Robert De Rustafjaell

Of Paradise And Light:

Light Bruce Watson, 2016-02-02 Light begins at Stonehenge where crowds cheer a solstice sunrise After sampling myths explaining First Light the story moves on to early philosophers queries then through the centuries from Buddhist temples to Biblical scripture when light was the soul of the divine Battling darkness and despair Gothic architects crafted radiant cathedrals while Dante dreamed a heaven of pure light Later following Leonardo s advice Renaissance artists learned to capture light on canvas During the Scientific Revolution Galileo gathered light in his telescope Descartes measured the rainbow and Newton used prisms to solidify the science of optics But even after Newton light was an enigma Particle or wave Did it flow through an invisible ether Through the age of Edison and into the age of lasers Light reveals how light sparked new wonders relativity quantum electrodynamics fiber optics and more Although lasers now perform everyday miracles light retains its eternal allure For the rest of my life Einstein said I will reflect on what light is Light explores and celebrates such curiosity

Urban Lighting, Light Pollution and Society Josiane Meier, Ute Hasenöhr, Katharina Krause, Merle Pottharst, 2014-10-24 After decades in the shadows urban lighting is re emerging as a matter of public debate Long standing truths are increasingly questioned as a confluence of developments affects lighting itself and the way it is viewed Light has become an integral element of place making and energy saving initiatives alike Rapidly evolving lighting technologies are opening up new possibilities but also posing new challenges to planners and awareness is growing that artificial illumination is not purely benign but can actually constitute a form of pollution As a result public policy frameworks incentives and initiatives are undergoing a phase of innovation and change that will affect how cities are lit for years to come The first comprehensive compilation of current scientific discussions on urban lighting and light pollution from a social science and humanities perspective Urban Lighting Light Pollution and Society contributes to an evolving international debate on an increasingly controversial topic The contributions draw a rich panorama of the manifold discourses connected with artificial illumination in the past and present from early attempts to promote new lighting technologies in the late 19th and early 20th centuries to current debates on restricting its excessive usage in public space and the protection of darkness By bringing together a cross section of current findings and debates on urban lighting and light pollution from a wide variety of disciplines it reflects that artificial lighting is multifaceted in its qualities utilisation and interpretation Including case studies from the United States Europe and the UK Urban Lighting Light Pollution and Society is one of the first to take a serious assessment of light pollution and places and is a valuable resource for planners policy makers and students in related subjects
