Migration and Environmental Change in the West African Sahel Victoria van der Land, 2017-10-12 The West African Sahel is predicted to be heavily affected by climate change in the future Slow onset environmental changes such as increasing rainfall variability and rising temperature are presumed to worsen the livelihood conditions and to increase the out migration from the affected regions Based on qualitative and quantitative data from study areas in Mali and Senegal this book examines the relationship between population dynamics livelihoods and environment in the Sahel region focussing specifically on motives for migration Critiquing the assumption that environmental stress is the dominating migration driver the author demonstrates the important role of individual aspirations and social processes such as educational opportunities and the pull of urban lifestyles In doing so the book provides a more nuanced picture of the environment migration nexus arguing that slow onset environmental changes may actually be less important as drivers of migration in the Sahel than they are often depicted in the media and climate change literature This is a valuable resource for academics and students of environmental sociology migration and development studies

**Transformation in Africa** Deborah Fahy Bryceson, Eleanor Fisher, Jesper Bosse Jønsson, Rosemarie Mwaipopo, 2013-10-15 After more than three decades of economic malaise many African countries are experiencing an upsurge in their economic fortunes linked to the booming international market for minerals Spurred by the shrinking viability of peasant agriculture rural dwellers have been engaged in a massive search for alternative livelihoods one of the most lucrative being artisanal mining While an expanding literature has documented the economic expansion of artisanal mining this book is the first to

probe its societal impact demonstrating that artisanal mining has the potential to be far more democratic and emancipating than preceding modes Delineating the paradoxes of artisanal miners working alongside the expansion of large scale mining investment in Africa Mining and Social Transformation in Africa concentrates on the Tanzanian experience Written by authors with fresh research insights focus is placed on how artisanal mining is configured in relation to local regional and national mining investments and social class differentiation The work lives and associated lifestyles of miners and residents of mining settlements are brought to the fore asking where this historical interlude is taking them and their communities in the future The question of value transfers out of the artisanal mining sector value capture by elites and changing configurations of gender age and class differentiation all arise *Beyond the Rural-urban Divide* Clemens Greiner,2009

Sent Forth Kwiyani, Harvey C,2014-10-10 **Migration in Africa** Michiel de Haas,Ewout Frankema,2022-03-30 This book introduces readers to the age of intra African migration a period from the mid 19th century onward in which the center of gravity of African migration moved decisively inward Most books tend to zoom in on Africa s external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the last two centuries The book demonstrates that only by taking a broad historical and continent wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time During the 19th century Africa s external slave trades gradually declined whilst Africa s expanding commodity export sectors drew in domestic labor This led to an era of heightened mobility within the region marked by rapidly rising and vanishing migratory flows increasingly diversified landscapes of migration systems and profound long term shifts in the wider patterns of migration This era of inward focused mobility reduced with a resurgence of outmigration after 1960 when Africans became more deliberate in search of extra continental destinations with new diaspora communities emerging specifically in the Global North Broad ranging in its temporal spatial and thematic coverage this book provides students and researchers with the perfect introduction to age of intra African migration **Displacement Economies in Africa** Amanda Hammar,2014-05-08 Large
