Economic Development and Consumption Patterns in Asian Countries Shashika D. Rathnayaka, Saroja Selvanathan, Eliyathamby A. Selvanathan, 2024-07-05 This book analyzes consumption patterns in Asian countries that are at different stages of economic development and highlights the similarities and disparities of consumption patterns across countries using a system wide framework In a departure from previous studies in the literature which mainly present only single country analysis this book aims to provide a comprehensive analysis of cross country consumption patterns considering several Asian countries using the most recent consumption expenditure data for aggregate commodity groups In comparing consumption patterns across countries the book use unit free measurements such as budget shares and changes in logarithms of price and quantities thus avoiding problems associated with exchange rate conversions The book also analyses the dynamic behaviour in the consumption patterns of the Asian consumers The findings of this book will be invaluable to researchers in development economics as well as policymakers in the formulation of fiscal policy or other types of economic control

A System-Wide Analysis of International Consumption Patterns S. Selvanathan, 2012-12-06 The modern system wide approach to applied demand analysis emphasizes a unity between theory and applications Its firm foundations in economic theory make it one of the most impressive areas of applied econometrics This book presents a large number of applications of recent innovations in the area The database used consist of about 18 annual observations for 10 commodities in 18 OECD countries more than 3 100 data points Such a large body of data should provide convincing evidence one way or the other about the validity of consumption theory

A PREVIEW OF THE BOOK The overall importance of the analysis presented in the book can be seen from the following table which shows the significant contribution of the OECD to the world economy As can be seen the 24 member countries account for about 50 percent of world GDP in 1975 In this book we present an extensive analysis of the consumption patterns of the OECD countries

Anthony Selvanathan, 2003-04-24 This book presents an analysis of consumption patterns in the OECD rich and LDC poor countries using recent data 1950 1998 and econometric methodology for a number of broadly aggregated consumer goods The income elasticity estimates for the 46 countries and 9 commodity groups are tabulated The reliability of these elasticity estimates and also the demand theory hypotheses are investigated using simulation techniques

consumption patterns of food in general and soft drinks in particular In addition the book provides a detailed analysis of the consumption restrictions and regulations in place in various countries in relation to issues associated with taxation availability and marketing of these products The book s focus is on rigorous empirical analysis and presents the estimates of demand elasticities of these five commodities across different countries Such estimates are key inputs for government economic models that are used for the purpose of social policy analysis Furthermore the book presents hypothesis testing results on various demand theory hypotheses such as demand homogeneity and Slutsky symmetry Quantitative Econometrics ,1998 Household Demand for Consumer Goods in Developing Countries Eliyathamby A. Selvanathan,Saroja Selvanathan,Maneka Jayasinghe,2022-11-04 This book analyses the household demand for consumer goods using a diverse database consisting of 45 developed and developing countries Household consumption patterns have undergone dramatic changes due to rapid economic growth increasing household income and changing demographics Using the most recent data available and the latest econometric techniques the authors model demand for 12 different commodities such as food alcohol and tobacco housing health transport health communication and recreation and provide insightful comparisons of consumption patterns in developed and developing countries The analysis presented in this book highlights valuable policy insights for planning government budgetary allocations and implementing policies towards an enhanced standard of living for people The book also provides some important guidance for researchers interested in the theory and empirical application of the analysis of consumer demand **Economics and Marijuana** Kenneth W. Selvanathan,2016-07-27 An authoritative survey with exciting new insights of special interest to economists and econometricians who analyse intertemporal and interspatial price relationships Professor Angus Maddison Groningen University This book presents a comprehensive review of recent developments in the theory and construction of index numbers using the stochastic approach demonstrating the versatility of this approach in handling various index number problems within a single conceptual framework It also contains a brief but complete review of the existing approaches to index numbers with illustrative numerical examples The stochastic approach considers the index number problem as a signal extraction problem The strength and reliability of the signal extracted from price and quantity changes for different commodities depends upon the messages received and the information content of the messages The most important applications of the new approach are to be found in the context of measuring rate of inflation fixed and chain base index numbers for temporal comparisons and for spatial intercountry comparisons the latter generally require special index number formulae that result in transitive and base invariant comparisons **International Bibliography of Economics 1994** British Library of Political and Economic Science at the London School of Economics,1995 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires

access to up to date and comprehensive knowledge of the social sciences **World Consumption Economics** Dongling Chen,1999-12-13 This book extends research in consumption economics by identifying similarities and differences in consumption patterns in a large number of countries both developed and less developed Its approach is to carefully analyze a large body of data from a highly diverse group of countries to determine the extent to which a simple economic framework can be used to understand and explain consumer behavior It uses data from more than 40 countries which range from the most affluent to the poorest in the world The book pays particular attention to the consumption of food and to new simulation techniques applied to systems of demand equations **Contributions to Consumer Demand and Econometrics** Ronald Bewley,1992-06-18 Contains essays on consumer demand and econometrics written in honour of Professor Henri Theil The essays report the results of current pioneering research work and cover a variety of topics including inequality tests mixing forecasts and dynamic panel data models **Australian National Bibliography** ,1995 **APAIS 1992: Australian public affairs information service** , **Studies in Global Econometrics** H. Theil,2007-07-11 Studies in Global Econometrics is a collection of essays on the use of cross country data based on purchasing power parities The two major applications are the development over time of per capital gross domestic products including that of their inequalities among countries and regions and the fitting of cross country demand equations for broad groups of consumer goods The introductory chapter provides highlights of the author s work as relating to these developments One of the main topics of the work is a system of demand equations for broad groups of consumer goods fitted by means of cross country data These data are from the International Comparison Program which provides PPP based figures for a number of years and countries Similar data are used for the measurement of the dispersion of national per capita incomes between and within seven geographic regions **International Evidence on Consumption Patterns** Henri Theil,Ching-Fan Chung,James L.
