Radium in the Treatment of Diseases of the Skin George Miller MacKee, 1921 *Illustrated Handbook of Succulent Plants: Crassulaceae* Urs Eggli, 2012-12-06 The present volume covering the Crassulaceae marks the completion of the successful handbook series that presents a complete coverage of the so called other succulents i.e. of all taxa of succulent plants with the exception of the Cactaceae. It is with pride that this volume is now put before the public. Together with its predecessors it is the fruit of a truly international project. Not only does the present volume constitute the first complete synopsis of the large and horticulturally important family Crassulaceae published since the treatment by Berger 1930 but the handbook series as a whole is a landmark in succulent plant literature. The history of the project that eventually led to the publication of the present handbook series was outlined in the Preface to the Monocotyledons Volume published in the summer of 2001. A short summary of its history will therefore suffice. Handbooks devoted to succulent plants including cacti have a long standing tradition. First treatments covering the family Cactaceae were already published in the 19th century but the first handbook dealing with the so called other succulents authored by Hermann Jacobsen was only published in 1954. 1955 then called *Handbuch der sukkulenten Pflanzen*. A revised and enlarged English edition was published in 1959 and was repeatedly reprinted subsequently.
