PETER MARSHALL

Natures Web Rethinking Our Place On Earth

Florence S. Boos

Natures Web Rethinking Our Place On Earth:

Nature's Web Peter Marshall, 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis At the same time it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter relatedness of all living things Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action We must change our relationship with nature and return to the days when our lives were intimately connected to and dependent upon the natural world Nature's Web lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them

Introducing Criticism in the 21st

Century Julian Wolfreys, 2015-03-08 This new and revised edition provides 14 chapters introducing new modes of hybrid criticism which have emerged in the twenty first century

Environment and Social Theory John Barry, 2005-07-28 Written in an accessible and jargon free way Environment and Social Theory examines the historical relationship between social

theory and the environment pre Enlightenment and Enlightenment social theory and the environment twentieth century social theory and the environment economic theory and the environment the relationship between ecology biology and social theory recent theoretical approaches to the environment the development of a green social theory The ideas and vies of key theorists including Hobbes Locke freud Habermas Giddens and Beck are discussed to provide comprehensive coverage of social theory for non specialist readers *Deep Ecology and World Religions* David Landis Barnhill,Roger S.

Gottlieb,2010-03-29 Bringing together thirteen new essays on the important relationship between traditional world spirituality and the contemporary environmental perspective of deep ecology this landmark book explores parallels and contrasts between religious values and those proposed by deep ecology In examining how deep ecologists and the various religious traditions can both learn from and critique one another the following traditions are considered indigenous cultures Hinduism Buddhism Taoism Confucianism Judaism Catholicism Islam Protestantism Christian ecofeminism and New Age spirituality *What is Sustainable Technology?* Karel Mulder,Didac Ferrer,Harro van Lente,2017-09-08 Designers of technology have a major responsibility in the current age Their designs can have tremendous effects on society in both the short and the long term In fact sustainable development itself has all the characteristics of a design project albeit a vast one But a failed product design here will be not just be unsuccessful in the market it will have far reaching consequences It is our common responsibility to make the project successful Technology has played an important role in creating the problems that we now face but it will also play an important role in solving them But this does not mean the technological fix will be easy How do we allocate resources and attention when there are myriad issues under the umbrella of sustainable development currently in competition with one another How do we arrive at precise specifications for the sustainable technologies that are to be developed and furthermore reach consensus on these specifications What if our sustainable technological solutions aggravate other problems or create new ones And because sustainable development is all about the long term consequences of our actions how do we assess the effects of modifying existing landscapes infrastructures and patterns of life How could we be sure in advance that the changes that new technologies bring will make our society more sustainable These dilemmas and paradoxes are the subject of this provocative book Sometimes the claim that a technology is sustainable is made in order to make the technology acceptable in the political process as in the case of nuclear energy production where the claims of sustainability refer to the absence of CO2 emissions In the case of biofuels claims of sustainability have led to a fuel or food debate showing that sustainability has counteracting articulations And the well known rebound effect is observed when increased resource efficiency can create a stimulus for consumption What is Sustainable Technology illustrates that the sustainability impact of a technology is often much more complicated and ambivalent than one might expect Making improvements to existing designs is not the technological challenge that will lead to real solutions We mustn t look to change a part of a machine but rather the machine as a whole or even the whole system in which it functions It is these system

innovations that have the potential to make a genuine contribution to sustainable development What is Sustainable Technology will help all those involved in designing more sustainable technologies in determining their strategies It does so by presenting case studies of different technologies in contrasting contexts Each case asks 1 What articulations of sustainability played a role in the design process 2 What sustainability effects did this technology lead to 3 Who was affected where and when 4 Could the designer have foreseen these consequences 5 How did the designer anticipate them 6 How was societal interaction dealt with during the design process Finally the authors reflect on future options for the sustainable technology designer They argue that an important first step is an awareness of the multitude of sustainable development challenges that play a role in production use recycling and end of life disposal What is Sustainable Technology will be essential reading for product designers engineers material scientists and others involved in the development of sustainable technologies as well as a wide academic audience interested in the complexities of the sustainable design process The Ethics of Environmentally Responsible Health Care Jessica Pierce, Andrew Jameton, 2004 This text aims to bring bioethics and health care squarely into the 21st century The book shows how environmental decline relates to human health and to health care practices in the US and other industrialized countries **The Routledge Companion to William Morris** Florence S. Boos, 2020-10-29 William Morris 1834-96 was an English poet decorative artist translator romance writer book designer preservationist socialist theorist and political activist whose admirers have been drawn to the sheer intensity of his artistic endeavors and efforts to live up to radical ideals of social justice This Companion draws together historical and critical responses to the impressive range of Morris's multi-faceted life and activities his homes travels family business practices decorative artwork poetry fantasy romances translations political activism eco-socialism and book collecting and design Each chapter provides valuable historical and literary background information reviews relevant opinions on its subject from the late nineteenth century to the present and offers new approaches to important aspects of its topic Morris's eclectic methodology and the perennial relevance of his insights and practice make this an essential handbook for those interested in art history poetry translation literature book design environmentalism political activism and Victorian and utopian studies

Dissecting Cannibal Holocaust Nathan Wardinski, 2024-04-15 Since its 1980 release the Italian horror film Cannibal Holocaust has shocked viewers and provoked censors with its graphic imagery and unrelenting nihilism Following a summary of the story and the controversy over its release Dissecting Cannibal Holocaust examines the film's relevance to cinematic and literary history anthropology nature studies ethics and censorship media and journalism documentary filmmaking representations of cannibalism and post-colonialism and genre cinema The book also addresses some of the most frequent criticisms of Cannibal Holocaust including its depictions of native people and the inclusion of real-life animal killings Matching the audacity of the film itself Dissecting Cannibal Holocaust makes provocative arguments about the influence of corporate media the purpose of art the relationship between industrialized and indigenous people the amorality of nature and

the roots of violence *Contemporary Anarchist Studies* Randall Amster, Abraham DeLeon, Luis Fernandez, Anthony J. Nocella, II, Deric Shannon, 2009-02-10 This volume of collected essays by some of the most prominent academics studying anarchism bridges the gap between anarchist activism on the streets and anarchist theory in the academy Focusing on anarchist theory pedagogy methodologies praxis and the future this edition will strike a chord for anyone interested in radical social change This interdisciplinary work highlights connections between anarchism and other perspectives such as feminism queer theory critical race theory disability studies post modernism and post structuralism animal liberation and environmental justice Featuring original articles this volume brings together a wide variety of anarchist voices whilst stressing anarchism s tradition of dissent This book is a must buy for the critical teacher student and activist interested in the state of the art of anarchism studies
