Nature At War:

Nature at War Thomas Robertson, Richard P. Tucker, Nicholas B. Breyfogle, Peter Mansoor, 2020-04-02 World War II was the largest and most destructive conflict in human history. It was an existential struggle that pitted irreconcilable political systems and ideologies against one another across the globe in a decade of violence unlike any other. There is little doubt today that the United States had to engage in the fighting especially after the Japanese attack on Pearl Harbor on December 7 1941. The conflict was in the words of historians Allan Millett and Williamson Murray a war to be won. As the world's largest industrial power the United States put forth a supreme effort to produce the weapons munitions and military formations essential to achieving victory. When the war finally ended the finale signaled by atomic mushroom clouds over Hiroshima and Nagasaki upwards of 60 million people had perished in the inferno. Of course the human toll represented only part of the devastation global environments also suffered greatly. The growth and devastation of the Second World War significantly changed American landscapes as well. The war created or significantly expanded a number of industries put land to new uses spurred urbanization and left a legacy of pollution that would in time create a new term Superfund site.

Rethinking the Nature of War Isabelle Duyvesteyn, Jan Angstrom, 2005 Have globalization virulent ethnic differences and globally operating insurgents fundamentally changed the nature of war in the last decade. Interpretations of war as driven by politics and state rationale formulated most importantly by the 19th century practitioner Carl von Clausewitz have received strong criticism. Political explanations have been said to fall short in explaining conflicts in the Balkans Africa Asia and the attacks of 11 September 2001 in the United States. This book re-evaluates these criticisms not only by scrutinising Clausewitz's arguments and their applicability but also by a careful reading of the criticism itself. In doing so it presents empirical evidence on the basis of several case studies addressing various aspects of modern war such as the actors conduct and purposes of war.

Theory and Nature of War, 1993 *Theory and Nature of War: Syllabus*, 1993 *Theory and Nature of War: readings*, 1993 *The Nature of War in the Information Age* David J. Lonsdale, 2004-06 Much of today's Revolution in Military Affairs (RMA) literature subscribes to the idea that the information age will witness a transformation in the very nature of war. In this book David Lonsdale puts that notion to the test. **The Nature of War** Ron Tira, 2009-10-05 Examines the different aspects that characterise a war from the centre of gravity to be attacked to the elements constituting military decision as they are manifested in simple symmetrical wars asymmetrical wars versus a state opponent guerrilla warfare parallel warfare and next generation warfare. *Globalization and the Nature of War* Antulio J. Echevarria (II), 2003 **War and Nature** Edmund Russell, 2001-02-12 This 2001 book shows the intersection of chemical warfare and pest control in the twentieth century. **War and Nature** Jurgen Brauer, 2009-10-15 The inherent dangers of war zones constrain even the most ardent researchers with the consequence that little has been known for certain about the effects of war on stable environments. War and Nature sifts through the available data from past wars to evaluate the actual impact that combat has

on natural surroundings Examining conflicts of various kinds the long war in tropical Vietnam the relatively brief and highly technical wars in the Persian Gulf and various civil wars in Africa and South Central Asia fought with small arms Brauer asks whether differences in technology location and duration are critical in causing environmental and humanitarian harm A number of unexpected conclusions are drawn from this data including practical agendas for collecting scientific evidence in future wars and suggestions about what the world s environmental and conservation organizations can do One thing War and Nature does is to show us how globalization can be a force harnessed for good ends
