Burns, 2006-04-11 ALEXANDER GILLESPIE WILLIAM C G BURNS The idea for this book grew out of the Ecopolitics conference in Canberra Australia in 1996 The conference captured the ferment of the climate change debate in the South Pacific as well as some its potential implications for the region s inhabitants and e systems At that conference one of the editors Gillespie delivered a paper on climate change issues in the region as did Ros Taplin and Mark Diesendorf who are also c tributors to this volume This book focuses on climate change issues in Australia New Zealand and the small island nations in the Pacific as the world struggles to cope with possible the impacts of environmental change and to formulate effective responses While Australia and New Zealand's per capita emissions of greenhouse gases are among the highest in the world their aggregate contributions are small However both nations may exert a disprop tionate influence in the global greenhouse debate because their obstinate positions at recent conferences of the parties to the United Nations Framework Convention on C mate Change FCCC may provide justification for other developed nations as well as developing countries to refuse to make meaningful reductions in their greenhouse gas emissions A Grand Strategy for America Robert J. Art, 2013-02-15 The United States today is the most powerful nation in the world perhaps even stronger than Rome was during its heyday It is likely to remain the world's preeminent power for at least several decades to come What behavior is appropriate for such a powerful state To answer this question Robert I Art concentrates on grand strategy the deployment of military power in both peace and war to support foreign policy goals He first defines America's contemporary national interests and the specific threats they face then identifies seven grand strategies that the United States might contemplate examining each in relation to America's interests The seven are dominion forcibly trying to remake the world in America's own image global collective security attempting to keep the peace everywhere regional collective security confining peacekeeping efforts to Europe cooperative security seeking to reduce the occurrence of war by limiting other states offensive capabilities isolationism withdrawing from all military involvement beyond U S borders containment holding the line against aggressor states and selective engagement choosing to prevent or to become involved only in those conflicts that

pose a threat to the country's long term interests Art makes a strong case for selective engagement as the most desirable strategy for contemporary America It is the one that seeks to forestall dangers not simply react to them that is politically viable at home and abroad and that protects all U S interests both essential and desirable Art concludes that selective engagement is not a strategy for all times but it is the best grand strategy for these times **Energy Research Abstracts** Scientific and Technical Aerospace Reports ,1992 **Understanding Sea-level Rise and Variability** John A.
