Beyond the Science of Reading Natalie Wexler, 2025-01-30 In this provocative and timely book education writer Natalie Wexler argues that the best way to end the reading wars is to recognize that learning to read is inextricably linked to learning in general The science of reading movement has done much to improve instruction in foundational skills But that hard won progress may be reversed unless we also help children acquire the knowledge and vocabulary they need to understand complex text At the same time the science of learning movement has introduced many educators to evidence based teaching principles that can be effective for all students In *Beyond the Science of Reading* Wexler addresses a missing piece of the conversation the ways in which typical reading comprehension and writing instruction conflict with those principles Wexler also offers practical solutions for bringing science informed literacy instruction to scale and reveals why Teaching phonics isn't enough to create proficient readers Building knowledge is the key to unlocking reading comprehension Writing instruction holds untapped potential to boost literacy and learning Instruction grounded in cognitive science can narrow achievement gaps Current curriculum evaluation methods may be steering schools wrong *Beyond the Science of Reading* charts a bold path forward with a new way to equip all children to read with fluency understanding and joy This is an essential resource for educators policymakers parents and anyone who cares about the future of literacy and equity in the United States

The Garden, 1895 [The Early Reader in Children's Literature and Culture](#)

Jennifer Miskec, Annette Wannamaker, 2015-12-22 This is the first volume to consider the popular literary category of Early Readers books written and designed for children who are just beginning to read independently It argues that Early Readers deserve more scholarly attention and careful thought because they are for many younger readers their first opportunity to engage with a work of literature on their own to feel a sense of mastery over a text and to experience pleasure from the act

of reading independently Using interdisciplinary approaches that draw upon and synthesize research being done in education child psychology sociology cultural studies and children s literature the volume visits Early Readers from a variety of angles as teaching tools as cultural artifacts that shape cultural and individual subjectivity as mass produced products sold to a niche market of parents educators and young children and as aesthetic objects works of literature and art with specific conventions Examining the reasons such books are so popular with young readers as well as the reasons that some adults challenge and censor them the volume considers the ways Early Readers contribute to the construction of younger children as readers thinkers consumers and as gendered raced classed subjects It also addresses children s texts that have been translated and sold around the globe examining them as part of an increasingly transnational children s media culture that may add to or supplant regional ethnic and national children s literatures and cultures While this collection focuses mostly on books written in English and often aimed at children living in the US it is important to acknowledge that these Early Readers are a major US cultural export influencing the reading habits and development of children across the globe **Forum** ,1989
