Banking on Death Robin Blackburn, 2020-05-05 Banking on Death offers a panoramic view of the history and future of pension provision A work of unique scope it traces the origins and development of the pension idea from the days of the French Revolution to the troubles of the modern welfare state As we live longer employers are closing their pension schemes and many claim that public treasuries will not be able to cope with the retirement of the baby boomers Banking on Death analyses the challenge facing public schemes and the malfunctioning of private retirement provision concluding with a bold proposal for how to pay for decent pensions for all Robin Blackburn argues that pension funds have been depleted by wasteful promotion and used as gambling chips by ruthless and overpaid top executives This is the world of grey capitalism where employees savings are sequestered from

them and pressed into the service of corporate aggrandisement Even the best companies find it hard to run a business and a pension fund at the same time especially when the latter is larger than the former The fund managers notorious short termism and herd instinct and their failure to curb the greed and irresponsibility of the corporate elite lead to obscene inequalities and a blighted social landscape The pension privatisation lobby Blackburn shows has lost major battles in France and Germany the United States and Italy because of the popular fears it evokes And the case for privatisation looks intellectually threadbare after withering critiques from such notable theorists as Joseph Stiglitz and Pierre Bourdieu Banking on Death shows that pensions are political dynamite and have undone governments from France and Italy to Argentina Popular outcries led Reagan Clinton and Blair to change tack will this happen to George W Bush too Blackburn argues that the ageing society will generate increased costs but so long as the new life course is properly financed all age groups will gain He proposes a public regime of asset based welfare drawing on the ideas of John Maynard Keynes and Rudolf Meidner that could ensure secondary pensions for all and foster a more responsible egalitarian and humane pattern of economic development

This Could Be the Start of Something Big Manuel Pastor Jr.,Chris Benner,Martha Matsuoka,2015-10-27 For nearly two decades progressives have been dismayed by the steady rise of the right in U S politics Often lost in the gloom and doom about American politics is a striking and sometimes underanalyzed phenomenon the resurgence of progressive politics and movements at a local level Across the country urban coalitions including labor faith groups and community based organizations have come together to support living wage laws and fight for transit policies that can move the needle on issues of working poverty Just as striking as the rise of this progressive resurgence has been its reception among unlikely allies In places as diverse as Chicago Atlanta and San Jose the usual business resistance to pro equity policies has changed particularly when it comes to issues like affordable housing and more efficient transportation systems To see this change and its possibilities requires that we recognize a new thread running through many local efforts a perspective and politics that emphasizes regional equity Manuel Pastor Jr Chris Benner and Martha Matsuoka offer their analysis with an eye toward evaluating what has and has not worked in various campaigns to achieve regional equity The authors show how momentum is building as new policies addressing regional infrastructure housing and workforce development bring together business and community groups who share a common desire to see their city and region succeed Drawing on a wealth of case studies as well as their own experience in the field Pastor Benner and Matsuoka point out the promise and pitfalls of this new approach concluding that what they term social movement regionalism might offer an important contribution to the revitalization of progressive politics in America

Institutional Change and Globalization John L. Campbell, 2020-07-21. This book is about institutional change: how to recognize it when it occurs and the mechanisms that cause it to happen. It is the first book to identify problems with the new institutional analysis, which has emerged as one of the dominant approaches to the study of organizations, economic and political sociology, comparative political economy, politics, and international relations. The book confronts several important problems in institutional analysis and offers conceptual, methodological, and theoretical tools for resolving them. It argues that the paradigms of institutional analysis—rational choice, organizational, and historical institutionalism—share a set of common analytic problems. Chief among them: failure to define clearly what institutional change is; failure to specify the mechanisms responsible for institutional change; and failure to explain adequately how ideas other than self-interests affect institutional change. To demonstrate the utility of his tools for resolving the problems of institutional analysis, Campbell applies them to the phenomenon of globalization. In doing so, he not only corrects serious misunderstandings about globalization but also develops a new theory of institutional change. This book advances the new

institutional analysis by showing how the different paradigms can benefit from constructive dialogue and cross fertilization

Doing Without Jane Henrici, 2022-10-18 The welfare reform legislation enacted in 1996 was applauded by many for the successes it had in dramatically reducing the number of people receiving public assistance most of whom were women with children Today however more than a decade later these successes seem far less spectacular Although the total number of welfare recipients has dropped by more than fifty percent nationwide evidence shows that poverty has actually deepened Many hardworking women are no better off for having returned to the workplace In *Doing Without* Jane Henrici brings together nine contributions to tell the story of welfare reform from inside the lives of the women who live with it Cases from Chicago and Boston are combined with a focus on San Antonio from one of the largest multi city investigations on welfare reform ever undertaken The contributors argue that the employment opportunities available to poorer women particularly single mothers and ethnic minorities are insufficient to lift their families out of poverty Typically marked by variable hours inadequate wages and short term assignments both employment and training programs fail to provide stability or the kinds of benefits such as health insurance sick days and childcare options that are necessary to sustain both work and family life The chapters also examine the challenges that the women who seek assistance and those who work in public and private agencies to provide it together must face as they navigate ever changing requirements and regulations decipher alterations in Medicaid and apply for training and education Contributors urge that the nation should repair the social safety net for women in transition and

Levy,2006-10-01 This book assesses the changing nature of state

intervention in the economies of the affluent democracies Against a widespread understanding that contemporary developments such as globalization and new technologies are pressing for a rollback of state regulation in the economy the book shows that these same forces are also creating new demands and opportunities for state intervention Thus state activism has shifted rather than simply eroded State authorities have shifted from a market steering orientation to a market supporting one Chief among the new state missions are repairing the main varieties of capitalism liberal corporatist and statist making labor markets and systems of social protection more employment friendly recasting regulatory frameworks to permit countries to cross major economic and technological divides and expanding market competition at home and abroad Because the changes from market steering to market support are so controversial and far reaching state officials often find themselves making choices that produce clear winners and losers Such choices require a capacity to act unilaterally and decisively even in the face of substantial societal opposition As a result state activism autonomy and occasionally imposition remain essential for meeting the challenges of today's globalizing economy Redefining Higher Education Melvyn L.

Fein,2022-02-26 Higher education is in trouble Commentators of all stripes bemoan escalating costs and diminishing quality Solutions have been offered from all quarters but tend to be piecemeal and all too often ideological In this tough minded look at the history current climate and future of university education in the United States Melvyn L Fein re examines the mission of higher education and outlines what institutions can do to better prepare students for an ever more complex techno commercial society Fein argues that students must have the opportunity to explore and discover what works for them and that the most important tool for institutions of higher education is self direction Professors must be allowed to teach in their own ways bringing their own experience into the classroom Since university missions differ both universities and professors need the freedom to make decisions independently The imminent need is for a democratic elite consisting of self directed leaders who possess technical and social expertise as well as personal motivation The tools for change are appropriate curricula communities of learners and a genuine marketplace of ideas While there is no magic bullet Fein contends that we

can and should build on the achievements of the past so as to evolve more responsive educational institutions those that promote merit responsibility and universalism
