A Lawyer's Handbook for Enforcing Foreign Judgments in the United States and Abroad Robert E. Lutz, 2007 Publisher Description

Uncle Sam and Us Stephen Clarkson, 2002-09-28 Between them Brian Mulroney and Jean Chr tien radically altered the structure and functions of the federal government first by signing and implementing major trade liberalization projects and then by cutting back the size of their governments budgets and the scope of their policies Uncle Sam and Us analyzes the Mulroney Chr tien era s impact on Canadian governance through two related factors globalization from without and neoconservatism from within Stephen Clarkson begins his study by conceptualizing the present Canadian state as a five tiered nested system stretching from the municipal and provincial levels through the federal government and on to the new continental and global spheres of governance in effect he argues the North American Free Trade Agreement and the World Trade Organization have added a supraconstitution to Canada s existing institutions His analysis concerns the changes that have occurred not just in the federal government but in provincial and municipal

governance as well. The impact of globalization and neoconservatism is examined extensively in the second part of Clarkson's study which examines how the functions of the Canadian state have altered. Clarkson addresses the changes in a number of policy areas such as macro and monetary policy, regulatory, industrial and trade policy as well as social, labour, environmental, cultural and foreign policy. In linking external forces and internal factors in his analysis, Clarkson brings together separate aspects of the Canadian state into a comprehensive understanding of the current Canadian political climate. He combines a global knowledge of the international political economy with a micro concern for detailed analyses of policy issues and concludes that the responsibility for Canada's predicament lies less with external forces than with Canadians and the governments they elected. He ends with a hopeful look into the future pointing towards a realization of the shortcomings of neoconservative globalization and the expectation of a new governing paradigm. Co-published with Woodrow Wilson Center Press.

Free Trade for the Americas? Marianne Wiesebron, Paolo Vinentini, 2008-02-29. The face of international trade is continuing to change rapidly. But while much attention is focused on where post-Cancun any new international negotiations under the auspices of the WTO may go, there are other developments of potentially equal importance. The United States in particular is prioritizing new regional trade agreements. This book focuses on the most ambitious of these negotiations, the Free Trade Area of the Americas Agreement which is due to be completed in 2005. This US initiative aims to replicate the NAFTA Agreement which has bound the US, Canada and Mexico into a free trade area since 1994 across all 34 countries of South and North America bar Cuba. This huge continental market is to be built around US-defined notions of free trade and protection of foreign investment but will exclude the free movement of labour. This volume explains the origins and process of the negotiations, both the complicated multilateral discussions and the bilateral agreements that have already been drafted. It explains in detail US strategy, the structures and procedures of the Agreement, the possible consequences for South America including Mercosur, Brazil as Latin America's largest economy and the region's many small economies which cannot possibly compete on a level playing field with the US behemoth. The wider implications of the FTAA for the global trading system in particular for China, Japan and the EU. This book, the first comprehensive in-depth study of the FTAA, will be of use to trade specialists, international economists and all those interested in the FTAA about which very little information is readily available in the public domain.

The Making of NAFTA Maxwell A. Cameron, Brian W. Tomlin, 2000. How exactly do countries negotiate major international agreements? Until now, reliably impartial accounts of how deals are made have been rare and usually describe only one side of a multiparty process. Here Maxwell Cameron and Brian Tomlin provide the first full three-country account of the negotiations surrounding the controversial North American Free Trade Agreement which went into effect on January 1, 1994. Through extensive interviews with participants from all sides, Cameron and Tomlin develop a detailed picture of the process by which the United States, Mexico and Canada pursued closer economic relations and of the political realities that influenced the politicians and policymakers in each country. Written in an engaging and accessible style.

The Making of NAFTA is a faithful account built on insider views of how the representatives of the three countries prepared for negotiated and implemented the agreement Cameron and Tomlin show how NAFTA was influenced by the personalities and the multiple sometimes conflicting objectives of the individuals involved They also explore what the negotiations can reveal more generally about the making of public policy and the importance of international negotiations **Ricoeur's**

Critical Theory David M. Kaplan,2012-02-01 In Ricoeur s Critical Theory David M Kaplan revisits the Habermas Gadamer debates to show how Paul Ricoeur s narrative hermeneutics and moral political philosophy provide a superior interpretive normative and critical framework Arguing that Ricoeur s unique version of critical theory surpasses the hermeneutic philosophy of Gadamer Kaplan adds a theory of argumentation necessary to criticize false consciousness and distorted communication He also argues that Ricoeur develops Habermas s critical theory adding an imaginative creative dimension and a concern for community values and ideas of the Good Life He then shows how Ricoeur s political philosophy steers a delicate path between liberalism communitarianism and socialism Ricoeur s version of critical theory not only identifies and criticizes social pathologies posits Kaplan but also projects utopian alternatives for personal and social transformation that would counter and heal the effects of unjust societies The author concludes by applying Ricoeur s critical theory to three related problems the politics of identity and recognition technology and globalization and democracy to show how his works add depth complexity and practical solutions to these problems **Navigating NAFTA** Barry Appleton,1994
