Subject Guide to Books in Print ,2001 The Monster in the Machine Zakiya Hanafi,2000-10-25 A study of monstrosity and baroque poetics in the cultural context of 17 century Italy **Time Machines** Paul J. Nahin,2001-04-20 This book explores the idea of time travel from the first account in English literature to the latest theories of physicists such as Kip Thorne and Igor Novikov This very readable work covers a variety of topics including the history of time travel in fiction the fundamental scientific concepts of time spacetime and the fourth dimension the speculations of Einstein Richard Feynman Kurt Goedel and others time travel paradoxes and much more *El-Hi Textbooks & Serials in Print* ,2000 ,2000 **The Wonders of Life** Ernst Haeckel,1904 The publication of the present work on The Wonders of Life has been occasioned by the success of The Riddle of the Universe which was written five years prior to this volume Within a few months of the issue of this study of the monistic philosophy in the autumn of 1899 ten thousand copies were sold The clear opposition of the author s monistic philosophy based as it was on the most advanced and sound scientific knowledge to the conventional ideas and to an outworn revelation led to the publication of a vast number of criticisms and attacks The present work on the wonders of life is as the title indicates a supplementary volume to The Riddle of the Universe While the latter undertook to make a comprehensive survey of the general questions of science as cosmological problems in the light of the monistic philosophy the present volume is confined to the realm of organic science or the science of life It seeks to deal connectedly with the general problems of biology in strict accord with the monistic and mechanical principles which had been laid down by the author in 1866 in his work titled General Morphology In the latter publication special stress was placed on the universality of the law of substance and the substantial unity of nature which had been further treated in the second and fourteenth chapters of The Riddle of the Universe The arrangement of the vast material for this study of the wonders of life was modeled on that of the Riddle Retained in the present volume is the division into larger and smaller sections and the synopses of the various chapters Thus the whole biological content falls into four sections and twenty chapters Preface PsycINFO Database Record c 2010 APA all rights reserved *English Mechanic and Mirror of Science* ,1912 *English Mechanic and Mirror of Science and Art* ,1882 **Science Fiction Film Directors, 1895-1998** Dennis Fischer,2011-07-01 This enormous and exhaustive reference book has entries on every major and minor director of science fiction films from the inception of cinema circa 1895 through 1998 For each director there is a complete filmography including television work a career summary a critical assessment and behind the scenes production information Seventy nine directors are covered in especially lengthy entries and a short history of the science fiction film genre is also included **English Mechanic and World of Science** ,1873 **Queer Universes** Wendy Gay Pearson,Veronica Hollinger,Joan Gordon,2008-03-01 Contestations over the meaning and practice of sexuality have become increasingly central to cultural self definition and

critical debates over issues of identity citizenship and the definition of humanity itself In an era when a religious authority can declare lesbians antihuman while some nations legalise same sex marriage and are becoming increasingly tolerant of a variety of non normative sexualities it is hardly surprising that science fiction in turn takes up the task of imagining a diverse range of queer and not so queer futures The essays in *Queer Universes* investigate both contemporary and historical practices of representing sexualities and genders in science fiction literature *Queer Universes* opens with Wendy Pearson's award winning essay on reading sf queerly and goes on to include discussions about sextrapolation in New Wave science fiction stray penetration in William Gibson's cyberpunk fiction the queering of nature in ecofeminist science fiction and the radical challenges posed to conventional science fiction in the work of important writers such as Samuel R Delany Ursula K Le Guin and Joanna Russ In addition *Queer Universes* offers an interview with Nalo Hopkinson and a conversation about queer lives and queer fictions by authors Nicola Griffith and Kelley Eskridge
