Setting National Priorities The 1982 Budget:

Setting National Priorities Henry J. Aaron, Robert D. Reischauer, 2011-07-01 If the subject of influence in Washington interests you this series of books deserves your respectful attention it has changed the ways in which American politicians think about the budget The Washington Post For the first time in more than four decades the federal budget has registered two consecutive surpluses and the need to reduce the deficit is not casting a pall over the policy debate This new highly accessible book examines the policy options that are available in this new environment to address the new and recurring challenges that face the nation The book which continues the Brookings Institution's highly acclaimed and influential Setting National Priorities series will serve as a guide for understanding many of the complex issues that will be discussed during the presidential and congressional campaigns of 2000 The book centers around three themes providing opportunity in the domestic arena restoring confidence in government and adapting to the post Cold War international environment It tackles such critical issues as Medicare and social security tax reform and foreign policy spending as well as many areas not included in previous editions namely education urban problems the environment trade government renewal and reform crime and drugs and families In addition to the editors the contributors are Gary Burtless I M Destler John J DiIulio Jr William Gale Bruce Katz Donald F Kettl Paul C Light Thomas E Mann Michael O Hanlon Paul R Portney Diane Ravitch Isabel V Sawhill and James Sly

The Federal Government and Urban Housing R. Allen Hays, 1985-01-01 The Federal Government and Urban Housing provides a comprehensive overview of federal housing and community development policy during the last fifty years with special emphasis on the crucial decade of the 1970s It relates housing policy developments to broad ideological and political changes that have taken place in the U S during this period R Allen Hays covers virtually every major program that has attempted to provide housing for disadvantaged persons including public housing Section 235 Section 8 and housing rehabilitation He compares the underlying approaches to housing embodied in these programs and examines the impact of urban renewal and Community Development Block Grants on urban housing The successes and failures of federal housing programs are considered within a detailed historical context The book concludes with a look at housing policy under the Ronald Reagan Administration and a discussion of the future of housing policy

Capital Formation and Industrial Policy, 1981 *Publishers' Trade List Annual*, 1991 Bowker Editorial Staff, 1991-09 Seapower in the Nuclear Age Joel J. Sokolsky, 2021-01-26 This book first published in 1991 provides a major analysis of the prelude to the US's Cold War maritime strategy showing how NATO's maritime forces were organised in the period It examines how the United States Navy and allied navies particularly the Royal Navy were incorporated into the Alliance's nuclear and conventional deterrent forces It looks at the structure of the main

naval commands the growth of Soviet maritime forces and the impact of the flexible response strategy on NATO's naval posture in the 1970s Drawing upon many declassified documents this account fills an important gap in postwar literature on American seapower and its relation to European security It also addresses important aspects of NATO strategy and organisation

The Half War Robert P Haffa Jr, 2019-07-11 This book offers a strategic organizational and logistical analysis in a historical context of the planning of conventional forces to meet a limited contingency The central question is Why from 1960 to 1982 did the U S fail to construct a coherent limited contingency force Analysis of a series of comparative case studies reveals that the strategic concept to the half war or limited contingency was never articulated adequately enough to support specific force planning Organizations designed to oversee and command limited contingency forces fragmented by interservice rivalries and the absence of joint doctrine lacked multiservice composition and a unified command structure A search for economy in limited contingency forces seemed justified by illusions about their capabilities Low budgetary priority and Congressional perceptions that enhanced U S rapid deployment capabilities would encourage U S global intervention contributed to the lack of logistical and mobility systems dedicated to them The wider intent of this study is to shed light on the general purpose force planning process and to suggest policy guidance as the United States once again embarks on a major conventional force planning initiative Rather than being trapped by the past new efforts to meet vital U S military interests below the nuclear threshold must identify half war planning contingencies structure unified commands capable of directing tailored conventional forces in specific theaters and provide adequate strategic mobility systems

The Wizards of Armageddon Fred Kaplan, 1991-08-01 This is the untold story of the small group of men who have devised the plans and shaped the policies on how to use the Bomb The book first published in 1983 explores the secret world of these strategists of the nuclear age and brings to light a chapter in American political and military history never before revealed

Brookings at Seventy-Five James Allen Smith, 2010-12-01 The historian James Allen Smith traces the evolution of Washington's oldest and prototypical think tank on the occasion of its seventy fifth anniversary in 1991 Dedicated to bringing expertise to bear on public policy issues Brookings has been a pioneer in bridging the disparate worlds of social science research and American policymaking But while its efforts have been made steady there have been frustrations and controversy over the years Inspired by the scientific management and government efficiency movements in the Progressive Era Brookings has evolved from an organization that consulted with government agencies on accounting and personnel practices into an institution with a wide ranging research and publishing program as well as active public policy education and media outreach efforts Smith vividly tells of the key individuals beginning with Robert Brookings who have shaped the institution He recounts its relationships with financial supporters and presidential administrations and he candidly discusses the problems surrounding efforts at funding Smith places the Brookings research program in an

intellectual context and within the changing policymaking environment of Washington He reveals how Brookings has withstood seventy five years of shifts in national politics external perceptions on the institution and internal leadership to emerge as one of the most prominent sources of policy expertise in the world The proliferation of private think tanks and the expansion of governmental research agencies in the past quarter century have changed the policy environment The Brookings Institution on its seventy fifth anniversary offers a singular vantage point from which to observe the ever changing relationship between expert knowledge and political decisionmaking in our democracy

Blacks and the Military Martin Binkin, Mark J. Eitelberg, 2011-02-01 For much of the nation's history the participation of blacks in the armed forces was approximately in line with their proportion in the total population This changed during the 1970s by 1980 one of every three Army GIs and one of every five marines were black The reaction has been mixed Many Americans look with approval on the growth of black participation in military service since it often affords young blacks educational social and financial opportunities that constitute a bridge to a better life not otherwise available to them But for other Americans the opportunities are outweighed by the disproportionate imposition of the burden of defense on a segment of the population that has not enjoyed a fair share of the benefits that society confers From this perspective the likelihood that blacks would suffer at least a third and perhaps a half of the combat fatalities in the initial stages of conflict is considered immoral unethical or otherwise contrary to the precepts of democratic institutions Some also worry that military forces with such a high fraction of blacks entail risks to U S national security A socially unrepresentative force it is argued may lack the cohesion considered vital to combat effectiveness Others fear that such a force would be unreliable if it were deployed in situations that would test the allegiance of its minority members And some have even expressed concern that a large proportion of blacks may raise questions about the status of U S fighting forces as judged by the American public the nation's allies and its adversaries The authors of this book examine evidence on both sides of the issue in an effort to bring objective scrutiny to bear on questions that for many years have been loaded with emotion and subjective reaction They also discuss the implications for the military's racial composition of demographic economic and technological trends and the possible effects of returning to some form of conscription

Science Indicators, 1985

The Economic Illusion Robert Kuttner, 1987-11-29 In *The Economic Illusion* Robert Kuttner sets out to refute the conventional view that a more egalitarian distribution of income and services is only achievable at the expense of a prosperous and growing capitalism By carefully examining issues where economic growth and social justice appear to be in conflict issues such as social security protectionism income taxation and welfare he convincingly argues that equality and economic prosperity are not mutually exclusive pursuits As a means to reconcile equality with efficiency i.e. prosperity Kuttner argues for economic policies that would deemphasize private markets for an increase in trade protection and for an adapted version of the technical approaches of such countries as Sweden Germany Austria and Japan Kuttner concludes his arguments with the suggestion that injustice is not necessarily an

economic issue and that practical social alternatives are possible Public Budgeting Irene S. Rubin, 2015-01-28 Some of the best writings on public budgeting and finance can be found in the journals that ASPA publishes or sponsors For this volume editor Irene Rubin has brought together the best of these articles emerging classics that address the most important theoretical and practical problems underlying public budgeting The anthology is organized topically rather than historically with an effort to delineate the issues needed to understand some of the more recent controversies in the field Rubin s introductory essay and section openers frame the key issues and provide historical context for each article The collection begins with descriptions of what public budgeting is where it comes from and what it is for It moves on to the relationship between budget processes and outcomes constraints on budgeting the legal context in which it operates and adaptations to those constraints such as contracting out The book concludes with a discussion of the ethics and norms that underlie budgeting in a democracy Throughout the anthology the emphasis is on areas of disagreement and debate so students can get involved and explore different viewpoints **Setting National Priorities** ,1981
