Interventions for Students with Learning Disabilities H. Lee Swanson, 1999-04-23 The first comprehensive quantitative analysis of intervention research in the learning disabilities field this volume synthesizes the results of 272 scientifically credible group and single subject studies in an effort to identify what works best for learning disabled children The book examines pertinent findings on all academic cognitive and behavioral domains Intervention outcomes are evaluated across instructional domains sample characteristics intervention parameters methodological procedures and article characteristics Addressing such questions as the merits of inclusion settings and the relative benefits of direct and strategy instruction Swanson offers timely recommendations for instructional design assessment and policy El-Hi Textbooks & Serials in Print, 2005, 2005 International Handbook of Curriculum Research William F. Pinar, 2013-10-15 Continuing its calling to define the field and where it is going the Second Edition of this landmark handbook brings up to date its comprehensive reportage of scholarly developments and school curriculum initiatives worldwide providing a panoramic view of the state of curriculum studies globally Its international scope and currency and range of research and theory reflect and contribute significantly to the ongoing internationalization of curriculum studies and its growth as a field worldwide Changes in the Second Edition Five new or updated introductory chapters pose transnational challenges to key questions curriculum research addresses locally Countries absent in the First Edition are represented Chile Colombia Cypress Ethiopia Germany Iran Luxembourg Nigeria Peru Poland Portugal Singapore South Africa Spain and Switzerland 39 new or updated chapters on curriculum research in 34 countries highlight curriculum research that is not widely known in North America This handbook is an indispensable resource for prospective and practicing teachers for curriculum studies scholars and for education students around the world *Resources in Education*, 1991-07 *Mathematics Teacher Resource Handbook*, 1993 *Education for All* Robert E. Slavin, 1996-01-01 This work is a collection of previously published articles by Robert Slavin The articles trace the evolution over a quarter century of the powerful idea that given well developed rigorously evaluated methods and materials teachers can succeed with virtually all children **Science after the Practice Turn in the Philosophy, History, and Social Studies of Science** Léna Soler, Sjoerd Zwart, Michael Lynch, Vincent Israel-Jost, 2014-03-21 In the 1980s philosophical historical and social studies of science underwent a change which later evolved into a turn to practice Analysts of science were asked to pay attention to scientific practices in meticulous detail and along multiple dimensions including the material social and psychological Following this turn the interest in scientific practices continued to increase and had an indelible influence in the various fields of science studies No doubt the practice turn changed our conceptions and approaches of science but what did it really teach us What does it mean to study scientific practices What are the general lessons implications and new challenges This volume explores questions about the practice turn using both case studies and theoretical analysis The case studies examine empirical and mathematical sciences

including the engineering sciences The volume promotes interactions between acknowledged experts from different often thought of as conflicting orientations It presents contributions in conjunction with critical commentaries that put the theses and assumptions of the former in perspective Overall the book offers a unique and diverse range of perspectives on the meanings methods lessons and challenges associated with the practice turn *Technology in the Curriculum: Mathematics resource guide* ,1986

Themes from Weir: A Celebration of the Philosophy of Alan Weir Adam Rieger,Stephan Leuenberger,2024-05-30 This book celebrates and explores some philosophical issues raised by the work of Alan Weir who is Professor Emeritus at the University of Glasgow having previously held positions at the Universities of Oxford Edinburgh and Queen s Belfast In a number of areas Weir has elaborated strikingly original views which involve a radical departure from the mainstream These include formalism in the philosophy of mathematics and as well as na ve set theory with a universal set and a na ve theory of truth In contrast to other contemporary defenders of the latter two theories Weir rejects dialetheism and accepts classical rules for the logical connectives He avoids contradictions by restricting certain structural inference rules specifically some generalized versions of transitivity In addition Weir has developed radical versions of naturalism and physicalism partly informed by his work on Quine and perceptual realism This collection includes contributions by a distinguished group of philosophers on Weir s philosophy as well as a memoir and a new essay on the philosophy of mathematics by Weir himself
