PRESTRESSED CONCRETE GHOSH, KARUNA MOY, 2014-01-01 This book addresses an overall approach presenting comprehensive principles and description of the analysis and design of prestressed concrete members from its initial design concepts analysis to the construction stage The structural components are analyzed and designed to conform to the requirements of Eurocodes that are similar to Indian Standard Codes followed throughout the world In order to elaborate on the concept of prestressed concrete seven different cases are dealt with in this book to add an analytical approach to the subject The concepts explained are well supported with the mathematical derivations and problem formulations Illustrative figures and tables further help in making understanding of the concepts easier The book serves as a reference for the undergraduate students of civil and structural engineering

PRACTICAL DESIGN OF REINFORCED CONCRETE STRUCTURES GHOSH, KARUNA MOY, 2010 This book is a comprehensive presentation of the practical aspects of analysis and design of reinforced concrete structures Written on the basis of the British BS and European Eurocode codes of practices this book is primarily meant for the undergraduate students of civil engineering It will also be highly useful for structural engineers working in the fields of design consultancy and construction involving reinforced concrete structures The text is organized into four parts each dealing with the analysis and design of a specific type of reinforced concrete structure The first part covers the multi storeyed administrative office building The second part deals with the elevated storage bin structure used in steel plants The elevated structural framework subjected to mechanical vibration is the subject matter of the third part The fourth and final part discusses the precast reinforced concrete workshop building The important activities required to be carried out prior to structural analysis structural arrangement planning materials selection examination of buildability and environmental impact are covered in the initial chapters in each part This is followed by a step by step presentation of the analysis and design procedures for various structures and structural elements members The book presents the various structural analyses and design calculations in an exhaustive manner The text is illustrated with a large number of visuals Important additional information relevant to this field can be found in the references provided at the end of various chapters The STRAP structural analysis program for the multi storeyed administrative office building and the vibration analysis of the elevated reinforced concrete framed structure are provided in the Annexures to the book
