Conference of the United States,1994 Governing through Regulation Eric Windholz,2017-06-26 Over the past forty years numerous theoretical advances have been made From Ayres and Braithwaite s ground breaking work on responsive regulation we have seen models of smart regulation regulatory governance and regulatory capitalism emerge to capture the growing prevalence and importance of regulation in modern liberal Western capitalist societies Important advances also have been made in the practice of regulation with regulators evolving from traditional enforcement focussed command and control models to being modern regulators with a suite of diverse and innovative regulatory tools at their disposal The book presents and critically examines these theoretical and practical developments from the perspective of governments who design regulations and the regulators that deploy them In doing so the book examines the various forces and interests that influence and shape the regulatory endeavour and the practical challenges facing governments and regulators when deciding whether and how to regulate This volume is a study of regulation in context in the context of the public policy it is designed to deliver the law that enables shapes and holds it to account and the evolving societal and institutional frameworks within which it takes place Aimed to provide innovative cross disciplinary conceptual frameworks that regulators regulatees those whom regulation is intended to benefit and academics might employ to better understand and undertake the regulatory endeavour This will be of great interest to researchers educators advanced students and practitioners working in the fields of political science public management and administration and public policy International Contracts and National Economic Regulation:Dispute Resolution Through International Commercial Arbitration Mahmood Bagheri,2000-12-06 The growth of national economic regulation and the process of globalisation increasingly expose international transactions to an array of regulations from different jurisdictions These developments often contribute to widespread international contractual failures when parties claim the incompatibility of their contractual obligations with regulatory laws The author challenges conventional means of dispute resolution and argues for an interdisciplinary approach whereby disciplines such as international economic law conflict of laws contract law and economic regulations are functionally united to resolve international and multifaceted regulatory disputes He identifies the normative foundation of contract law as an important determinant in this process contending that contract law is essentially neutral and underpinned by the concept of corrective justice while economic regulations are mainly prompted by distributive justice Applying this corrective distributive justice dichotomy to international contracts the author critically assesses major conflict of laws approaches such as proper law the Rome Convention and governmental interest analysis which could disregard either public interest or private rights The author taking these theories into account proposes an alternative two dimensional interest analysis approach He tests the viability of this approach with reference to arbitral awards and court decisions in various jurisdictions and concludes that it uniquely fits into the structure of international commercial arbitration In adopting this approach arbitrators would take into account both corrective and distributive justice and to the extent that corrective justice prevails would be able to avert a total

Better Regulation Stephen Weatherill, 2007-06-28 The discourse of Better Regulation is a hot topic intimately associated with the drive for cost savings and a more efficient economy In the UK and in the EU rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand and commercial freedom and the potential for innovation on the other But who is the regulator listening to and what effect does this have on the regulatory pattern governing the integrating EU market What is best practice in the matter of regulatory assessment The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation the accountability issues involved and problems of enforcement It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy makers politicians and the business community has turned instead to the quest for Better Regulation or perhaps it might be said a Better European Union

Public Policy and Economic Institutions Melvin J. Dubnick, Alan R. Gitelson, 1991

The Paradox of Regulation Fiona Haines, 2011-01-01 The Paradox of Regulation is a tour de force of regulatory scholarship that successfully contextualizes the regulatory project as an effort to reduce multiple forms of risk Three case studies of regulatory reforms fascinating in their own right when read together forcefully demonstrate why context matters to the actuarial assessments political realities and possibilities for insuring safety security and integrity Haines penetrating analysis presents no simple answers to what works and why The Paradox of Regulation nimbly demonstrates that the strengths and limits of a particular regulatory reform must be understood as a complicated response to a dynamic constellation of actuarial political and socio cultural risks Nancy Reichman University of Denver US This new book by Fiona Haines is an elegant but sophisticated analysis of the three risks technical social and political that regulation must address if it is to be effective This analysis is original and fresh bringing together critiques of risk based regulation with empirical literature on compliance and

effectiveness evaluation This is exactly the sort of book we need more of to develop and deepen empirical and theoretical research in regulatory scholarship it helpfully melds together different literatures and theoretical approaches with her own empirical work on regulatory reforms to build a multi layered theoretical analysis that really pushes forward our understanding of regulation why it happens and how it fails and succeeds Christine Parker Monash University Australia This is an insightful and nuanced analysis of the strengths and limitations of regulation Through a close grained analysis of three recent disasters Haines demonstrates that regulation is not just a technical but also a political and a social project and how a failure to recognise its multiple dimensions can lead to regulatory failure This book is a major contribution that enriches our understanding of the challenges of risk management and of how best to address them Neil Gunningham Australian National University Canberra Fiona Haines shows us that regulatory policy is complex and paradoxical in ways that should require us to attend to the substance and the politics of specific regulatory regimes This book is a major contribution to the reconceptualisation of risk and regulation It is a perceptive treatment of the role of crisis by one of the best scholars of regulation we have John Braithwaite Australian National University Canberra

Australia Canada Quebec France Sweden and the UK during a time of major change It examines the implications of the shift from specification to process based regulation in which attention has been increasingly directed to the means of managing OHS more systematically at a time in which a major restructuring of work has occurred in response to the globalised economy These changes provide both the context and material for a wider discussion of the nature of regulation and regulatory inspection and their role in protecting the health safety and well being of workers in advanced market economies With its comparative nature and empirical studies this book will appeal to OHS policy makers and regulators all over the world as well as students in the field of occupational health and safety regulation internationally

Private Regulation and Enforcement in the EU Madeleine de Cock Buning, Linda Senden, 2020-06-25 Globalisation and technological innovation have been fuelling the need for increasing levels of trust in private actors such as companies or special interest groups to regulate and enforce significant aspects of people's daily lives from environmental and social protection to the areas of food safety advertising and financial markets This book investigates the trust vested in private actors from the perspective of European citizens It answers the question of whether private actors live up to citizens expectations or whether more should be done as to the safeguarding of citizens interests Several cross cutting studies explore how private regulation and enforcement are embedded in EU law The book offers an innovative approach to private regulation and enforcement by focusing on the specific EU context which unlike the national and transnational ones has not yet been widely explored This context merits a stand alone analysis because of the unique normative framework of the EU as a particular polity itself but also in relation to its Member States With an overall analysis of the main aspects of private regulation and enforcement across different policy fields of the EU the book adds a missing tile to the mosaic of public private governance studies
