Number Theory in Mathematics Education Rina Zazkis, Stephen R. Campbell, 2012-10-12 This book offers multiple interconnected perspectives on the largely untapped potential of elementary number theory for mathematics education its formal and cognitive nature its relation to arithmetic and algebra its accessibility its utility and intrinsic merits to name just a few Its purpose is to promote explication and critical dialogue about these issues within the international mathematics education community The studies comprise a variety of pedagogical and research orientations by an international group of researchers that collectively make a compelling case for the relevance and importance of number theory in mathematics education in both pre K 16 settings and mathematics teacher education Topics variously engaged include understanding particular concepts related to numerical structure and number theory elaborating on the historical and psychological relevance of number theory in concept development attaining a smooth transition and extension from pattern recognition to formative principles appreciating the aesthetics of number

structure exploring its suitability in terms of making connections leading to aha insights and reaching toward the learner's affective domain reexamining previously constructed knowledge from a novel angle investigating connections between technique and theory utilizing computers and calculators as pedagogical tools and generally illuminating the role number theory concepts could play in developing mathematical knowledge and reasoning in students and teachers Overall the chapters of this book highlight number theory related topics as a stepping stone from arithmetic toward generalization and algebraic formalism and as a means for providing intuitively grounded meanings of numbers variables functions and proofs Number Theory in Mathematics Education Perspectives and Prospects is of interest to researchers teacher educators and students in the field of mathematics education and is well suited as a text for upper level mathematics education courses
