## **Nature History A Study In Theological:**

*A Natural History of Natural Theology* Helen De Cruz, Johan De Smedt, 2024-06-11 An examination of the cognitive foundations of intuitions about the existence and attributes of God Questions about the existence and attributes of God form the subject matter of natural theology which seeks to gain knowledge of the divine by relying on reason and experience of the world Arguments in natural theology rely largely on intuitions and inferences that seem natural to us occurring spontaneously at the sight of a beautiful landscape perhaps or in wonderment at the complexity of the cosmos even to a nonphilosopher In this book Helen De Cruz and Johan De Smedt examine the cognitive origins of arguments in natural theology They find that although natural theological arguments can be very sophisticated they are rooted in everyday intuitions about purpose causation agency and morality Using evidence and theories from disciplines including the cognitive science of religion evolutionary ethics evolutionary aesthetics and the cognitive science of testimony they show that these intuitions emerge early in development and are a stable part of human cognition De Cruz and De Smedt analyze the cognitive underpinnings of five well known arguments for the existence of God the argument from design the cosmological argument the moral argument the argument from beauty and the argument from miracles Finally they consider whether the cognitive origins of these natural theological arguments should affect their rationality *Huskey's Study Notes on Historical Theology* Michael Huskey, 2020-10-08 My people are destroyed for a lack of knowledge Hosea 4:6 The modern church is in grave danger If you pay attention at all this is easy to see One of the reasons we are in grave danger is our lack of knowledge The late Dr R C Sproul once said Everyone is a theologian The danger here lies in that if we do not have a correct understanding of God and his attributes we will create an idol of who we would like God to be Scripture tells us to love God with our whole minds A study of church history and of theology will help us accomplish this What you will find within the pages of this study is an emphasis on theology and doctrine as it was forced to become razor sharp due to people making God into the god they idolized As you proceed through these chapters you will be faced with questions that will help you to learn how to think critically You will learn many of the attributes of God You will also learn Christology soteriology hermeneutics apologetics polemics and a number of other tools to help guide you into who the biblical God truly is *The Routledge Research Companion to Nineteenth-Century British Literature and Science* John Holmes, Sharon Ruston, 2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative and up to date foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore

crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman *A Preface to Theology* W. Clark Gilpin, 1996-11-15 At a time of widespread perplexity about the social role of humanistic scholarship few disciplines are as anxious about their nature and purposes as academic theology In this important work W Clark Gilpin dean of the University of Chicago Divinity School proposes that American theological scholarship become responsible to a threefold public the churches the academic community and civil society Gilpin approaches this goal indirectly by investigating the historic social roles of Protestant theologians and the educational institutions in which they have pursued their scholarship and teaching Ranging from analyses of the New England Puritan Cotton Mather to contemporary theologians as public intellectuals Gilpin proposes that we find out what theology is by asking what theologians do By showing how particular cultural problems have always shaped the work of theologians Gilpin's work profoundly illuminates the foundations of American academic theology providing insights that will help guide its future *Creational Theology and the History of Physical Science: The Creationist Tradition from Basil to Bohr* Christopher B. Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing Successive chapters focus on Greco Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post Newtonian mechanics The volume will interest historians of science and historians of the idea of creation It simultaneously details the persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution *Library of Congress Subject Headings* Library of Congress, Library of Congress. Subject Cataloging Division, Library of Congress. Office for Subject Cataloging Policy, 2000

*Wrestling with Nature* Peter Harrison, Ronald L. Numbers, Michael H. Shank, 2011-05-01 When and where did science begin Historians have offered different answers to these questions some pointing to Babylonian observational astronomy some to the speculations of natural philosophers of ancient Greece Others have opted for early modern Europe which saw the triumph of Copernicanism and the birth of experimental science while yet another view is that the appearance of science was postponed until the nineteenth century Rather than posit a modern definition of science and search for evidence of it in the past the contributors to *Wrestling with Nature* examine how students of nature themselves in various cultures and periods of history have understood and represented their work The aim of each chapter is to explain the content goals methods practices and institutions associated with the investigation of nature and to articulate the strengths limitations and boundaries of these efforts from the perspective of the researchers themselves With contributions from experts representing

different historical periods and different disciplinary specializations this volume offers a fresh perspective on the history of science and on what it meant in other times and places to wrestle with nature      *Cyclopaedia of Biblical, Theological, and Ecclesiastical Literature* John McClintock,1891      **Encyclopedia of Religion and Nature** Bron Taylor,2008-06-10 The Encyclopedia of Religion and Nature originally published in 2005 is a landmark work in the burgeoning field of religion and nature It covers a vast and interdisciplinary range of material from thinkers to religious traditions and beyond with clarity and style Widely praised by reviewers and the recipient of two reference work awards since its publication see [www.religionandnature.com](http://www.religionandnature.com)      **Natural Theology** James K. Dew, Jr.,Ronnie P. Campbell, Jr.,2024-04-16 Natural theology is a matter of debate among theologians and Christian philosophers In this book top scholars in the fields of theology and Christian philosophy introduce readers to five prevailing views on the topic Contributors include John C McDowell Alister E McGrath Paul K Moser Fr Andrew Pinsent and Charles Taliaferro The contributors offer constructive approaches from major perspectives contemporary Catholic classical deflationary and Barthian in a multiview format to provide readers with the state of the question on natural theology Each unit consists of an introduction by a proponent of the view under discussion responses from the other contributors and a final response by the proponent James Dew and Ronnie Campbell provide a helpful introduction and conclusion Offering a model of critical thinking and respectful dialogue this volume provides a balanced irenic approach to a topic of ongoing debate Students of theology Christian philosophers and readers interested in the theology and science dialogue will value this work      **Toward a Theology of Scientific Endeavour** Professor Christopher B Kaiser,2013-05-28 Foundations of science are specific conditions of the cosmos of human intelligence of cultural beliefs and of technological structures that make the pursuit of modern science possible Each of the four foundations of scientific endeavour can be studied as a topic on its own The concurrent study of all four together reveals several tensions and interconnections among them that point the way to a greater unification of faith and science This book explores four foundations of scientific endeavour and investigates some of the paradoxes each of them raises Kaiser shows that the resolution of these paradoxes inevitably leads us into theological discourse and raises new challenges for theological endeavour In order to address these challenges Kaiser draws on the wider resources of the Judeo Christian tradition and argues for a refocusing of contemporary theology from the perspective of natural science      **Bibliography of Natural History Travel Narratives** Anne S. Troelstra,2017-06-01 Anne Troelstra s fine bibliography is an outstanding and ground breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment

fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra s work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by author and chronologically by the year of first publication under the author s name A brief biography with the scope and range of their work is given for each author every title is set in context the contents including illustrations are described and all known editions and translations are cited In addition there is a geographical index that cross refers between authors and the regions visited and a full list of the bibliographical and biographical sources used in compiling the bibliography
