Conference, 2002-10-24 Publisher Description **Topics in Signed Language Interpreting** Terry Janzen, 2005-01-01 LC number 2005050067 New Perspectives in Role and Reference Grammar Wataru Nakamura, 2011-09-22 New Perspectives in Role and Reference Grammar presents a broad picture of current developments in Role and Reference Grammar RRG a version of parallel structure grammar with an emphasis on typological adequacy Since its inception RRG has been applied to a wide range of languages in particular to case marking complex clauses e g control raising and serial verb constructions unaccusativity unergativity and the interplay between syntax and information structure The present book is a continued investigation of the intermodular correspondence in a variety of languages and comprises 13 papers which not only contribute to the further development of the theory but also investigate controversial areas of linguistic theory including inflectional and derivational morphology verbal semantics and argument structure anticausative and serial verb constructions the argument adjunct distinction an extended typology of complex clauses the syntax information structure interface and interactions between the lexicon and constructions In addition three papers illustrate how RRG may be applied to sign languages language acquisition and machine translation from Arabic to English **Sign Language** Roland Pfau, Markus Steinbach, Bencie Woll, 2012-08-31 Sign language linguists show here that all questions relevant to the linguistic investigation of spoken languages can be asked about sign languages Conversely questions that sign language linguists consider even if spoken language researchers have not asked them yet should also be asked of spoken languages The HSK handbook Sign Language aims to provide a concise and comprehensive overview of the state of the art in sign language linguistics It includes 44 chapters written by leading researchers in the field that address issues in language typology sign language grammar psycholinguistics neurolinguistics sociolinguistics and language documentation and transcription Crucially all topics are presented in a way that makes them accessible to linguists who are not familiar with sign language linguistics Current Directions in Turkish Sign Language Research Engin Arik, 2014-07-18 This book aims to contribute to our knowledge of Turkish Sign Language T D and sign language linguistics in general T D is a relatively old signed language and is at present believed to be historically unrelated to other signed languages Linguistic studies on this language started in the early 2000s There has been growing academic interest and an increasing body of work on T D within the past decade enhancing the need for this this book which brings together chapters covering a variety of topics such as the history of deaf education and T D issues regarding language documentation a phonological study of fingerspelling reciprocals interrogatives reported utterances expressions of spatial relations including their acquisitions and expressions of multiple entities This book was supported in part by the T B TAK Research Fund Project No 111K314 This edited volume serves as a useful resource for newcomers to the field gives new momentum to future research on T D and offers unique perspectives in investigating sign languages in general Finally the

intention is that the conversations within this volume will open up new discussions not only within sign linguistics but also in other related fields such as cognitive science

**The Routledge Handbook of Sign Language Translation and Interpreting** Christopher Stone, Robert Adam, Ronice Müller de Quadros, Christian Rathmann, 2022-07-18 This Handbook provides the first comprehensive overview of sign language translation and interpretation from around the globe and looks ahead to future directions of research Divided into eight parts the book covers foundational skills the working context of both the sign language translator and interpreter their education the sociological context work settings diverse service users and a regional review of developments The chapters are authored by a range of contributors both deaf and hearing from the Global North and South diverse in ethnicity language background and academic discipline Topics include the history of the profession the provision of translation and interpreting in different domains and to different populations the politics of provision and the state of play of sign language translation and interpreting professions across the globe Edited and authored by established and new voices in the field this is the essential guide for advanced students and researchers of translation and interpretation studies and sign language

**Simultaneity in Signed Languages** Myriam Vermeerbergen, Lorraine Leeson, Onno Alex Crasborn, 2007-01-01 Signed language users can draw on a range of articulators when expressing linguistic messages including the hands torso eye gaze and mouth Sometimes these articulators work in tandem to produce one lexical item while in other instances they operate to convey different types of information simultaneously Over the past fifteen years there has been a growing interest in the issue of simultaneity in signed languages However this book is the first to offer a comprehensive treatment of this topic presenting a collection of papers dealing with different aspects of simultaneity in a range of related and unrelated signed languages in descriptive and cross linguistic treatments which are set in different theoretical frameworks This volume has relevance for those interested in sign linguistics in teaching and learning signed languages and is also highly recommended to anyone interested in the fundamental underpinnings of human language and the effects of signed versus spoken modality

**Signed Language and Gesture Research in Cognitive Linguistics** Terry Janzen, Barbara Shaffer, 2023-07-24 This volume represents the first time that researchers on signed language and gesture have come together with a coherent focus under the framework of cognitive linguistics The pioneering work of Sherman Wilcox is highlighted throughout scaffolding much of the research of these contributors The five sections of the volume reflect critical areas of Dr Wilcox's own research in cognitive linguistics Guiding research principles in signed language gesture and cognitive linguistics iconicity across signed and spoken linguistics multimodality blending depiction and metaphor in signed languages and specific grammatical constructions as form meaning pairings The authors of this volume exemplify and continue Dr Wilcox's work of bridging signed and spoken language disciplines by contributing chapters that represent a multiplicity of perspectives on signed spoken and gesture data This volume presents a unified collection of cognitive linguistics research by leading authors that will be of interest to readers in the fields of signed and spoken

language linguistics gesture studies and general linguistics      **The Use of Signing Space in a Shared Sign Language of Australia** Anastasia Bauer, 2014-09-11 In this book an Australian Aboriginal sign language used by Indigenous people in the North East Arnhem Land Northern Territory is described on the level of spatial grammar Topics discussed range from properties of individual signs to structure of interrogative and negative sentences The main interest is the manifestation of signing space the articulatory space surrounding the signers for grammatical purposes in Yolngu Sign Language      *The Oxford Handbook of Psycholinguistics* M. Gareth Gaskell, Gerry Altmann, 2007 The Oxford Handbook of Psycholinguistics brings together the views of 75 leading researchers in psycholinguistics to provide a comprehensive and authoritative review of the current state of the art in psycholinguistics With almost 50 chapters written by experts in the field the range and depth of coverage is unequalled      *Modal and Focus Particles in Sign Languages* Annika Herrmann, 2013-12-12 Bringing together the research fields of sign language linguistics and information structure this book focuses on the realization of modal particles and focus particles in three European sign languages German Sign Language Sign Language of the Netherlands and Irish Sign Language As a cross linguistic investigation based on a systematic methodological approach the study analyzes the results particularly with regard to nonmanual features expressed by articulators such as the body head and face The analyses of the data provide interesting insights into the syntax prosody interface in sign languages and the interaction of syntax and prosody in general Modal and focus particles have not been thoroughly investigated in sign languages This volume presents the first study on this phenomenon and is thus an innovative contribution to the field From a methodological and theoretical perspective it draws on up to date linguistic tools and provides professionally elicited and annotated data The book accounts for the results within existing theoretical models Given its specific focus on nonmanuals the book contributes to recent debates on information structure and the syntax prosody interface and will be of special interest to both sign and spoken language linguists      *Sign Language Research Sixty Years Later: Current and Future Perspectives* Valentina Cuccio, Erin Wilkinson, Brigitte Garcia, Adam Schembri, Erin Moriarty, Sabina Fontana, 2022-11-14      *The Oxford Handbook of Language Production* Matthew Goldrick, Victor Ferreira, Michele Miozzo, 2014-04-11 The Oxford Handbook of Language Production provides a comprehensive multidisciplinary review of the complex mechanisms involved in language production It describes what we know of the computational linguistic cognitive and brain bases of human language production from how we conceive the messages we aim to convey to how we retrieve the right and sometimes wrong words how we form grammatical sentences and how we assemble and articulate individual sounds letters and gestures Contributions from leading psycholinguists linguists and neuroscientists offer readers a broad perspective on the latest research highlighting key investigations into core aspects of human language processing The Handbook is organized into three sections speaking written and sign languages and how language production interfaces with the wider cognitive system including control processes memory non linguistic gestures and the perceptual system These chapters discuss a wide array of levels of

representation from sentences to individual words speech sounds and articulatory gestures extending to discourse and the broader social context of speaking Detailed supporting chapters provide an overview of key issues in linguistic structure at each level of representation Authoritative yet concisely written the volume will be of interest to scholars and students working in cognitive psychology psycholinguistics cognitive neuroscience computer science audiology and education and related fields
