**Living Through the End of Nature** Paul Wapner, 2013-02-08 How environmentalism can reinvent itself in a postnature age a proposal for navigating between naive naturalism and technological arrogance Environmentalists have always worked to protect the wildness of nature but now must find a new direction We have so tamed colonized and contaminated the natural world that safeguarding it from humans is no longer an option Humanity's imprint is now everywhere and all efforts to preserve nature require extensive human intervention At the same time we are repeatedly told that there is no such thing as nature itself only our own conceptions of it One person's endangered species is another's dinner or source of income In *Living Through the End of Nature* Paul Wapner probes the meaning of environmentalism in a postnature age Wapner argues that we can neither go back to a preindustrial Elysium nor forward to a technological utopia He proposes a third way that takes seriously the breached boundary between humans and nature and charts a co evolutionary path in which environmentalists exploit the tension between naturalism and mastery to build a more sustainable ecologically vibrant and socially just world Beautifully written and thoughtfully argued *Living Through the End of Nature* provides a powerful vision for environmentalism's future

**Farming and the Fate of Wild Nature** Daniel Imhoff, Jo Ann Baumgartner, 2012-07-16 *Farming and the Fate of Wild Nature* addresses an urgent and complex issue facing communities and cultures throughout the world the need for heightened land stewardship and conservation in an era of diminishing natural resources Agricultural lands in rural areas are being purchased for development Water scarcities are pitting urban and development expansion against agriculture and conservation needs The farming population is ageing and retiring while those who remain struggle against low commodity prices international competition rising production costs and the threat of disappearing subsidies We are living amidst a major extinction crisis much of it driven by agriculture as well as an increasing shift toward a global urban populace The modern diet driven by a grain fed livestock industry is no longer connected with the ecosystems that support it

In international circles experts are arguing that further intensification of agriculture through industrialization and genetic modification will be necessary to both feed an exploding human population and to save what is left of wild biodiversity This book takes up where its predecessor the award winning *Farming with the Wild* left off Featuring a wide range of in depth essays articles and other materials by such authors as Aldo Leopold Wendell Berry Michael Pollan Fred Kirschenmann and Daniel Imhoff this book persuasively demonstrates that farm and ranch operations which coexist with wild nature are necessary to sustain biodiversity and beauty on the landscape In fact as this invaluable educational resource demonstrates they are essential in the challenge of building sane healthy and hopeful human societies

*Conservation Biology for All* Navjot S. Sodhi, Paul R. Ehrlich, 2010-01-08 *Conservation Biology for All* provides cutting edge but basic conservation science to a global readership A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting edge conservation knowledge as widely as possible Important topics such as balancing conservation and human needs climate change conservation planning designing and analyzing conservation research ecosystem services endangered species management extinctions fire habitat loss and invasive species are covered Numerous textboxes describing additional relevant material or case studies are also included The global biodiversity crisis is now unstoppable what can be saved in the developing world will require an educated constituency in both the developing and developed world Habitat loss is particularly acute in developing countries which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found Sadly developing world conservation scientists have found it difficult to access an authoritative textbook which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest There is now an urgent need to educate the next generation of scientists in developing countries so that they are in a better position to protect their natural resources

Paul Thiele, 2013-04-26 The pursuit of sustainability has generated lifestyle changes for individuals across the globe widespread initiatives within civil society and business historic policies for municipal regional and national governments and crucial protocols and agreements by international organizations Increasingly sustainability provides a common language and goal for diverse peoples and nations Yet the meaning of sustainability remains unsettled and the term frequently serves as a PR strategy a green veneer for business as usual rather than a driver of fundamental change Leslie Paul Thiele's accessible yet thorough book provides a broad ranging introduction to the concept and practice of sustainability today It addresses the history scope and contested meanings of sustainability as an ethical ideal an ascendant ideology and a common sense approach to living in an ever more crowded world of increasingly scarce resources Key topics covered include environmental health and ecological resilience the promise and unintended consequences of technology political and legal challenges economic limits and opportunities and cultural change Unlike most other approaches to this crucial topic Thiele argues that sustainability requires innovation and adaptation as much as the conservation of resources His book will be a valuable resource for students in a broad range of courses including environmental studies and related areas as well as general readers keen to grapple with one of the most pressing issues of our times *For the Beauty of the Earth* Steven
