Natural History Museum Calendar 2006:

Commemorative Events Warwick Frost, Jennifer Laing, 2013 Commemorative Events emphasise remembering They are held on the anniversaries of significant past events either annually or after significant time periods Commemorative events provide fascinating insight into how societies see themselves their heritage and their identity These events however carry high propensity for controversy as memory and identity are highly subjective and other stakeholders hold different views of what should be commemorated and why This is the first book to provide an in depth critical examination of commemorative events particularly what they mean to societies and how they are used by governments as well as impacts on other stakeholders The book fully explores these issues by reviewing all the major types of commemorative events including nationhood or independence wars battles famous people and cultural milestones from varying geographical regions and stakeholder perspectives By doing so the book furthers understanding of these types of events in society as well as furthering knowledge of social and political uses and impacts of events This thought provoking volume will be valuable reading for students researchers and academics interested in events

Royal Events Jennifer Laing, Warwick Frost, 2017-12-12 Royal events such as coronations and jubilees encompass a wide spectrum of planned events involving monarchs and their families that are strategically designed to reinforce the role of royalty within social and political structures Royal events may have a long heritage but often involve traditions that are invented revived or undergoing major innovations in response to changing times or to meet different purposes The change from absolutism towards constitutional monarchies has seen a shift towards using royal events to promote national identity community and inclusiveness While the function and meaning of royal ritual and ceremony is a product of its particular political economic and cultural context conversely royal events are often an influence on the broader milieu This book is the first to explore royal events within the context of Events Studies and takes an historical approach examining the development of royal events through different periods It starts with four broad pre modern eras namely Classical Byzantine the Dark Ages and the Medieval Period then moves through to the early modern dynasties such as the Tudors Stuarts Georgians and Bourbons and on to contemporary times incorporating the Victorian and Edwardian eras and the current reign of Elizabeth II including the legacy of Diana and an analysis of current issues affecting royal events Themes emphasised throughout include the institutional dynamism of royalty the invention of tradition the ritual structure of events the impact of the media and the influence of individual tastemakers This multidisciplinary work will appeal to postgraduate students and academics from a wide variety of disciplines including cultural studies history tourism events and sociology

Ice Ages, Climate Dynamics and Biotic Events: The Late Pennsylvanian World S.G. Lucas, W.A. DiMichele, S. Opluštil, X. Wang, 2023-06-19 The Late Pennsylvanian was a time of ice ages and associated climate dynamics A major reduction in Gondwana ice volume was followed by a prolonged period of relative global warmth culminating in the last great ice age of the late Paleozoic It also was a major turning point in the evolution of life on land when the coal forests of the Middle Pennsylvanian gave way to new kinds of Late Pennsylvanian wetland vegetation and new kinds of animals appeared Changes in the terrestrial biota began during the Middle Pennsylvanian accelerating and proceeding in a spatially complex manner throughout the Late Pennsylvanian The Late Pennsylvanian is thus a laboratory for studying environmental changes in a glacial world and for assessing coeval biotic changes in part to establish the possible links between the two No book has been dedicated to this time interval so this volume fills a gap in our understanding of a dynamic Late Pennsylvanian world that is much like the late Cenozoic world

The Archaeology of Events Zackary I. Gilmore, Jason M. O'Donoghue, 2015-03-31 These perspectives are applied to a broad range of archeological contexts stretching across the Southeast and spanning more than 7 000 years of the region s pre Columbian history New data suggest that several of this region s most pivotal historical developments such as the founding of Cahokia the transformation of Moundville from urban center to vacated necropolis and the construction of Poverty Point s Mound A were not protracted incremental processes but rather watershed moments that significantly altered the long term trajectories of indigenous Southeastern societies In addition to exceptional occurrences that impacted entire communities or peoples Southeastern archaeologists are increasingly recognizing the historical importance of localized everyday events such as building a house crafting a pot or depositing shell

Curating the Future

Jennifer Newell, Libby Robin, Kirsten Wehner, 2016-08-12 *Curating the Future: Museums, Communities, and Climate Change* explores the way museums tackle the broad global issue of climate change. It explores the power of real objects and collections to stir hearts and minds to engage communities affected by change. Museums work through exhibitions, events, and specific collection projects to reach different communities in different ways. The book emphasises the moral responsibilities of museums to address climate change not just by communicating science but also by enabling people already affected by changes to find their own ways of living with global warming. There are museums of natural history, of art, and of social history. The focus of this book is the museum communities like those in the Pacific who have to find new ways to express their culture in a new place. The book considers how collections in museums might help future generations stay in touch with their culture even where they have left their place. It asks what should the people of the present be collecting for museums in a climate-changed future. The book is rich with practical museum experience and detailed projects as well as critical and philosophical analyses about where a museum can intervene to speak to this great conundrum of our times. *Curating the Future* is essential reading for all those working in museums and grappling with how to talk about climate change. It also has academic applications in courses of museology and museum studies, cultural studies, heritage studies, digital humanities, design, anthropology, and environmental humanities.

The Carboniferous Timescale S.G. Lucas, J-W. Schneider, X. Wang, S. Nikolaeva, 2022-04-26 The print edition is published as 2 hardback volumes, parts A and B, and sold as a set. The Carboniferous was the time of the assembly of Pangaea by the collision of the Gondwanan and Laurussian supercontinents and the principal interval of the late Paleozoic ice ages. These tectonic and climatic events caused dramatic sea level fluctuations and climate changes and produced a Carboniferous world that was diverse topographically and climatologically, perhaps only rivalled in that diversity by the late Cenozoic world. Furthermore, the Carboniferous was a time of the accumulation of vast coal deposits of great economic and societal significance. The temporal ordering of geological and biotic events during Carboniferous time thus is critical to the interpretation of some unique and pivotal events in Earth history. This temporal ordering is based on the Carboniferous timescale, which has been developed and refined for nearly two centuries. This book reviews the history of the development of the Carboniferous chronostratigraphic scale and includes comprehensive analyses of Carboniferous radioisotopic ages, magnetostratigraphy, isotope-based correlations, cyclostratigraphy, and timescale-relevant marine and non-marine biostratigraphy and biochronology.
