 **The Relational Self** Rebecca C. Curtis,1991-03-22 In recent years the traditional psychoanalytic view of the self as an autonomous entity has been shifting to a more relational perspective This evolution from a solely intrapsychic stance brings psychoanalysis closer to the viewpoint of social psychology formerly a highly divergent discipline Bridging these different literatures THE RELATIONAL SELF describes the extent and meaning of these convergences The book is divided into four sections The first two examine current perspectives from psychoanalytic self psychology and social psychology and the latter two present an integration of psychoanalytic and social personality approaches Part One reviews the psychoanalytic theories of character structure that focus upon identity maintenance self esteem regulation and resistance to change Also presented is an interactional view of the self that explores the intersubjective context of intrapsychic experience Part Two shifts from the largely unconscious intrapsychic self to the self as affected by situational variables Considered here are the relationship between self image and attitudes the social categories deemed by people as important to their identity and the effects of physical relocation upon self concept change Part Three presents a theory of the self with separate rational and experiential processing systems and also explores cultural influences on the self from a psychoanalytic vantage point Part Four considers psychotherapy self verification and self concept change including self defeating behavior and self consistency striving the avoidance of self awareness self evaluation maintenance and self with other representations Bringing together the work of leading theorists in social psychoanalytic and personality psychology on the interaction of self organization with the social and physical environment THE RELATIONAL SELF fosters a better understanding of both situational and dispositional variables and a deeper appreciation of the changing theoretical sense of a relational self as the ultimate stage of development     Individual Self, Relational Self, Collective Self Constantine Sedikides,Marilynn B. The Psychological Development of Girls and Women Sheila Greene,2014-02-25 In this book Sheila Greene presents a challenging new perspective on the psychological development of girls and women which emphasises the central role of time in human development She critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those claiming to be focused on development have presented a view of women s lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Greene s approach places primary importance on temporality itself and on the competing discourses on time age and development which play an active role in the construction of the lives of girls and women Essential but often neglected insights from the

more compelling developmental and feminist theories are woven together within a theoretical framework that emphasises temporality emergence and human agency The result is a liberating theory of women s psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history The Psychological Development of Girls and Women will be essential reading for students and researchers in the psychology of women developmental psychology and women s studies       Stability and Change in Relationships Anita L.
