

What is a geologic map?

A geologic map shows the distribution of different types of rocks and the geological structures that have formed them. It is a key tool for understanding the Earth's history and for predicting the location of natural resources and hazards.

Why make a geologic map?

Geologic maps are used for a variety of purposes, including: understanding the Earth's history, predicting the location of natural resources, and assessing the potential for natural hazards.

Geologic maps are also used to help plan and manage the development of land and resources. They provide a visual representation of the geological information that is needed to make these decisions.

Geologic time and the map of rocks

The geologic time scale is a system of chronological measurement that relates geologic time to a numerical time scale. It is used to describe the timing and duration of geological events.

Geologic structures
Geologic structures are features that are formed by the deformation of rocks. They include faults, folds, and other structures that are created by the movement of tectonic plates.

Geologic time relationships

Geologic time relationships are the relationships between different geological periods and structures. They are used to determine the relative ages of different geological features and to understand the sequence of events that have shaped the Earth's crust.

Geologic map legend
The geologic map legend is a key that explains the symbols and colors used on the map. It is used to identify different geological features and to understand the map's content.

Geologic map legend

The geologic map legend is a key that explains the symbols and colors used on the map. It is used to identify different geological features and to understand the map's content.

Why are there so many faults in the San Francisco Bay region?

There are many faults in the San Francisco Bay region because of the tectonic forces that are acting on the area. The region is located at the edge of the North American Plate, which is being pushed southward by the Pacific Plate.
