Mixed Language Debate:

The Mixed Language Debate Yaron Matras, Peter Bakker, 2003 Mixed Languages are speech varieties that arise in bilingual settings often as markers of ethnic separateness They combine structures inherited from different parent languages often resulting in odd and unique splits that present a challenge to theories of contact induced change as well as genetic classification This collection of articles is devoted to the theoretical and empirical controversies that surround the study of Mixed Languages Issues include definitions and prototypes similarities and differences to other contact languages such as pidgins and creoles the role of codeswitching in the emergence of Mixed Languages the role of deliberate and conscious mixing the question of the existence of a Mixed Language continuum and the position of Mixed Languages in general models of language change and contact induced change in particular An introductory chapter surveys the current study of Mixed Languages Contributors include leading historical linguists contact linguists and typologists among them Carol Myers Scotton Sarah Grey Thomason William Croft Thomas Stolz Maarten Mous Ad Backus Evgeniy Golovko Peter Bakker Yaron Matras

New Perspectives on Mixed Languages Maria Mazzoli, Eeva Sippola, 2021-06-08 A growing number of language varieties with diverse backgrounds and structural typologies have been identified as mixed However the debate on the status of many varieties and even on the existence of the category of mixed languages continues still today This volume examines the current state of the theoretical and empirical debate on mixed languages and presents new advances from a diverse set of mixed language varieties These cover well known mixed languages such as Media Lengua Michif Gurindji Kriol and Kallawaya and varieties whose classification is still debated such as Reo Rapa Kumzari Jopar and Wutun The contributions deal with different aspects of mixed languages including descriptive approaches to their current status and origins theoretical discussions on the language contact processes in them and analysis of different types of language mixing practices This book contributes to the current debate on the existence of the mixed language category shedding more light onto this fascinating group of languages and the contact processes that shape them

Yiddish as a Mixed Language Ewa Geller, Michał Gajek, Agata Reibach, 2022-11-14 Yiddish the language of Eastern European Jews has so far been mostly described as Germanic within the framework of the traditional divergence based Language Tree Model Meanwhile advances in contact linguistics allow for a new approach placing the idiom within the mixed language spectrum with the Slavic component playing a significant role So far the Slavic elements were studied as isolated adstratal borrowings This book argues that they represent a coherent system within the grammar This suggests that the Slavic languages had at least as much of a constitutive role in the inception and development of Yiddish as German and Hebrew The volume is copiously illustrated with examples from the vernacular language With a contribution of Anna Pilarski University of Szczecin

New Perspectives on Mixed Languages Maria Mazzoli, Eeva Sippola, 2021-06-08 A growing number of language varieties with diverse backgrounds and structural typologies have been identified as mixed However the debate on the status of many

varieties and even on the existence of the category of mixed languages continues still today This volume examines the current state of the theoretical and empirical debate on mixed languages and presents new advances from a diverse set of mixed language varieties These cover well known mixed languages such as Media Lengua Michif Gurindji Kriol and Kallawaya and varieties whose classification is still debated such as Reo Rapa Kumzari Jopar and Wutun The contributions deal with different aspects of mixed languages including descriptive approaches to their current status and origins theoretical discussions on the language contact processes in them and analysis of different types of language mixing practices This book contributes to the current debate on the existence of the mixed language category shedding more light onto this fascinating group of languages and the contact processes that shape them

Dimmendaal, 2011-06-08 This advanced historical linguistics course book deals with the historical and comparative study of African languages The first part functions as an elementary introduction to the comparative method involving the establishment of lexical and grammatical cognates the reconstruction of their historical development techniques for the subclassification of related languages and the use of language internal evidence more specifically the application of internal reconstruction Part II addresses language contact phenomena and the status of language in a wider cultural historical and ecological context Part III deals with the relationship between comparative linguistics and other disciplines In this rich

Contact Languages Peter Bakker, Yaron Matras, 2013-06-26 This volume deals with several types of contact languages pidgins creoles mixed languages and multi ethnolects It also approaches contact languages from two perspectives an historical linguistic perspective more specifically from a viewpoint of genealogical linguistics language descent and linguistic family tree models and a sociolinguistic perspective identifying specific social contexts in which contact languages emerge

Multidisciplinary Approaches to Code Switching Ludmila Isurin, Donald Winford, Kees de Bot, 2009-07-10 The volume presents a selection of contributions by leading scholars in the field of code switching In the past the phenomenon of code switching was studied within different subfields of linguistics and they all took their own perspectives on code switching without taking into account findings from other subdisciplines This book raises a question of a much broader multidisciplinary approach to studying the phenomenon of code switching calls for integration of disciplines and illustrates how frameworks from one subfield can be applied to models in another The volume includes survey chapters empirical studies contributions that use empirical data to test new hypotheses about code switching or suggest new approaches and models for the study of code switching and chapters that discuss principles and constraints of code switching and code switching vs transfer The book is easily accessible to anyone who is interested in the phenomenon of code switching in bilinguals

Language Contact Yaron Matras, 2020-09-10 Language contact occurs when speakers of different languages interact and their languages influence one another Drawing on the author's own first hand observations of child and adult bilingualism this book combines his original research with an up to date introduction to key concepts to provide a holistic original theory of contact linguistics Going beyond a descriptive outline of contact phenomena it introduces a theory of contact induced language change linking structural change to motivations in discourse and language processing Since the first edition was published the field has rapidly grown and this fully revised edition covers all of the most recent developments making it an invaluable resource for researchers and advanced students in linguistics

The Routledge Handbook of Language Contact Evangelia Adamou, Yaron Matras, 2020-07-26 The Routledge Handbook of Language Contact provides an overview of the state of the art of current research in contact linguistics Presenting contact linguistics as an established field of investigation in its own right and featuring 26 chapters this handbook brings together a broad range of approaches to contact linguistics including experimental and observational approaches and formal theories a focus on social and cognitive factors that impact the outcome of language contact situations and bilingual language processing the emergence of new languages and speech varieties in contact situations and contact linguistic phenomena in urban speech and linguistic landscapes With contributions from an international range of leading and emerging scholars in their fields the four sections of this text deal with methodological and theoretical approaches the factors that condition and shape language

contact the impact of language contact on individuals and language change repertoires and formation This handbook is an essential reference for anyone with an interest in language contact in particular regions of the world including Anatolia Eastern Polynesia the Balkans Asia Melanesia North America and West Africa *Emerging Bilingual Speech* Anna Verschik,2011-10-20 Anna Verschik offers a new perspective on how a previously monolingual community of Russian speakers in Estonia is rapidly becoming bilingual after the end of the Soviet occupation in 1991 The contact induced change in Russian under the growing impact of Estonian is analysed in the theoretical framework of code copying Changes in linguistic behaviour of the speakers are often a result of intentional cultivation of non monolingual communication strategies and language policies and go hand in hand with the development of a new identity Estonian Russians *Emerging Bilingual Speech* is a fascinating study that will be of interest to researchers studying language contact language change and bilingualism

Congruence in Contact-Induced Language Change Juliane Besters-Dilger,Cynthia Dermarkar,Stefan Pfänder,Achim Rabus,2014-08-22 Modern contact linguistics has primarily focused on contact between languages that are genetically unrelated and structurally distant This compendium of articles looks instead at the effects of pre existing structural congruency between the affected languages at the time of their initial contact using the Romance and Slavic languages as examples In contact of this kind both genetic and typological similarities play a part **Language Contact.**

Volume 2 Jeroen Darquennes,Joseph C. Salmons,Wim Vandebussche,2025-04-21 Targeting a full range of students and scholars this volume provides a total of 50 chapters illustrating the linguistic dynamics and the dynamics of inter individual and societal language contact as well as the dynamics of multidisciplinary language contact studies Fueled by a wealth of data from a rich variety of contact situations its geographically balanced case studies are governed by the triangulation between a focus on language structure and change a sincere drive of sociopolitical and academic agency and the confrontation with an everyday reality that can be unkind to and ignorant of those two factors The volume clearly demonstrates the social relevance of our trade in a time burdened with ecolinguistic challenges *Sociolinguistic and Typological Perspectives on Language Variation* Silvia Ballarè,Guglielmo Inglese,2023-10-04 Linguistic variation loosely defined as the wholesale processes whereby patterns of language structures exhibit divergent distributions within and across languages has traditionally been the object of research of at least two branches of linguistics variationist sociolinguistics and linguistic typology In spite of their similar research agendas the two approaches have only rarely converged in the description and interpretation of variation While a number of studies attempting to address at least aspects of this relationship have appeared in recent years a principled discussion on how the two disciplines may interact has not yet been carried out in a programmatic way This volume aims to fill this gap and offers a cross disciplinary venue for discussing the bridging between sociolinguistic and typological research from various angles with the ultimate goal of laying out the methodological and conceptual foundations of an integrated research agenda for the study of linguistic variation

Code-switching Between Structural and Sociolinguistic Perspectives Gerald Stell, Kofi Yakpo, 2015-02-17 The study of code switching has been carried out from linguistic psycholinguistic and sociolinguistic perspectives largely in isolation from each other This volume attempts to unite these three research strands by placing at the centre of the enquiry the role played by social factors in the occurrence forms and outcomes of code switching The contributions in this volume are divided into three parts code switching between cognition and socio pragmatics multilingual interaction and identity and code switching and social structure The case studies represent contact settings on five continents and feature languages with diverse linguistic affiliations They are predictive and descriptive in their research goals and rely on experimental or naturalistic data But they share the common goal of seeking to explain how social structures ideologies and identity impact on the grammatical and conversational features of code switching and language mixing and on the emergence of mixed languages Given its scope this volume is a significant addition to the empirical and theoretical foundations of the study of code switching It is also of relevance to the general debate on the inter relationships between language and society

Irish Traveller Language Maria Rieder, 2018-10-03 This book explores the Irish Traveller community through an ethnographic and folk linguistic lens It sheds new light on Irish Traveller language commonly referred to as Gammon or Cant an integral part of the community's cultural heritage that has long been viewed as a form of secret code The author addresses Travellers metalinguistic and ideological reflections on their language use providing deep insights into the culture and values of community members and into their perceived social reality in wider society In doing so she demonstrates that its interrelationship with other cultural elements means that the language is in a constant flux and by analysing speakers experiences of language in action provides a dynamic view of language use The book takes the reader on a journey through oral history language naming practices ideologies of languageness and structure descriptions of language use and contexts negotiations of the authentic Cant and Cant as identity Based on a two year

ethnographic fieldwork project in a Traveller Training Centre in the West of Ireland this book will appeal to students and scholars of sociolinguistics language in society language ideology folk linguistics minority communities and languages and cultural and linguistic anthropology **The Oxford Handbook of Language Contact** Anthony P. Grant, 2020-01-10 Every language has been influenced in some way by other languages In many cases this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from Russian Japanese and Arabic respectively In other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre existing language For example English s structure has been shaped in such a way by the effects of Norse French Latin and Celtic though English is not alone in its openness to these influences Any features can potentially be transferred from one language to another if the sociolinguistic and structural circumstances allow for it Further new languages pidgins creoles and mixed languages can come into being as the result of language contact In thirty three chapters The Oxford Handbook of Language Contact examines the various forms of contact induced linguistic change and the levels of language which have provided instances of these influences In addition it provides accounts of how language contact has affected some twenty languages spoken and signed from all parts of the world Chapters are written by experts and native speakers from years of research and fieldwork Ultimately this Handbook provides an authoritative account of the possibilities and products of contact induced linguistic change *Creoles, Their Substrates, and Language Typology* Claire Lefebvre, 2011-01-01 Since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general Several contradictory proposals have been put forward in the literature For example creole languages typologically pair with their superstrate languages Chaudenson 2003 with their substrate languages Lefebvre 1998 or even creole languages are alike Bickerton 1984 such that they constitute a definable typological class McWhorter 1998 This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages As the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically The bulk of the data show that creoles reproduce the typological features of their substrate languages This argues that creoles cannot be claimed to constitute a definable typological class
