Natural Resource Management In African Agriculture Understanding And Improving Current Practices:

Natural Resources Management in African Agriculture Christopher Brendan Barrett, Dr. Frank Place, Abdillahi A. Aboud, 2002 This book consists of selected edited and revised papers from a workshop held at ICRAF in July 2000 It synthesizes existing information on the adoption of natural resource management investments and strategies such as soil fertility improvements or erosion control for agriculture in Sub Saharan Africa It also critically examines current analytical methods and generates research and policy recommendations Contents include o Farmers objectives and learning processes o Willingness and capacity to make long term investments o Economic incentives and the importance of the resource base o The agroecological institutional and policy context o Towards improved NRM in African agriculture *Natural Resources Management in Agriculture* Bekele Shiferaw, H. Ade Freeman, Scott M. Swinton, 2005 In response to increasing concerns about the degradation of natural resources and the sustainability of agriculture many research programmes have been established in natural resource management NRM However although methods for evaluating the impacts of crop improvement technologies are well developed there is a dearth of methods for evaluating the impacts of NRM interventions This is partly due to the complexity of interactions among natural resources spatial and temporal dimensions of impact and the valuation of direct and indirect environmental costs and benefits This book discusses the unique features and methodological difficulties of NRM impact assessment It examines the strengths and weaknesses of various impact assessment approaches including econometric bio economic and more direct methods It also assesses and identifies data requirements for developing impact indicators and recommends suitable methodologies for assessing the impacts of NRM technologies on issues such as soil and water conservation and watershed and biodiversity management **International Research on Natural Resource Management** Hermann Waibel, David Zilberman, 2007-01-01 Over the past two decades significant investment has been made into agriculture related natural resource management research in developing countries This collection of case studies establishes a methodological foundation for impact assessments of NRMR through a discussion of research conducted by the CGIAR around the world **Successes in African Agriculture** Haggblade, Steven, Hazell, Peter B. R., 2010-01-01 Sub Saharan Africa is one of the poorest regions of the world Because most Africans work in agriculture escaping such dire poverty depends on increased agricultural productivity to raise rural incomes lower food prices and stimulate growth in other economic sectors Per capita agricultural production in sub Saharan Africa has fallen however for much of the past half century *Successes in African Agriculture* investigates how to reverse this decline Instead of cataloging failures as many past studies have done this book identifies episodes of successful agricultural growth in Africa and identifies processes practices and policies for accelerated growth in the future The individual studies follow developments in among other areas the farming of maize in East and Southern Africa cassava across the middle belt of Africa cotton in West Africa horticulture in Kenya and dairying in East Africa Drawing on these case studies and on consultations

with agricultural specialists and politicians from across sub Saharan Africa undertaken in collaboration with the African Union s New Partnership for Africa s Development the contributors identify two key determinants of positive agricultural performance agricultural research to provide more productive and sustainable technologies to farmers and a policy framework that fosters market incentives for increasing production The contributors discuss how the public and private sectors can best coordinate the convergence of both factors Given current concerns about global food security this book provides timely and important resources to policymakers and development specialists concerned with reversing the negative trends in food insecurity and poverty in Africa

New Topics in International Agricultural Trade and Development

Dragan Miljkovic,2006 Agricultural trade and development is a backbone of international trade It includes agricultural trade patterns commercial policy international institutions such as WTO Tariff and non tariff barriers in international trade exchange rates biotechnology and trade agricultural labour mobility land reform environment and the areas and issues spanning these areas This book brings together leading research and issues in this fundamental field

Vulnerable

Places, Vulnerable People Jonathan A. Cook,2010-01-01 the case studies and subsequent summarizing discussions provide interesting insights on the many interactions of trade poverty and the environment digestible also for those without an academic background in economics Quarterly Journal of International Agriculture While some argue that trade liberalization has raised incomes and led to environmental protection in developing countries others claim that it generates neither poverty reduction nor sustainability The detailed case studies in this book demonstrate that neither interpretation is universally correct given how much depends on specific policies and institutions that determine on the ground outcomes Drawing on research from six countries around the developing world the book also presents the unique perspectives of researchers at both the world s largest development organization The World Bank and the world s largest conservation organization World Wildlife Fund on the debate over trade liberalization and its effects on poverty and the environment The authors trace international trade rules and events down through national development contexts to investigate on the ground outcomes for real people and places The studies underscore the importance of evaluating trade from a perspective that pays attention to environmental and social vulnerability and understands the linkages between poverty reduction and environmental protection The lessons drawn provide a critical first step in developing the appropriate response options needed to ensure that trade plays a positive role in promoting truly sustainable development Academics and students in environmental economics development economics and agriculture as well as policymakers and those in development institutions will appreciate this groundbreaking work

Adapting to Climate Uncertainty in African Agriculture

Stephen

Whitfield, 2015-08-20 Future climatic and agro ecological changes in Africa are uncertain and associated with high degrees of spatial and temporal variability and this change is differently simulated within divergent climate crop models and in controlled crop breeding stations Furthermore uncertainty emerges in local contexts not just in response to climatic systems but to social economic and political systems and often with implications for the appropriateness and adoption of technologies or the success of alternative cropping systems This book examines the challenges of adaptation in smallholder farming in Africa analysing the social economic political and climatic uncertainties that impact on agriculture in the region and the range of solutions proposed Drawing on case studies of genetically modified crops conservation agriculture and other climate smart solutions in eastern and southern Africa the book identifies how uncertainties are framed from above as well experienced from below by farmers themselves It provides a compelling insight into why ideas about adaptation emerge from whom and with what implications This book offers a unique perspective and will be highly relevant to students of climate change adaptation food security and poverty alleviation as well as policy makers and field practitioners in international development and agronomy

Agriculture and Environment for Developing Countries Moyo, B.H.Z., 2014-05-08 This book is about indigenous ways of farming in Northern Malawi in the face of modernization and globalization pressures It also impacts modernization and globalization in relation to agriculture and environment in the developing countries laying bare their impacts on smallholder farmers agriculture in general industry and the environment
