The Matrix Larry Wachowski, 2001 Stranger Than Fiction Zach Helm, 2006-11-10 In this strange and delightful tale an IRS agent named Harold Crick suddenly finds himself the subject of a narration only he can hear narration that soon affects everything from his work to his love life to his death Starring Will Ferrell Maggie Gyllenhaal Dustin Hoffman Queen Latifah and Emma Thompson Stranger Than Fiction is a heartfelt film perhaps a comedy perhaps a tragedy about love and Bakhtin's Adventure Benjamin Paloff, 2025-05-15 A bold rereading of Mikhail Bakhtin's literature and death and taxes groundbreaking theories A century after Mikhail Bakhtin first began formulating his now canonical reflections on freedom and literary representation we often seem as confused as ever about the relationship between narrative form and what it means to live ethically Focusing on the throughline of adventure in Bakhtin's thought we find a peculiar yet no less ethically urgent challenge not to imagine the literary hero as if they were a real person but to recognize how we are always imagining real people as if they were literary characters This is a provocation with far reaching consequences for how we understand ourselves each other and our situatedness in space and time In Bakhtin's Adventure An Essay on Life without Meaning Benjamin Paloff argues that the major aesthetic ethical and sociological threads of Bakhtin's thought intersect in his concept of adventure Reading across a wide variety of media from classic literature to contemporary film Paloff demonstrates how for Bakhtin and his interlocutors the test of human freedom is whether narrative means nothing beyond its own adventure Reframed in this light Bakhtin's most influential ideas eventness chronotope heteroglossia polyphony carnival form a cohesive model for how to maintain ethical relations in a world where we can never really know each other the way we know ourselves The Freudian Robot Lydia H. Liu, 2011-05-23 The identity and role of writing has evolved in the age of digital media But how did writing itself make digital media possible in the first place Lydia H Liu offers here the first rigorous study of the political history of digital writing and its fateful entanglement with the Freudian unconscious Liu s innovative analysis brings the work of theorists and writers back into conversation with one another to document significant meetings of minds and disciplines She shows how the earlier avant garde literary experiments with alphabetical writing and the word association games of psychoanalysis contributed to the mathematical making of digital media Such intellectual convergence she argues completed the transformation of alphabetical writing into the postphonetic ideographic system of digital media which not only altered the threshold of sense and nonsense in communication processes but also compelled a new understanding of human machine interplay at the level of the unconscious Ranging across information theory cybernetics modernism literary theory neurotic machines and psychoanalysis The Freudian Robot rewrites the history of digital media and the literary theory of the twentieth century **Texts** Peter Childs, 2006-09-27 Being able to analyse different types of text is an essential skill for students of literature Texts is a new kind of book which shows students how to use literary theory to approach a wide range of literary cultural and media texts of the kind studied on today s courses These texts range from

Jones, 2025-08-13 This book is the first comprehensive overview of the history of female presenting AI and robots in US and UK live action science fiction films from 1949 to 2023 It offers an original taxonomy that aids in the examination of 80 films and over 135 characters representations starting with The Perfect Woman 1949 and ending with Robots 2023 Using its representational taxonomy this book analyses the evolution of these depictions showing the continuations revisions and shifts in the depiction of female presenting AI and robots from objectified eroticised subordinated things to being autonomous moral agents who assert their right to equality and refuse their abusive typically sexual use This book shows how these fictional gendered constructions are products of a heterosexual cisgender male fantasy of an idealised subordinated form of femininity These artificial characters along with their real world counterparts highlight a desire for a subordinated femininity but also show how that subordination is a social construction often reinforced and countered in onscreen depictions By examining the trends within its asserted Galatea Girlfriend Mother and Deadly Seductress types this book presents an exploration of what our female presenting artificial creations could be while addressing their contemporary and our current AI technologies and how science fiction is influencing real life while our reality seeks to mirror science fiction William Feminist Time Against Nation Time Victoria Hesford, Lisa Diedrich, 2009-12-01 Feminist Time Against Nation Gibson . Time offers a series of essays that explore the complex and oftentimes contradictory relationship between feminism and nationalism through a problematization of temporality Although there has been much recent discussion in the U S of the wars in Afghanistan and Iraq and the War on Terror as signaling a new period of permanent war feminist voices have not been at all prominent in this discussion This collection considers not only the ways in which public spaces for dissent are limited but also the ways in which the time for such dissent is cut short Feminist Time Against Nation Time combines philosophical examinations of Women's Time by Julia Kristeva and The Time of Thought by Elizabeth Grosz with essays offering case studies of particular events including Kelly Oliver's essay on the media coverage of the U S wars on terror and in Afghanistan and Iraq and Betty Joseph's on the anti-colonial uses of women's time in the creation of nineteenth century Indian

nationalism Feminist Time Against Nation Time juxtaposes feminist time against nation time in order to consider temporalities that are at once contrary to but also drawing toward each other Yet Hesford and Diedrich also argue that because as an untimely project feminism necessarily operates in a different temporality from that of the nation againstness is also used to provoke a rupture a momentary opening up of a disjuncture between the two that will allow us to explore the possibilities of creating a space and time for feminists to think against the current of the present moment

Transhumanism David Livingstone, 2015-09-02 Transhumanism is a recent movement that extols man s right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential While the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey Blade Runner the Terminator series and more recently The Matrix Limitless Her and Transcendence However as its adherents hint at in their own publications transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah which asserts that humanity is evolving intellectually towards a point in time when man will become God Modeled on the medieval legend of the Golem and Frankenstein they believe man will be able to create life itself in the form of living machines or artificial intelligence Spearheaded by the Cybernetics Group the project resulted in both the development of the modern computer and MK Ultra the CIA's mind control program MK Ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge And as revealed in the movie Lucy through the use of smart drugs and what transhumanists call mind uploading man will be able to merge with the Internet which is envisioned as the end point of Kabbalistic evolution the formation of a collective consciousness or Global Brain That awaited moment is what Ray Kurzweil a director of engineering at Google refers to as The Singularly By accumulating the total of human knowledge and providing access to every aspect of human activity the Internet will supposedly achieve omniscience becoming the God of occultism or the Masonic All Seeing Eye of the reverse side of the American dollar bill
