Natural Resources Bureaucratic Myths And Environmental Management:

Natural Resources and the Environment Paul R. Portney, 1984 *Energy Abstracts for Policy Analysis*, 1985

Natural Resources Richard Stroup, John Baden, David T. Fractor, 1983 Natural Resource Policymaking in Developing Countries William Ascher, Robert G. Healy, 1990 Drawing on case studies developed over a two year period 1987-1989 by Fellows in the Program in International Development Policy at Duke University including experienced representatives from developing countries the World Bank and scholars the authors integrate the growing interest in environmental protection and resource conservation into the existing body of knowledge about the political economy of developing countries This book is about the links that tie resource use environmental quality and economic development and the way in which those links are affected by the distribution of income and resource ownership The links may be relatively simple as in the case of peasant farmers too poor to conserve resources for the future and with nothing to gain from sound environmental practices Or they may be very complex as the authors find when they demonstrate how achievement of higher incomes by the rich can increase environmentally destructive behavior by the poor Many of the links in some way involve rural land use whether for agriculture or forestry Natural Resource Policymaking in Developing Countries argues that the policies that matter are not merely those dealing with resources and the environment but a much broader set that includes income distribution and asset ownership

Sustainable Governance of Wildlife and Community-Based Natural Resource Management Brian Child, 2019-10-23 This book develops the Sustainable Governance Approach and the principles of Community Based Natural Resource Management CBNRM It provides practical examples of successes and failures in implementation and lessons about the economics and governance of wild resources with global application CBNRM emerged in the 1980s encouraging greater local participation to conserve and manage natural and wild resources in the face of increasing encroachment by agricultural and other forms of land use development This book describes the institutional history of wildlife and the empirical transformation of the wildlife sector on private and communal land particularly in southern Africa to develop an alternative paradigm for governing wild resources With the twin goals of addressing poverty and resource degradation in the world s extensive agriculturally marginal areas the author conceptualises this paradigm as the Sustainable Governance Approach which integrates theories of proprietorship and rights prices and economics governance and scale and adaptive learning The author then discusses and defines CBNRM a major subset of this approach Interweaving theory and practice he shows that the primary challenges facing CBNRM are the devolution of rights from the centre to marginal communities and the governance of these rights by communities a challenge which is seldom recognised or addressed He focuses on this shortcoming extending and operationalising institutional theory including Ostrom s principles of collective action within the context of cross scale governance Based on the author s extensive experience this book will be key reading for students of natural resource management sustainable land use community forestry conservation and development Providing practical

but theoretically robust tools for implementing CBNRM it will also appeal to professionals and practitioners working in communities and in conservation and development **The Moral Austerity of Environmental Decision Making** John Martin Gillroy, Joe Bowersox, 2002-06-17 A roundtable discussion on the missing ethical dimension in environmental policy

Institutional Barriers and Incentives for Ecosystem Management Hanna Cortner, 1996 *General Technical Report PNW-GTR*, 1995 **Environmental Governance and Common Pool Resources** Michael Faure, Peter Mascini, Jing Liu, 2017-09-07 This book analyses the drivers of specific common pool resource problems particularly in fisheries and forestry examining the way in which private and public regulation have intervened to fight the common pool resource problem by contributing to the establishment and maintenance of property rights It focuses on the various forms of regulation that have been put in place to protect fisheries and forestry over the past decades both from a theoretical as well as from a policy perspective comparing the concrete interaction of legal and policy instruments in eight separate jurisdictions

Privatizing Public Lands Scott Lehmann, 1995-03-23 In the United States private ownership of land is not a new idea yet the federal government retains title to roughly a quarter of the nation's land including national parks forests and wildlife refuges Managing these properties is expensive and contentious and few management decisions escape criticism Some observers however argue that such criticism is largely misdirected The fundamental problem in their view is collective ownership and its solution is privatization A free market they claim directs privately owned resources to their most productive uses and privatizing public lands would create a free market in their services This timely study critically examines these issues arguing that there is no sense of productivity for which it is true that greater productivity is both desirable and a likely consequence of privatizing public lands or marketizing their management Lehmann's discussion is self contained with background chapters on federal lands and management agencies economics and ethics and will interest philosophers as well as public policy analysts
