Look to the Mountain Legrand Cannon, 1968 Looking to the Future Derek Hodson, 2011-10-25 In advocating an action oriented and issues based curriculum this book takes the position that a major but shamefully neglected goal of science and technology education is to equip students with the knowledge skills attitudes and values to confront the complex and often ill defined socioscientific issues they encounter in daily life as citizens in an increasingly technology dominated world carefully critically confidently and responsibly In outlining proposals for addressing socioscientific issues through a curriculum organized in terms of four increasingly sophisticated levels of consideration the author adopts a highly critical and politicized stance towards the norms and values that underpin both scientific and technological development and contemporary scientific engineering and medical practice criticizes mainstream STS and STSE education for adopting a superficial politically naive and hence educationally ineffective approach to consideration of socioscientific issues takes the view that environmental problems are social problems occasioned by the values that underpin the ways in which we choose to live and urges teachers to encourage students to reach their own views through debate and argument about where they stand on major socioscientific issues including the moral ethical issues they often raise More controversially the author argues that if students are to become responsible and politically active citizens the curriculum needs to provide opportunities for them to experience and learn from sociopolitical action The relative merits of direct and indirect action are addressed notions of learning about action learning through action and learning from action are developed and a case is made for compiling a user friendly database reflecting on both successful and less successful action oriented curriculum initiatives Finally the book considers some of the important teacher education issues raised by this radically new approach to teaching and learning science and technology The book is intended primarily for teachers and student teachers of science technology and environmental education graduate students and researchers in education teacher educators curriculum developers and those responsible for educational policy The author is Emeritus Professor of Science Education at the Ontario Institute for

Studies in Education University of Toronto Adjunct Professor of Science Education at the University of Auckland and Visiting Professor of Science Education at the University of Hong Kong His research interests include considerations in the history philosophy and sociology of science and their implications for science and technology education STSE education and the politicization of both students and teachers science curriculum history multicultural and antiracist education and teacher education via action research

Out There Somewhere Simon J. Ortiz, 2022-08-30 He has been out there somewhere for a while now a poet at large in America Simon Ortiz one of our finest living poets has been a witness participant and observer of interactions between the Euro American cultural world and that of his Native American people for many years In this collection of haunting new work he confronts moments and instances of his personal past and finds redemption in the wellspring of his culture A writer known for deeply personal poetry Ortiz has produced perhaps his most personal work to date In a collage of journal entries free verse poems and renderings of poems in the Acoma language he draws on life experiences over the past ten years recalling time spent in academic conferences and writers colonies jails and detox centers to convey something of the personal and cultural history of dislocation As an American Indian artist living at times on the margins of mainstream culture Ortiz has much to tell about the trials of alcoholism poverty displacement But in the telling he affirms the strength of Native culture even under the most adverse conditions and confirms the sustaining power of Native beliefs and connections With our hands we know the sacred earth With our spirits we know the sacred sky Like many of his fellow Native Americans Ortiz has been out there somewhere Portland and San Francisco Freiburg Germany and Martinique away from his original homeland culture and community Yet as these works show he continues to be absolutely connected socially and culturally to Native identity We insist that we as human cultural beings must always have this connection he writes because it is the way we maintain a Native sense of existence Drawing on this storehouse of places times and events *Out There Somewhere* is a rich fusion taking readers into the heart and soul of one of today's most exciting and original American poets

So We Look to the Sky Misumi Kubo, 2021-08-03 This shocking boisterous novel was a runaway bestseller and award winner in Japan Pressingly real In these pages you will find the lives of all of us Japan Times Searingly honest and sexually explicit *So We Look to the Sky* is a novel told in five linked stories that begin with an affair between a student and a woman ten years his senior who picks him up for cosplay sex in a comics market Their scandalous liaison which the woman's husband makes public by posting secretly taped video online frames all of the stories but each explores a different aspect of the life passages and hardships ordinary people face A teenager experimenting with sex and then perhaps experiencing love and loss a young anime obsessed wife bullied by her mother in law to produce the child she and her husband cannot conceive a high school girl spurned by the student realizing that being cute and fertile is all others expect of her the student's best friend who lives in the projects and is left alone to support and care for his voracious senile grandmother and the student's mother a divorced single parent and midwife who guides women bringing new life into this world and must rescue her son

crushed by the twin blows of public humiliation and loss from giving up on his own Narrating each story in the distinctive voice of its protagonist Misumi Kubo weaves themes including sex love the female body gossip and the bullying that leaves young people feeling burdened and helpless into a profoundly original novel that lingers in the mind for its affirmation of the raw unquellable force of life **Look to the Mountain** Le Grand Cannon,1944 Spiritualism John Worth Edmonds,1898
