ecogenic value nature as a whole having value independent of human or animal minds Vilks analyzes the goodness and rights of nature the problem of priorities and ecological humanism A naturocentric recommendation is that the well being of animals and nature should have priority over human values at least in some real decision contexts Ecological humanism recommends an attitude of respect for people animals and nature The book includes an extensive glossary index and bibliography The American Catalogue ,1891 Frog Pond Philosophy Strachan Donnelley,2018-02-09 The philanthropist and philosopher Strachan Donnelley 1942 2008 devoted his life to studying the complex relationship between humans and nature Founder and first president of the Center for Humans and Nature Donnelley was a pioneer in the exploration and promotion of the idea that human beings individually and collectively have moral and civic responsibilities to natural ecosystems In this wide ranging volume Donnelley traces the connections between influential figures such as Aldo Leopold and Charles Darwin as well as lesser known but original thinkers that he met during the course of a full life ministers at his church friends with whom he fished and colleagues who shared his passion for research and writing He grounds his work in classic philosophers such as Descartes Spinoza and Whitehead and reinterprets their writings about the natural world to develop a conservation centered philosophy which he dubs democratic ecological citizenship Edited by his daughter Ceara Donnelley and Bruce Jennings Frog Pond Philosophy illuminates the dominant strands of Donnelley s intellectual identity as a philosopher naturalist agitator and spiritualist Despite his often grim depiction of the current state of the environment Donnelly never surrenders his faith in humanity s ability to meet its ethical obligations to conserve respect and nurture the complexity and diversity of the natural world His vivid and personal essays rooted in everyday experiences offer a distinctive perspective on questions of urgent contemporary importance The Nature of Living Being Daniel Carlos Mayer-Foulkes,2023-06-01 This book proposes a bold idea Living beings are distinguishing distinctions Single cells and multicellular organisms maintain themselves distinct by drawing distinctions This is what organisms are and what they do From this starting point key issues examined range across ontology epistemology phenomenology logic and ethics Topics discussed include the origin of life the nature and purpose of biology the relation between life and logic the nature and limits of formal logic the nature of subjects the subject object relation subject subject relationships and the deep roots of ethics The book provides a radical new foundation to think about philosophy and biology and appeals to researchers and students in these fields It powerfully debunks mechanical thinking about living beings and shows the vast reservoir of insights into aliveness available in the arts and humanities **Monthly Bulletin** Carnegie Library of Pittsburgh,1905 *Deleuze & Fascism* Brad Evans,Julian Reid,2013-05-29 This edited volume deploys Deleuzian thinking to re theorize fascism as a mutable problem in changing orders of power relations dependent on hitherto misunderstood social and political conditions of formation The book provides a theoretically distinct approach to the problem of fascism and its relations with liberalism and modernity in both historical and contemporary contexts It serves as a seminal intervention into the debate over the

causes and consequences of contemporary wars and global political conflicts as well as functioning as an accessible guide to the theoretical utilities of Deleuzian thought for International Relations IR in a manner that is very much lacking in current debates about IR Covering a wide array of topics this volume will provide a set of original contributions focussed in particular upon the contemporary nature of war the increased priorities afforded to the security imperative the changing designs of bio political regimes fascist aesthetics nihilistic tendencies and the modernist logic of finitude the politics of suicide the specific desires upon which fascism draws and of course the recurring pursuit of power An important contribution to the field this work will be of great interest to students and scholars of international relations fascism and international relations theory
