Randi's Prize Robert McLuhan, 2010 James The Amazing Randi is a stage magician who says he has a million dollars for anyone who can convince him they have psychic powers No one has even come close to winning proof say sceptical scientists that there is no such thing as the paranormal But are they right In this illuminating and often provocative analysis Robert McLuhan examines the influence of Randi and other debunking sceptics in shaping scientific opinion about such things as telepathy psychics ghosts and near death experiences He points out that scientific researchers who investigate these things at first hand overwhelmingly consider them to be genuinely anomalous But this has shocking implications for science for society and for even perhaps for ourselves as individuals Hence the sceptics insistence that they should rather be attributed to fraud imagination and wishful thinking However this extraordinary and little understood aspect of consciousness has much to tell us about the human situation McLuhan suggests And at a time when militants are polarising the debate about religion its mystical spiritual element offers an optimistic and enlightened way forward Randi's Prize is aimed at anyone interested in spirituality or those curious to know the truth about paranormal claims It's an intelligent and readable analysis of scientific research into the paranormal which uniquely also closely examines the arguments of well known sceptics **The Complete Idiot's Guide to Reincarnation** David Hammerman, Lisa Lenard, 2000 Offers an introduction to reincarnation including the evidence that it occurs the beliefs of various traditions gaining access to past lives karma soul cycles and the use of reincarnation in psychotherapy *The Science of Truth* C.W. Adams, Modern scientific theory has proposed to us an accidental existence and evolution without an ultimate purpose or reason This has forced upon each of us the need to balance our personal feelings of faith and spirituality with the basic assumptions of modern science The Science of Truth draws upon the relevant research together with timeless revelations to demonstrate that life truly does have meaning and purpose In this exploration Dr Adams provides a pragmatic review of the prominent scientific theories regarding evolution creation identity genetics quantum physics and even the scientific method itself Practical and verifiable conclusions are accomplished substantiating some of our deepest emotions The Science of Truth successfully bridges the gap between true faith and real science providing resolution to some of the greatest debates of our generation *The Wiley-Blackwell Handbook of Transpersonal Psychology* Harris L. Friedman, Glenn Hartelius, 2013-08-07 THE WILEY BLACKWELL HANDBOOK OF Transpersonal Psychology The new Handbook of Transpersonal Psychology is a necessity today Many transpersonal

Frontiers of Knowledge: Scientific and Spiritual Sources for a New Era Douglas Kinney, 2014-06-06 Frontiers of Knowledge is the story of unfolding developments that are revolutionizing our understanding of ourselves and our place in the universe We are birthing a new era in which our ideas about the nature and source of reality are swiftly changing Insights from quantum physics suggest that the basis of our physical world is actually mental conscious thoughts Other discoveries are causing us to redefine our concepts of mind and the elusive thing we call consciousness All strongly hint that spirituality is the underlying source of everything Frontier scientists and scientifically trained researchers are providing us with a rich and expanding base of knowledge through systematic investigations of startling phenomena that have been observed in quantum physics cosmology biology psychology disease and healing death near death experiences reincarnation experiences and those occurring in spiritual hypnosis on the nature of the spiritual realm New concepts of reality are especially needed to explain the incredibly finetuned characteristics and the mysterious nature of our physical universe

Ninety five percent of the universe s energy and mass are a mystery to scientists and for the moment we resort to naming them dark matter and dark energy The last time a comparable knowledge revolution occurred was in the late sixteenth century when astronomers determined that the planets revolved around the sun not the earth Historians call it the Copernican Revolution because it led to modern Western science From one perspective the new era predicted in this book a revolution in its own right can be considered the completion of the quantum revolution by defining and explaining the role of consciousness in our universe An underlying aspect of this new revolution is the sense that humanity is moving into a new era of rapidly expanding knowledge of the human spirit our soul aspect and non physical realities Until now this emerging knowledge has not been organized into a coherent and comprehensive structure Frontiers of Knowledge provides the first outline of this new structure of reality

Becoming Psychic (Volume 2 of 2) (EasyRead Super Large 24pt Edition) , Parapsychology, Philosophy, and Spirituality

David Ray Griffin,1997-01-09 In this book David Ray Griffin best known for his work on the problem of evil turns his attention to the even more controversial topic of parapsychology Griffin examines why scientists philosophers and theologians have held parapsychology in disdain and argues that neither a priori philosophical attacks nor wholesale rejection of the evidence can withstand scrutiny After articulating a constructive postmodern philosophy that allows the parapsychological evidence to be taken seriously Griffin examines this evidence extensively He identifies four types of repeatable phenomena that suggest the reality of extrasensory perception and psychokinesis Then on the basis of a nondualistic distinction between mind and brain which makes the idea of life after death conceivable he examines five types of evidence for the reality of life after death messages from mediums apparitions cases of the possession type cases of the reincarnation type and out of body experiences His philosophical and empirical examinations of these phenomena suggest that they provide support for a postmodern spirituality that overcomes the thinness of modern religion without returning to supernaturalism

Spreading the Light

Archie Crawford,2004 This book is about life and is written in plain everyday language The author boldly faces up to those fundamental questions rankling at the back of one s mind such as Is there really a God Where is He What is the nature of the soul What is truth Is reincarnation true Is there any purpose in the universe Does God cause suffering Do angels exist Who am I Can effect become cause Does space and time really exist etc He probes deep into the structure of your mind and with great clarity shows you how your mind works and how you can use it to find success in everything you do He shows how we attract our present circumstances and how emotionally intense events are not only registered in our psychic memory but also in the memories of the cells of our body and what this means for us He devotes a chapter in which he advocates going within

through meditation to find solutions to our problems Religion is examined with candor He explains the many positive benefits of religion examines its dark side and points out that like individuals some religions must resolve and get rid of the baggage of past evil deeds before they and their followers can step into the light The author shows how in spite of itself science through its quantum theories is currently making discoveries which lead to a new view of the universe more in line with that of the essence of the religions and the experiences of the mystics of this world He shows how science and religion are at last beginning to merge For example there is now scientific proof of the value of prayer proof that the mind is non local that is it is not located in the brain and also can cause actions over distance that there is no solid matter in the universe it is all energy in one form or another He further states that a field of energy outside the material universe has been discovered where speeds exceed that of light It has also been found that our human consciousness is directly connected with matter and influences at least its microscopic particles The nature of the universe as being holographic is explored These scientific findings have profound spiritual significance He quotes experts on the future of mankind including Arthur C Clark Nobel physicist Brian Josephson Stephen Hawking etc and many more Reading this book will prepare you for the new age that is fast enveloping the earth The author s message is that in spite of the terrorism and devastation of the earth currently going on there is powerful hope There are powerful spiritual forces at work which will overcome the present chaos and lead us into a life of enlightenment and eventually of love
