion website for the book. This is an ideal resource for both class teachers and maths subject teachers and is equally useful for teaching assistants and learning support assistants.

Psychological Assessment of Dyslexia Martin Turner, 2008-04-15 This book provides a refreshingly rational guide to the many issues involved in psychological assessment, taking dyslexia to be a remedial cognitive deficit. The author reviews the major tests in use for children and adults while keeping the scientific purpose for their use firmly in view. Written primarily for assessment professionals, the book will appeal to parents and specialist teachers and all those with an interest in fair and objective methods for dealing with dyslexia.

The Dyscalculia Assessment Jane Emerson, Patricia Babbie, 2014-12-08 The Dyscalculia Assessment is a tool for investigating pupils' numeracy abilities. It is designed to inform a personalised teaching programme for individuals or small groups of pupils who have difficulties with numbers. The assessment was devised at Emerson House, a specialist centre in London supporting pupils with difficulties in numeracy and literacy. The bestselling first edition of the book, written by Jane Emerson and Patricia Babbie, was the winner of the ERA Best Special Educational Needs Resource 2011. This fully revised and updated second edition features a brand new design making the step-by-step assessment even easier to navigate and use, whether by SENCOs or those with no specific special needs training. The suggested script for each stage of the investigation that runs alongside the photocopiable assessment sheets make this book an extremely user-friendly, accessible teaching and learning resource. This book also includes an introduction to dyscalculia and co-occurring conditions, guidance on how to conduct the assessment, including tips on behaviours to look out for, information on the equipment you need and how to use it, instructions on how to interpret the results of each stage of the assessment and how to produce a personalised teaching plan, games and activities to engage the pupils and reinforce numeracy skills. The Dyscalculia Assessment is ideal for use with primary school children but can easily be adapted for older students and is invaluable for SENCOs, TAs, educational psychologists and mainstream teachers keen to support students with numeracy difficulties in their class.

Approaching Difficulties in Literacy Development Felicity Fletcher-Campbell, Janet Soler, Gavin Reid, 2009-08-24 This Reader considers the complexity of literacy difficulties, showing how research into literacy difficulties has to be multi-faceted and multi-disciplinary and involve a range of research approaches and methods. The chapters show that this is necessary to accommodate the wide range of issues that can potentially explain literacy difficulties.

and suggest strategies and interventions to ease those difficulties Starting from the point that literacy is a contested concept and that acquiring literacy is a complex process this Reader goes on to consider literacy development in relation to Theoretical understandings implications for practice Assessing literacy difficulties Pedagogy and planning Interventions in different contexts This Reader is relevant to all postgraduate students of Literacy as well as educators professionals and policy makers

Maths Learning Difficulties, Dyslexia and Dyscalculia Steve Chinn, 2018-10-18 Written by a world authority on maths difficulties in children this accessible guide provides tried and tested visual strategies and tailored techniques to help teachers and parents support children with SpLDs who need help with maths Drawing on the latest research into areas such as cognition and meta cognition along with the authors decades of teaching experience the book offers insight into how maths learning difficulties including dyslexia dyscalculia and maths anxiety make maths difficult Each chapter looks at foundational areas of maths learning that children may struggle with from early number experiences to basic addition and subtraction times tables measurement and more Essential reading for any teacher learning assistant or parent supporting children with maths

More Trouble with Maths Steve Chinn, 2016-07-21 More Trouble with Maths acknowledges that there are many reasons why children and adults are unable to function mathematically Difficulties include problems with rote learning basic facts and procedures debilitating anxiety poor working and short term memories and mathematics vocabulary Central to this new edition is a range of standardised tests and diagnostic activities including a 15 minute test of basic mathematics a thinking style test tests of basic fact retrieval and maths anxiety Guiding the reader in the interpretation of tests this new edition shows how identifying the barriers to learning is the first step in a programme of intervention Written in an engaging and user friendly style Steve Chinn draws on his extensive experience and expertise to show how to consider and appraise the many factors relating to mathematical learning difficulties explain how these factors can be investigated explore their impact on learning mathematics Emphasising the need for a clinical approach when assessing individuals this book shows how diagnosis and assessment can become integrated into everyday teaching This highly practical and relevant resource is a crucial resource for anyone who wants to accurately and effectively identify the depth and nature of mathematical learning difficulties and dyscalculia

The Fear of Maths Steve Chinn, 2011-09-01 Maths is an essential skill but many people fear that they will never pick up the maths that they failed to understand in school Don't worry Most people know more maths than they realise Steve Chinn is your guide to understanding the basic facts of maths as you will use it in daily life There are many reasons why the inability to do maths affects so many children and follows them into adulthood and it has little to do with intelligence The major reason is anxiety the best way to overcome that anxiety is to build on existing knowledge Everyone has some maths skills and knowledge that can be extended to many more skills and knowledge The Fear of Maths How to Overcome It is for parents and teachers looking for a way to encourage and help their children It is based on teaching maths as a set of principles rather than a series of facts to be memorised to be understood

and how they can be used in various situations to make numbers seem less threatening and perhaps for the first time to begin to make sense Numbers are integral to everyday life from checking the cost of shopping and understanding a train timetable to calculating the best value mobile phone deal and Steve Chinn brings maths into everyday life Providing a solid foundation The Fear of Maths How to Overcome It will inspire the confidence that will make learning maths easier

Understanding Dyslexia: A Guide For Teachers And Parents Lawrence, Denis, 2009-03-01 Dyslexia affects at least ten per cent of children and is the most common special educational need that teachers encounter However the characteristics of dyslexia can mean that it is often **What Teachers Need to Know about Numeracy** Peter S.
