BY KARL LÖWITZ

I

WE ARE accustomed to confront nature with history, and we do so in consequence of a definite historical situation which arose in the sixteenth century with modern natural science. The natural antithesis to nature would be not history but art. In epochs when men were closer to nature than we are, as in classical antiquity, nature, or *physis*, was contrasted with art, or *techné*, that is, with the artificial, which is not "by nature" but is wrought by man, its artificer. According to the classical view, art can do no better than imitate nature. The seeming self-evidence of our familiar distinction between nature and history, and accordingly between natural sciences and humanities, has its origin at the beginning of modern times. Two sciences which characterized themselves as new ones gave the first philosophical expression to this distinction: the anti-Aristotelian natural science of Descartes, and Vico's anti-Cartesian "Scienza Nuova." The criterion of this distinction, however, lies primarily not in the difference of the respective fields but in the secondary distinction as to what can be known about nature and history scientifically. The priority of the problem of knowledge and method over the question of subject matter is again typically modern.

Descartes divided the whole realm of reality into two kinds of being: the *res cogitans* and the *res extensa*. From the principle of being-thinking he constructed nature as the object of mathematical physics. There is a true and certain knowledge about nature; about history nothing can be known truly and with

Edited with a Critical Introd. by Arnold Levison Karl Löwith, 1966 **A History of Existential Psychology** Zoltán Kőváry, 2024-12-30 The first in a two part set this book takes a deep dive into the history and theory of existential psychology Beginning with a discussion of the existentialism and psychology problem the book presents the philosophical and historical roots of existential psychology It introduces the most important philosophical schools in the development of existentialism and their creators such as Kierkegaard Nietzsche Heidegger and Sartre as well as the literary roots of existentialism in the writings of Dostoevsky and Kafka and the important contribution of psychoanalysis and phenomenological psychiatry The book then goes on to look at the existential psychology schools including daseinsanalysis logotherapy and existential analysis the existential humanistic school and the existential phenomenological school Going beyond the questions of therapy and counseling that typically make up the study of existential psychology the book offers the ultimate introduction for students and scholars of this fascinating and deeply rooted discipline It may also interest professionals working in related fields Nature, History and Existentialism, and Other Essays in the Philosophy of History.
