Reforming Markets In Health Care An Economic Perspective State Of Health Series:

EBOOK: Reforming Markets In Health Care Peter Smith, 2000-02-16 There has been an international move towards the creation of explicit markets in health care in which the purchase of care is separated from provision While the creation of such markets has undeniably led to improvements in certain aspects of health care it has also raised important issues that have yet to be resolved for example is an escalation of management costs an inevitable consequence of the introduction of a market in health care What sort of information is needed to make the market function efficiently Can a market based system be compatible with society's objectives relating to equity and solidarity The UK government is introducing reforms to the internal health care market in the UK National Health Service which seek to address concerns such as these and this book comprises a series of commentaries on their plans from a group of leading health economists Authors examine the contribution of economics to the debate on the reforms while seeking to make the analysis accessible to a general audience Reforming Markets in Health Care is recommended reading for students and researchers of health policy and health economics as well as health professionals and policy makers at all levels in the health services **EBOOK: Critical**

Comparative Health Policy in the Asia Pacific Robin Gauld, 2004-12-16 Dr Gauld's collection of case studies is informative and accessible. I would recommend it as a central text for a course in comparative health systems. Political Studies Review. Based upon research from eight countries in the Asia Pacific: Australia, China, Hong Kong, Japan, New Zealand, Singapore, South Korea, Taiwan, this book analyses and compares their differing health policies. Key issues the book probes include: The ways that health care is financed and delivered across the region; The historical and institutional arrangements that impact upon health policy and health care; How the health systems differ between the countries under study; How policymakers and service providers deal with unlimited demand and limited funding and issues such as service coverage and quality; How pharmaceuticals and population health strategies are managed; What the roles of the state and various other players such as the private sector and professional associations are in the making of health policy and delivery of health care; The challenges that lie ahead for health care and health policy in the region. *Comparative Health Policy in the Asia Pacific* is key reading for students, researchers and policy makers with an interest in health policy. It is relevant to those studying medicine and health studies, anthropology, history, sociology, public policy, politics and Asian studies. **EBOOK: The New Health Policy** Robin Gauld, 2009-06-16 This is an excellent and accessible introduction to key current debates in health policy. It is enriched by deft comparative analysis and by the way Dr Gauld locates the study in the context of current ideological debates. Students will learn a lot from wrestling with the questions posed at the end of each chapter and so will their teachers. Paul Wilding, Emeritus Professor of Social Policy, University of Manchester, UK. This book analyzes the issues that form the nucleus of the emerging new health policy agenda. Robin Gauld brings together in one volume a comprehensive picture of the health policy challenges facing contemporary developed world health systems as well as the strategies for tackling these. Individual chapters respectively analyze: Challenges in health care funding and organization; Quality and patient safety; The application of information technology; Clinical governance; The changing nature of professionalism and public involvement in health care planning; Public health; The role of the private sector. The book highlights the importance to policy makers of each subject, overviews research into it and discusses policy responses in Britain, New Zealand and the United States. *The New Health Policy* is essential reading for all students of health policy and health care along with policy makers and health care professionals. *The New Health Policy* Gauld, Robin, 2009-06-01 This book analyzes the issues that form the nucleus of the emerging new health policy agenda. health care along with policy makers and health care professionals Book Jacket Reforming the Health Care Market David F. Drake, 1994-09-19 Examining the health care market in a historical framework Drake analyzes the forces and events that have shaped American health care in the twentieth century and sheds new light on why and how our health care system has dampened competitive market forces and failed to provide sound value for much of our health care expenditures He examines the roles that physicians hospitals insurance companies businesses individual consumers and government legislation have played in creating a provider dominated market in which the cost of care has been concealed from consumers Comparing U S health care expenditures with those of other developed countries he concludes that a significant part of our health care problem is the style of medicine practiced in the United States which is much more specialized and high tech than in other developed nations Drake develops proposals for health care financing reform that consider the political and economic difficulties involved He first examines the Clinton health care reform plan and makes specific recommendations for revisions that would improve its likelihood of controlling costs He then offers an alternative proposal that would both maintain the principle of universal noncancelable coverage and eliminate the flaws in the market for health care services by giving consumers a financial stake in cost containment This timely argument combining economic and historical analysis with thoughtful consideration of the motivating humanitarian and political concerns will be of interest to everyone seeking to understand and to reform our ailing health care system **EBOOK: Regulating Healthcare** Kieran Walshe, 2003-06-16 Healthcare organizations in the UK and the USA face a growing tide of regulation accreditation inspection and external review all aimed at improving their performance In the US over three decades of regulation by state and federal government and by non governmental agencies has created a complex costly and overlapping network of oversight arrangements for healthcare organizations In the UK regulation of the government run National Health Service is central to current health policy with the creation of a host of new national agencies and inspectorates tasked with overseeing the performance of NHS hospitals and other organizations But does regulation work This book explores the development and use of healthcare regulation in both countries comparing and contrasting their experience and drawing on regulatory research in other industries and settings offers a structured approach to analysing what regulators do and how they work develops principles for effective regulation aimed at maximising the benefits of regulatory interventions and minimising their costs Regulating Healthcare is aimed at all with an interest or involvement in health policy and management be they policy makers healthcare managers or health professionals It is particularly suitable for use on postgraduate health and health related programmes *EBOOK: Restructuring the Medical Profession: The Intraprofessional Relations of GPs and Hospital Consultants* Juan Baeza, 2005-11-16 What is the relationship between general practitioners GPs and hospital consultants in the United Kingdom How does government health policy impact upon GPs and hospital consultants What influence does the medical profession have upon policy makers in the United Kingdom The medical profession occupies a dominant position

within the British health care system and as such is able to influence the development and implementation of health policy. The main division within the medical profession lies between general practitioners and hospital consultants. This book provides a comprehensive analysis of British health policy over the past twenty five years. Drawing on data from case studies it provides empirical evidence of the impact of recent health policies upon the National Health Service in general and the medical profession in particular. The case studies provide an analysis of the impact of the 1991 NHS reforms as well as examining the ongoing influence of the post 1999 NHS reforms upon these intraprofessional relations. What emerges is that the relationship between GPs and hospital consultants is transforming from a collegial to a more managerial relationship. This book sheds light on the resulting development of intraprofessional relations between GPs and hospital consultants within the NHS. Restructuring the Medical Profession is key reading for undergraduate and postgraduate students, researchers and professionals in the fields of social policy and health policy. It is also of interest to health service practitioners, health service researchers and health policy makers.

Health Care Coverage Determinations: An International Comparative Study Jost, Timothy, 2004-12-01. A ground breaking set of case studies about how health care coverage decisions are made. Robert A Berenson, M D, Senior Fellow at the Urban Institute, Washington D C and former Director of the Center for Health Plans and Providers of the Medicare program. Developed countries are facing rapidly rising health care costs and one of the major factors driving health care cost growth is the continual development and diffusion of new, generally more expensive health care technologies. This book contains: A description of the institutions, procedures and criteria used by eight countries for assessing technologies for public insurance coverage; An analysis of the role of interest groups and of the public interest in these decision making processes; An examination of how particular technologies are treated differently by different countries and why. Based upon research from Australia, Canada, Germany, The Netherlands, Spain, Switzerland, the United States of America and the United Kingdom, the contributors argue that although each of these countries is committed to evidence based scientific assessment of technologies, in fact adoption of technologies is significantly affected by political considerations and in particular by the influence of interest groups. Moreover, it offers recommendations as to how technology assessment for coverage policy can be improved to serve better the public interest. *Health Care Coverage Determinations* is essential reading for health policy makers, managers, researchers and students with an interest in health economics, health care provision and the politics affecting health care legislation. Contributors: Liliana Bulfone, Tanisha Carino, Peter C Coyte, Anna Garca Alts, Colleen M Flood, Stefan Gre, Felix Gurtner, Anthony Harris, Timothy Stoltzfus, Jost, Eric Nauenberg, Christopher Newdick, Dea Niebuhr, Guillaume Roduit, Heinz Rothgang, Frans F H Rutten, Dominique Sprumont, Juergen Wasem.

EBOOK: The Politics Of European Union Health Policies Scott Greer, 2009-06-16. Scott Greer has done a remarkable job in explaining how the Europeanization of health policy takes place, how institutional legacies exert an influence in lobbying, how harmonization exacerbates path dependent welfare structures that in turn impede a race to the bottom and

why the idea of a European social model creates positive external effects even if it is only an ad hoc policy construction
Journal of European Social Policy 2010 20 2 Provides an original and thought provoking perspective and approach combining in depth theoretical discussions and well researched case studies over 11 chapters The book is well written and insightful and the main argument is that EU law and policy developments directly and indirectly have the potential of undermining domestic health systems and the political actors within them Journal of Common Market Studies 2010 Volume 48 Number 3 This book provides a unique insight into what is going on unnoticed by most below the surface in EU health policy It serves as a wake up call for those who continue to believe that the EU is of marginal interest and relevance in national level debates about the direction of health care In addition in an engaging and lively style it provides essential guidance for students of health policy who seek to understand the labyrinthine processes and the wide ranging unintended consequences for good and for bad of EU policy making Professor Naomi Chambers Head of Health Policy and Management Manchester Business School In this insightful book Scott Greer describes how European health policy has long been developed in a secret garden where a small number of people find pragmatic solutions to immediate problems while avoiding the fundamental questions Yet the logic of European integration is tearing down the garden's walls creating a public park where pragmatism takes second place to principles Something must be done but it is not clear what Greer's book will be essential reading for anyone who is responsible for organising how health care is delivered in Europe Martin McKee CBE London School of Hygiene and Tropical Medicine UK This important new book explains how European Union EU developed policies shape and constrain health services It answers the key questions asked of EU health policy What is it Why did it happen What does it take to influence it and how can it be changed Using extensive new data Greer discusses how EU policy is influenced by lobbies in Brussels and by four big member states France Germany Spain and the United Kingdom Shaping EU health policy takes information coordination nimbleness and focus The book examines the ways that the successful health lobbies and member states work identifies weaknesses and emphasizes the challenge to health policymakers if they do not influence EU health policies they will lose influence over their own health systems The Politics of European Union Health Policies will be of great interest to students and academics of EU policy and politics as well as health policy makers **EBOOK: The European Patient Of The Future** Angela Coulter, Helen Magee, 2003-06-16 Health care is changing fast and patients experiences and expectations are also changing Developments in information technology and biotechnology are already having a profound influence on the way health services are delivered and the organization of health care is under reform in most countries Patients no longer see themselves as passive recipients of care increasingly they expect to be involved in all decisions that affect them This book reports the results of a major study carried out in eight different European countries to look at health policy dilemmas through the eyes of the patient Drawing on literature reviews focus groups and a survey of 1 000 people in each of the eight countries the book addresses the following questions Why might the patients of the future be different What

will patients and citizens expect from health systems Will the public be willing to pay more for better health care What kind of value trade offs are people prepared to make for example between prompt access and continuity of care or between choice and equity How will patients access information advice and treatment How should policy makers and providers react to patients desire for greater autonomy How can public confidence in health systems be maintained in the future The European Patient of the Future is a clear jargon free text which will be a key resource for all health service professionals health policy analysts and patient advocates Health Care Reform United States.
