Louis Kahn Essential Writings:

Louis Kahn Louis I. Kahn, 2003 This unique anthology draws from Louis Kahn speeches essays and interviews some never previously published to capture the evolution and central tenets of the influential American architect thinking from his early work of the 1940s to his death in 1974 Professor Twombly introduction and headnotes offer incisive commentary on the texts *The Essential Louis Kahn*, 2021-04-20 This photographic tour of every one of the buildings designed solely by Louis Kahn represents the architect's greatest accomplishments This book focuses on over twenty buildings that were designed solely by Louis Kahn From his native city of Philadelphia to the heart of Bangladesh Kahn's architecture reflected his fascination with science mathematics history and nature Striking new interior and exterior photographs by esteemed architectural photographer Cemal Emden reveal the characteristic features of Kahn's aesthetic juxtaposed materials repetition of line and shape and geometric precision Also evident is the way Kahn's designs flourish in a variety of settings religious governmental educational and residential The book gives close attention to Kahn's most iconic buildings including Erdman Hall at Bryn Mawr College in Pennsylvania the Indian Institute of Management in Ahmedabad the Sher-e-Bangla Nagar in Dhaka Bangladesh and the Yale Center for British Art in New Haven Connecticut as well as a cluster of residences he designed in the Philadelphia area Chapter openers written by architecture professor Caroline Maniaque an introduction by academic Jale Erzen and an extensive chronology by academic Zekiye Abali as well as a selection of Kahn's most insightful statements complete this book which allows for a rich understanding of Kahn's architectural ingenuity Tradition as Mediation: Louis I. Kahn Dana Margalith, 2018-07-11 This book explores Louis I Kahn's approach to tradition as revealed in two of his important unbuilt projects Focusing on Kahn's designs for the Dominican Motherhouse of St Catherine de Ricci Media Pennsylvania 1965 1969 and the Hurva Synagogue Jerusalem Israel 1967 1974 the book challenges prevailing aesthetic and methodological assessments of Kahn's use of tradition It reveals how an authentic and critical theoretical historical and humanistic study of tradition nourished Kahn's designs enabling him to mediate historical rituals ideas and beliefs and to develop innovative designs rooted deep in human culture while addressing real modern concerns The book evaluates Kahn's works as a creative recreation and re interpretation of the past shedding light on the potential value of the meaningful consideration of tradition in modern times **The Architecture of Ruins** Jonathan Hill, 2019-03-25 The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already

blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

Louis Kahn Carter Wiseman, 2020-11-10 The man who envisioned and realized such landmark buildings as the Salk Institute the Kimbell Art Museum and the National Assembly complex in Bangladesh Louis Kahn was born in what is now Estonia immigrated to America and became one of the towering figures in his adopted country s built world His works are unmistakable in their elegance monolithic power and architectural honesty Written by Carter Wiseman one of Kahn s most respected commentators this book offers a succinct accessible examination of the life and work of one of America s greatest architects It traces the influence of his immigrant origins his upbringing in poverty his education the impact of the Great Depression and the arrival of Modernism on his life and work Finally it provides insight into why as the legacy of many of his contemporaries has receded in importance Kahn s has remained so durably influential Louis Kahn A Life in Architecture provides the best concise introduction available to this singular life and achievement

At the Center Casey Nelson Blake, Daniel H. Borus, Howard Brick, 2019-12-03 At a time when American political and cultural leaders asserted that the nation stood at the center of world awareness thinkers and artists sought to understand and secure principles that lay at the center of things From the onset of the Cold War in 1948 through 1963 they asked What defined the essential character of American culture Could permanent moral standards guide human conduct amid the flux and horrors of history In what ways did a stable self emerge through the life cycle Could scientific method rescue truth from error illusion and myth Are there key elements to democracy to the integrity of a society to order in the world Answers to such questions promised intellectual and moral stability in an age haunted by the memory of world war and the possibility of future devastation on an even greater scale Yet other key figures rejected the search for a center asserting

that freedom lay in the dispersion of cultural energies and the plurality of American experiences In probing the centering impulse of the era *At the Center* offers a unique perspective on the United States at the pinnacle of its power *The Grove Encyclopedia of American Art* Joan M. Marter,2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries *Louis I Khan Beyond Time and Style* Carter Wiseman,2007-02-27 The first in depth biographical study of the brilliant but elusive architect who fundamentally redefined twentieth century architecture Now ranked with Frank Lloyd Wright Le Corbusier and Mies van der Rohe Louis I Kahn brought a reverence for history back into modern architecture while translating it into a uniquely contemporary idiom Drawing on more than one hundred interviews with colleagues coworkers clients and family members and illustrated with many previously unpublished photographs this book documents the uniquely American rise of a poor immigrant to the pinnacle of the international architectural world It illuminates the richly diverse personal relationships Kahn had with such clients as Jonas Salk and Paul Mellon and the romantic entanglements that mystified even those closest to him While celebrating the genius of Kahn s art the book provides an invaluable portrait of the man who created it **Elements of Architecture** Mikkel Bille,Tim Flohr Sorensen,2016-02-26 *Elements of Architecture* explores new ways of engaging architecture in archaeology It conceives of architecture both as the physical evidence of past societies and as existing beyond the physical environment considering how people in the past have not just dwelled in buildings but have existed within them The book engages with the meeting point between these two perspectives For although archaeologists must deal with the presence and absence of physicality as a discipline which studies humans through things to understand humans they must also address the performances as well as temporal and affective impacts of these material remains The contributions in this volume investigate the way time performance and movement both physically and emotionally are central aspects of understanding architectural assemblages It is a book about the constellations of people places and things that emerge and dissolve as affective mobile performative and temporal engagements This volume juxtaposes archaeological research with perspectives from anthropology architecture cultural geography and philosophy in order to explore the kaleidoscopic intersections of elements coming together in architecture Documenting the ephemeral relational and emotional meeting points with a category of material objects that have defined much research into what it means to be human *Elements of Architecture* elucidates and expands upon a crucial body of evidence which allows us to explore the lives and interactions of past societies **Utopias and Architecture** Nathaniel Coleman,2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck

this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture *Light as Experience and Imagination from Medieval to Modern Times* David S.

Herrstrom,2022-11-21 In *Light as Experience and Imagination from Medieval to Modern Times* David S Herrstrom

synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times The true subject of the book is making sense of the individual s relationship with light rather than the investigation of light s essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times

Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions as reflected in art architecture and literature Instead of its evolution this book celebrates the complexity of our relation to light s character No individual experience of light being truer than any other *The Collaborators: Interactions in the Architectural Design Process* Gilbert Herbert,Mark Donchin,2016-03-23

Illustrated by critical analyses of significant buildings including examples by such eminent architects as Adler and Sullivan Erich Mendelsohn and Louis Kahn this book examines collaboration in the architectural design process over a period ranging from the mid 19th century to the late 1960s The examples chosen located in England the United States Israel and South Africa are of international scope They have intrinsic interest as works of architecture and illustrate all facets of collaboration involving architects engineers and clients Prior to dealing with the case studies the theoretical framework is set in three introductory essays which discuss in general terms the organizational implications of partnerships associations and teams the nature of interactions between architect and engineer and cooperation and confrontation in the relationship between architect and client From this original standpoint the interactive role of the designers it examines and reinterprets such well known buildings as the Chicago Auditorium and the Kimbell Art Museum The re evaluation of St Pancras Station and its hotel questions common presumptions about the separation of professional roles played by its engineer and architect The account of the troubled history of Mendelsohn s project for the first Haifa Power House highlights the difficulties that arise when a determined and eminent architect confronts a powerful and demanding client In a later era the examination of the John Moffat Building which is less well known but deserving of wider recognition reveals how the fruitful collaboration of multiple architects can result in a successful unified design These case studies comprise a wide range of programmes challenges personalities and interactions Ultimately in five different ways in five different epochs and in five different circumstantial and cultural contexts this book shows how the dialogue between the players in the design process resonates upo

Constructing a Place of Critical Architecture in China Guanghui Ding,2016-03-09 For the past 30 years The Chinese journal *Time Architecture* Shidai Jianzhu has focused on publishing innovative and exploratory work by emerging architects based in private design firms who were committed to new material theoretical and pedagogical practices In doing so this

book argues that the journal has engaged in the presentation and production of a particular form of critical architecture described as an intermediate criticality as a response to the particular constraints of the Chinese cultural and political context. The journal's publications displayed a dual critique: a resistant attitude to the dominant modes of commercial building practice characterised by rapid and large scale urban expansion and an alternative publishing practice focusing on emerging independent architectural practitioners through the active integration of theoretical debates, architectural projects and criticisms. This dual critique is illustrated through a careful review and analysis of the history and programme of the journal. By showing how the work of emerging architects including Yung Ho Chang, Wang Shu, Liu Jiakun and Urbanus are situated within the context of the journal's special thematic editions on experimental architecture, exhibition, group design, new urban space and professional system, the book assesses the contribution the journal has made to the emergence of a critical architecture in China in the context of how it was articulated, debated, presented and perhaps even produced within the pages of the publication itself. The protagonists of critical architecture have endeavoured to construct an alternative mode of form and space with strong aesthetic and socio-political implications to the predominant production of architecture under the current Chinese socialist market economy. To rebel against certain forms of domination and suppression by capital and power is by no means to completely reject them; rather it is to use them.

Creativity and Rationale John M. Carroll, 2012-07-26

Creativity and rationale comprise an essential tension in design. They are two sides of the coin: contrary, complementary but perhaps also interdependent. Designs always serve purposes. They always have an internal logic. They can be queried, explained and evaluated. These characteristics are what design rationale is about. But at the same time, designs always provoke experiences and insights. They open up possibilities, raise questions and engage human sense-making. Design is always about creativity. Creativity and Rationale: Enhancing Human Experience by Design comprises 19 complementary chapters by leading experts in the areas of human computer interaction, design, sociotechnical systems, design requirements, engineering, information systems and artificial intelligence. Researchers, research students and practitioners in human computer interaction and software design will find this state-of-the-art volume invaluable.

Nationalism and Architecture Raymond Quek, Darren Deane, Sarah Butler, 2012. Bringing together case studies from Europe, North and South America, the Middle East, Africa, Asia and Australia, this book provides an exploration of the relationship between architecture and nationalism. It includes essays grouped together in three thematic sections: Revisiting Nationalism, Interpreting Nationalism and Questioning Nationalism.

The Urbanism of Metabolism Raffaele Pernice,2022-03-16 This edited book explores and promotes reflection on how the lessons of Metabolism experience can inform current debate on city making and future practice in architectural design and urban planning More than sixty years after the Metabolist manifesto was published the author s original contributions highlight the persistent links between present and past that can help to re imagine new urban futures as well as the design of innovative intra urban relationships and spaces The essays are written by experienced scholars and renowned academics from Japan Australia Europe South Korea and the United States and expose Metabolism s special merits in promoting new urban models and evaluate the current legacy of its architectural projects and urban design lessons They offer a critical intellectual and up to date account of the Metabolism projects and ideas with regard to the current evolution of architectural and urbanism discourse in a global context The collection of cross disciplinary contributions in this volume will be of great interest to architects architectural and urban historians as well as academics scholars and students in built environment disciplines and Japanese cultural studies

Outline schmidt hammer lassen,2012-11-05 Among the most notable achievements of Scandinavian architecture are a responsible approach to the environment and a keen appreciation for social concerns The Danish architects Schmidt Hammer Lassen founded in 1986 with offices in Copenhagen Aarhus Oslo and London reflect these standards in their remarkable buildings They attach great importance to the practicality of the structures they design and to their integration into the real context of their surroundings and their users This monograph presents a selection of their twenty best structures and projects of recent years from Denmark Greenland Sweden Norway Iceland England the Czech Republic and Saudi Arabia All the designs are depicted and analyzed according to the following themes economic ecological and social sustainability the value the building adds to its surroundings the building s identity forming power and permeability between the public and private spheres

Ian McHarg and the Search for Ideal Order Kathleen John-Alder,2019-09-17 Ian McHarg and the Search for Ideal Order looks at the well known and studied landscape architect Ian McHarg in a new light The author explores McHarg s formative years and investigates how his ideas developed in both their complexity and scale As a precursor to McHarg s approach in his influential book Design with Nature this book offers new interpretations into his search for environmental order and outlines how his struggle to understand humanity s relationship to the environment in an era of rapid social and technological change reflects an ongoing challenge that landscape design has yet to fully resolve This book will be of great interest to academics and researchers in landscape architectural history

Architecture, Culture,

and Spirituality Thomas Barrie, Julio Bermudez, Phillip James Tabb, 2016-03-09 Architecture has long been understood as a cultural discipline able to articulate the human condition and lift the human spirit yet the spirituality of architecture is rarely directly addressed in academic scholarship The seventeen chapters provide a diverse range of perspectives grouped according to topical themes Being in the World Sacred Secular and the Contemporary Condition Symbolic Engagements Sacred Landscapes and Spirituality and the Designed Environment Even though the authors approach the subject from a range of disciplines and theoretical positions all share interests in the need to rediscover redefine or reclaim the sacred in everyday experience scholarly analysis and design
