

However, the term is not unanimously defined in the literature. The concept appears in an overlapping way with the notion text, and the two terms are even used synonymously. Yet at other places they convey contrastive shades of meaning (Károly, 2007). Widdowson (1996) applies the term text to the product of the process of discourse, de Beugrande and Dressler (1981) argue that a text is the product itself and the process as well. There is no consensus whether the terms mean written or spoken products either. Some linguists differentiate the two terms as a text being written while discourse being spoken (Coulthard, 1985; Sanders & Sanders, 2006). Nevertheless, others use both terms for written and spoken products (Ford et al, 2001; Trask, 1999). Some even argue that the terms discourse and text are such elemental and underlying ones that their nature cannot be defined categorically with certainty, which in turn might help new theories emerge relying on slightly different connotations of the terms (Kocsány, 2002). The present research follows the de Beugrandian tradition (1981) as far as treating the technical term text as a communicative event that is both a product and a process, as well as using the term discourse synonymously with text (de Beugrande, 1997). Considering the nature of communication, the current investigation is in the wake of Trask (1999) by applying the two compatible terms for written and spoken processes and products alike.

## **2.3 Genre and register**

### **2.3.1 Genre and register as overlapping concepts**

Certain instances of communicative events and a number of discourse samples or texts display several kinds of similarities. Based on these similarities, they might be labelled as belonging to one common class: a genre, traditionally a literary construct (Hyon, 1996), or a register. According to Swales (1981, 1986, 1990), whose research has been seminal in shaping genre theory, the crucial similarity that groups a pool of discourse items in a shared

**Cross-Linguistic Variation in System and Text** Elke Teich, 2012-02-13 The intuition that translations are somehow different from texts that are not translations has been around for many years but most of the common linguistic frameworks are not comprehensive enough to account for the wealth and complexity of linguistic phenomena that make a translation a special kind of text The present book provides a novel methodology for investigating the specific linguistic properties of translations As this methodology is both corpus based and driven by a functional theory of language it is powerful enough to account for the multi dimensional nature of cross linguistic variation in translations and cross linguistically comparable texts

This book examines the resources that speakers employ when building conversations. These resources contribute to overall coherence and cohesion which speakers create and maintain interactively as they build on each other's contributions. The study is cross-linguistic, drawing on parallel corpora of task-oriented dialogues between dyads of native speakers of English and Spanish. The framework of the investigation is the analysis of speech genres and their staging; the analysis shows that each stage in the dialogues exhibits different thematic, rhetorical, and cohesive relations. The main contributions of the book are a corpus-based characterization of a spoken genre, task-oriented dialogue; the compilation of a body of analysis tools for generic analysis; application of English-based analyses to Spanish; and comparison between the two languages and a study of the characteristics of each generic stage in task-oriented dialogue. **Russian in the 1740s** Thomas Rosén, 2022-03-22

During the 1740s, literate Russians mostly kept to traditional forms of written language. Although the linguistic reforms undertaken by Peter the Great earlier in the century affected printed secular texts and the imperial administration, these reforms were less radical than often assumed. This study draws conclusions based on an analysis that differs from earlier ones. First of all, the study examines the Russian language during a comparatively little-known decade of the eighteenth century. In doing so, it takes into account not only strictly linguistic data but also developments in Russian society. Second, the investigation analyzes sources that are seldom valued for their linguistic content, thus offering a broader perspective on the Russian language of the period. Meaning in Context Jonathan J. Webster, 2008-04-21 *Meaning in Context* collects some of the biggest names in systemic functional linguistics in one volume and shows how this theory can be applied to language studies intelligently in order to arrive at a better understanding of how meaning is constructed in language. The chapters use systemic functional theory to examine a range of issues, including corpus linguistics, multimodality, language technology, world Englishes, and language evolution. This forward-thinking volume will be of interest to researchers in applied linguistics and systemic functional linguistics. A Comparative Study on the Translation of Detective Stories from a Systemic Functional Perspective Yan Wang, 2020-08-31

This book presents a corpus-based investigation of verbal projection in detective stories and their translations. Adopting both diachronic and synchronic approaches to compare two different Chinese translations, the book is one of the first attempts to conduct a comprehensive lexicogrammatical, logico-semantic, and rhetorical, as well as contextual analysis of verbal projection in the Chinese context, especially the classical Chinese language context. Further, it studies the differences and similarities of different translators' choices from both diachronic and synchronic perspectives. Given its scope, the book is relevant for all those interested in functional linguistics, translation studies, and detective stories.

**The Letter to the Romans** Stanley E. Porter, Francis G. H. Pang, 2018-05-24 Written at a time when his ideas and practices were provoking opposition even from fellow Christians the Apostle Paul articulates in his Letter to the Romans his understanding of God s plan for humanity and discusses the implications of this plan for different groups of people Romans is considered by many as the most theologically significant and sophisticated book of the Bible This volume is designed to bridge the gap between studying Romans as an academic enterprise and experiencing how Romans can speak today in the life of the church All of the chapters in this volume especially those devoted to the content of Romans were written with both exegesis and application in mind All of the contributors to this volume believe that Romans has a crucial voice within the church today and that those who preach teach and study the book need to be attentive to its witness and to its timeliness

**Discourse as Structure and Process** Teun A. van Dijk, 1997 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk The book stresses that both discourse and its mental processing have a social basis and can only be fully understood in relation to social interaction
