Missing The Revolution Darwinism For Social Scientists:

Missing the Revolution Jerome H. Barkow, 2005-12-01 In *The Adapted Mind* Jerome Barkow along with Leda Cosmides and John Tooby set out to redefine evolutionary psychology for the social sciences and to create a new agenda for the next generation of social scientists While biologically oriented psychologists quickly accepted the work social scientists in psychology and researchers in anthropology and sociology who deal with the same questions of human behavior were more resistant *Missing the Revolution* is an invitation to researchers from these disciplines who in Barkow's view have been missing the great evolution revolution of our time to engage with Darwinian thought which is now so large a part of the non sociological study of human nature and society Barkow asks the reader to put aside the preconceptions and stereotypes social scientists often have of the biological and to take into account a powerful paradigm that is far away from those past generations who would invoke a vocabulary of genes and Darwin as justification for genocide The evolutionary perspective Barkow maintains provides no particular support for the status quo no rationalizations for racism or any other form of social inequality Cultural cannot possibly be opposed to biological because culture and society are the only means we have of expressing our evolved psychology social cultural constructionism is not only compatible with an evolutionary approach but demanded by it To marshal evidence for his argument Barkow has gathered together eminent scholars from a variety of disciplines to present applications of evolutionary psychology in a manner intended to illustrate their relevance to current concerns for social scientists The contributors include among others evolutionary psychologist Anne Campbell a Darwinian feminist who reaches out to feminist social constructionists sociologist Ulica Segarstr le who analyzes the opposition of the cultural left to Darwinism sociologist Bernd Baldus who criticizes evolutionists for ignoring agency criminologist Anthony Walsh who presents a biosocial criminology and primatologists Lars Rodseth and Shannon A Novak who reveal an unexpected uniqueness to human social organization *Missing the Revolution* is a challenge to scholars to think critically about a powerful social and intellectual movement which insists that the theoretical perspective that has been so successful when applied to the behavior of other animal species can be applied to our own

Past Minds Luther H Martin, Jesper Sørensen, 2016-06-16 How do historians understand the minds motivations intentions of historical agents What might evolutionary and cognitive theorizing contribute to this work What is the relation between natural and cultural history Historians have been intrigued by such questions ever since publication in 1859 of Darwin's *The Origin of Species* itself the historicization of biology This interest reemerged in the latter part of the twentieth century among a number of biologists philosophers and historians reinforced by the new interdisciplinary finding of cognitive scientists about the universal capacities of and constraints upon human minds The studies in this volume primarily by historians of religion continue this discussion by focusing on historical examples of ancient religions as well as on the theoretical promises and problems relevant to that study

Criminology in zwei Bänden ist zweifelsohne das aktuellste Referenzwerk der theoretischen Kriminologie. Fachlich geprägte Beiträge internationaler Experten machen den Leser mit wegweisenden Theorien, Konzepten und Schlüsselfiguren vertraut. Das Nachschlagewerk präsentiert klassische und zeitgenössische Themen zu den wichtigen Straftatbeständen. Zusammenhängen fachspezifische Soziologie, Biologie und Psychologie und fachübergreifende Erklärungen zu Kriminalität, Kriminalitätsrate und Fragestellungen aus der Rechtssoziologie.

Criminological Theory Anthony Walsh, 2014-09-19
Criminologists can benefit from questioning the underlying assumptions upon which they rest their work. Philosophy has the ability to clarify our thoughts, inform us of why we think about things the way we do, solve contradictions in our thinking we never knew existed, and even dissolve some dichotomies we thought were cast in stone. One of those dichotomies is free will vs. determinism. Criminology must reckon with both free will and agency as posited by some theories and determinism as posited by others, including the ever more influential fields of genetics and biosocial criminology.

Criminological Theory: Assessing Philosophical Assumptions examines philosophical concepts such as these in the context of important criminological theories or issues that are foundational but not generally considered in the literature on this topic. The uniqueness of this treatment of criminological theory is that rather than reporting what this person or that has said about a particular theory, Walsh exposes the philosophical assumptions underlying the theory. Students and scholars learn to clarify their own biases and better analyze the implications of a broad range of theories of crime and justice.

The Cambridge Handbook of Evolutionary Perspectives on Human Behavior Lance Workman, Will Reader, Jerome H. Barkow, 2020-03-19
The transformative wave of Darwinian insight continues to expand throughout the human sciences. While still centered on evolution-focused fields such as evolutionary psychology, ethology, and human behavioral ecology, this insight has also influenced cognitive science, neuroscience, feminist discourse, sociocultural anthropology, media studies, and clinical psychology. This handbook's goal is to amplify the wave by bringing together world-leading experts to provide a comprehensive and up-to-date overview of evolution-oriented and influenced fields. While evolutionary psychology remains at the core of the collection, it also covers the history, current standing, debates, and future directions of the panoply of fields entering the Darwinian fold. As such, *The Cambridge Handbook of Evolutionary Perspectives on Human Behavior* is a valuable reference not just for evolutionary psychologists but also for scholars and students from many fields who wish to see how the evolutionary perspective is relevant to their own work.

Theories of Human Development Michael G. Green, John A. Piel, 2015-07-14
The authors have grouped the theories into three classical families which differ in their views relative to the prime motives underlying human nature. They show how theories are specific examples of more general points of view called paradigms. The theories chosen to represent the three paradigms—the Endogenous Paradigm, Exogenous Paradigm, and the Constructivist Paradigm—were selected because they met four criteria: importance as judged by academic and research psychologists; fertility as judged by the amount of research the theory has generated; scope as judged by the variety of phenomena the various theories explain; family resemblance as judged

by how well each theory represents its paradigm The authors present the paradigm case in the lead chapter for each paradigm This paradigm case is the best example for the paradigm The authors explain why paradigm cases are important and give them more detailed treatment than other theories in the same paradigm

Beyond Nature and Nurture Javier Pérez-Jara, Íñigo Ongay, 2025-05-28 This book gathers several of the world's leading scholars in the nature vs nurture debate offering a timely reconsideration of the dynamic interactions between physical chemical biological social and cultural factors that shape human multidimensionality Emphasizing this multidimensionality this edited volume seeks to bridge the divide between biology and social theory two research communities that have too often overlooked each other These disciplines despite being central to understanding human nature have long operated in isolation While some animal species exhibit higher degrees of phenotypic plasticity in specific traits humans stand out as the most plastic species in both their neurological and sociocultural systems This plasticity leads the contributors of this book to move beyond both biological reductionism and the blank slate hypothesis While biology undoubtedly plays a role in shaping and stabilizing human social and cultural processes it does so only within the framework of an inherently social environment one shaped by historically contingent and socially constructed realities such as values codes and cultural perceptions More importantly cultural structures and social interactions actively shape and transform certain biological features that were once considered immutable This book lays the groundwork for a productive dialogue among biologists psychologists social theorists and philosophers It also highlights some of the moral and political consequences of different perspectives within the nature vs nurture debate Through updated scientific and philosophical theorizing the chapters in this book aim to overcome once and for all the simplistic yet persistent opposition between nature and nurture offering a far more complex and dynamic yet richer and epistemologically manageable picture of the human being

From a Scientific Point of View Mario Bunge,2018-07-27 This book deals with the scientific viewpoint which is illustrated here through a number of topical cases in modern science from gravitational waves to mental disorders to social policies The scientific perspective involves rationality realism and reism the thesis that the universe is composed of concrete things like atoms force fields people and social organizations The book shows that the scientific worldview underlies all current scientific and technological research projects It also claims that any subject involving knowledge can be approached scientifically and contends that the scientific viewpoint can trump both dogma and improvisation the standbys of amateurs and demagogues

Mind, Morality and Magic Istvan Czachesz,Risto Uro,2014-10-14 The cognitive science of religion that has emerged over the last twenty years is a multidisciplinary field that often challenges established theories in anthropology and comparative religion This new approach raises many questions for biblical studies as well What are the cross cultural cognitive mechanisms which explain the transmission of biblical texts How did the local and particular cultural traditions of ancient Israel and early Christianity develop What does the embodied and socially embedded nature of the human mind imply for the exegesis of biblical texts Mind Morality and Magic draws on a range of approaches to the study of the human mind including memory studies computer modeling cognitive theories of ritual social cognition evolutionary psychology biology of emotions and research on religious experience The volume explores how cognitive approaches to religion can shed light on classical concerns in biblical scholarship such as the transmission of traditions ritual and magic and ethics as well as uncover new questions and offer new methodologies

Evolution's Empress Maryanne L. Fisher,Justin R. Garcia,Rosemarie Sokol Chang,2013-01-30 Over the last decade there has been increasing debate as to whether feminism and evolutionary psychology can co exist Such debates often conclude with a resounding no often on the grounds that the former is a political movement while the latter is a field of scientific inquiry In the midst of these debates there has been growing dissatisfaction within the field of evolutionary psychology about the way the discipline and others have repeatedly shown women to be in passive roles when it comes to survival and reproduction Evolutionary behavioral research has made significant strides in the past few decades but continues to take for granted many theoretical assumption

that are perhaps in light of the most recent evidence misguided. As a result, the research community has missed important areas of research and in some cases will likely come to inaccurate conclusions based on existing dogma rather than rigorous, theoretically driven research. Bias in the field of evolutionary psychology echoes the complaints against the political movement attached to academic feminisms. This is an intellectual squabble where much is at stake, including a fundamental understanding of the evolutionary significance of women's roles in culture, mothering, reproductive health and physiology, mating, female alliances, female aggression, and female intrasexual competition. Evolution's Empress identifies women as active agents within the evolutionary process. The chapters in this volume focus on topics as diverse as female social interactions, mate competition and mating strategies, motherhood, women's health, sex differences in communication and motivation, sex discrimination, and women in literature. The volume editors bring together a diverse range of perspectives to demonstrate ways in which evolutionary approaches to human behavior have thus far been too limited. By reconsidering the role of women in evolution, this volume furthers the goal of generating dialogue between the realms of women's studies and evolutionary psychology.

Human Expeditions Stephen Chrisomalis, André Costopoulos, 2013-12-06. In its 2007 obituary of Bruce Trigger (1937-2006), the *Times of London* referred to the Canadian anthropologist and archaeologist as Canada's leading prehistorian and one of the most influential archaeologists of his time. Trained at Yale University and a faculty member at McGill University for more than forty years, he was best known for his *History of Archaeological Thought*, which the *Times* called monumental. Trigger inspired scholars all over the world through his questioning of assumptions and his engagement with social and political causes. *Human Expeditions* pays tribute to Trigger's immense legacy by bringing together cutting edge work from internationally recognized and emerging researchers inspired by his example. Covering the length and breadth of Trigger's wide-ranging interests, from Egyptology to the history of archaeological theory to North American aboriginal cultures, this volume highlights the diversity of his academic work and the magnitude of his impact in many different areas of scholarship.

Evolutionary Criminology Russil Durrant, Tony Ward, 2015-03-12. In our attempts to understand crime, researchers typically focus on proximate factors such as the psychology of offenders, their developmental history, and the social structure in which they are embedded. While these factors are important, they don't tell the whole story. *Evolutionary Criminology: Towards a Comprehensive Explanation of Crime* explores how evolutionary biology adds to our understanding of why crime is committed by whom and our response to norm violations. This understanding is important both for a better understanding of what precipitates crime and to guide approaches for effectively managing criminal behavior. This book is divided into three parts. Part I reviews evolutionary biology concepts important for understanding human behavior, including crime. Part II focuses on theoretical approaches to explaining crime, including the evolution of cooperation and the evolutionary history and function of violent crime, drug use, property offending, and white collar crime. The developmental origins of criminal behavior are described to account for the increase in offending during adolescence and

early adulthood as well as to explain why some offenders are more likely to desist than others Proximal causes of crime are examined as well as cultural and structural processes influencing crime Part III considers human motivation to punish norm violators and what this means for the development of a criminal justice system This section also considers how an evolutionary approach contributes to our understanding of crime prevention and reduction The section closes with an evolutionary approach to understanding offender rehabilitation and reintegration Reviews how evolutionary findings improve our understanding of crime and punishment Examines motivations to offend and to punish norm violators Articulates evolutionary explanations for adolescent crime increase Identifies how this knowledge can aid in crime prevention and reduction and in offender rehabilitation Rethinking Evolutionary Psychology A. Goldfinch, 2015-02-24 Rethinking Evolutionary Psychology identifies champions and vindicates a streamlined evolutionary psychology It offers a new way of thinking that moves decisively away from theoretical and critical excess Where standard accounts often obscure and distort this book emphasizes and develops evolutionary psychology's heuristic credentials *The Oxford Handbook of Evolution and the Emotions* Laith Al-Shawaf, Todd K. Shackelford, 2024 In this Handbook Laith Al Shawaf and Todd K Shackelford have gathered a group of leading scholars in the field to present a centralized resource for researchers and students wishing to understand emotions from an evolutionary perspective Experts from a number of different disciplines including psychology biology anthropology psychiatry and others tackle a variety of how proximate and why ultimate questions about the function of emotions in humans and nonhuman animals how emotions work and their place in human life Comprehensive and integrative in nature this Handbook is an essential resource for students and scholars from a diversity of fields wishing to build upon their theoretical and empirical understanding of the emotions *Introduction to Criminology* Anthony Walsh, Craig Hemmens, 2010-12-09 This new edition of the authors popular text reader provides instructors and students with the best of both worlds authored text with carefully selected accompanying readings Thoroughly updated throughout this Second Edition provides an interdisciplinary perspective on crime and criminality that incorporates the latest theories concepts and research from sociology psychology genetics evolutionary biology and the neurosciences Book Jacket
