How do we know what works in primary schools? How do we make sure that we are always learning from fellow teachers, always learning from the children we teach and always moving forward? The answer lies in research. In understanding, conducting, disseminating and learning from research. But what do we mean by research and how do we do it? This book is your guide to research in primary education. It takes you through both important established theory and recent developments in research and explores what these mean right now for primary education and classroom settings. It helps you to conceive, conduct, write up and share your research with others. It looks at how you can access research findings to improve your classroom practice and deepen your understanding. It examines how you can use research in your classroom everyday to continually enhance teaching and how you can shape and frame the questions you ask to help you get to the answers you need. If you are a trainee teacher doing a research project as part of your course or a qualified teacher doing further study, this text includes all the guidance you need. If you are a teacher wanting to find out what works best for your class in your school right now, this text will show you how to harness the power of small or large scale research to help you find the answer.      *Selection of Recent Books Published in Great Britain 1940-Apr. 1941, 1975*      *Education Policy and*

*Social Reproduction* John Fitz,Brian Davies,John Evans,2005-11-16 This book takes a theoretically informed look at British education policy over the last sixty years when secondary schooling for all children became an established fact for the first time Comprehensive schools largely replaced a system based on academic selection Now under choice and competition policies all schools are subject to the rigours of local education markets What impact did each of these successive policy frameworks have on structures of opportunities for families and their children How and to what extent was the experience of secondary school students shaped and what influenced the qualifications they obtained and their life chances after schooling The authors locate their work within two broad strands in the sociology of education Basil Bernstein s work on the realisation of power and control in and through pedagogic discourse and social reproduction provides a theoretical framework for exploring the character of and continuities and change in education and training policies The book is an important contribution to debates about the extent to which education is a force for change in class divided societies The authors also set out to re establish social class at the centre of educational analysis at a time when emphasis has been on identity and identity formation arguing for their interdependence This book will be an important resource for students policy analysts and policymakers wishing to think through and understand the longer term impact of programmes that have shaped secondary schooling in Britain and elsewhere
