*The Asian Economic Catharsis* Frank-Jürgen Richter, 2000-09-30 One result of the Asian economic crisis has been to shatter the belief that Asian ways of management are superior to Western ways Now just to survive Asian firms have come to rethink their entire way of managing and in his latest book Richter assisted by his contributing authors gives a sharply focused analysis of how they are doing it Emerging questions are how do Asian firms adjust to the new economic realities and How do they develop their management style There are plenty of new opportunities in Asia to play the new game but they must be grasped and productively channeled Richter and his contributors conclude that in the end the Asian economic crisis or catharsis may well be a blessing in disguise It provides an opportunity to completely review the way things stand in Asia Like entrepreneurs who built the Asian economies today's firms have the opportunity to lead a revival if they can redirect their businesses This is an important resource for professionals in all

multinational organizations and for academics and their upper level students of international business

**Growth Without Miracles** Ross Garnaut, Yiping Huang, 2001 China's economic reform constitutes one of the most remarkable events of the second half of the twentieth century. It not only significantly improved the living conditions of the Chinese population but also provides a useful model of economic transition from central planning to a market economy. The gradual approach to reform adopted by the Chinese was widely regarded as suboptimal and likely to fail when compared to the shock therapy method applied in the former Soviet Union and the Eastern European economies. But China has outperformed other transitional economies. To many observers the Chinese experience is either a myth or a miracle. This volume addresses key questions about the initial economic foundations, the reform of macroeconomic policies and macroeconomic stability, the achievements of agricultural reform and the agricultural policy choices facing the Chinese government, the unique characteristics of the township and village enterprises, the successful reform of the state-owned enterprises, the development of factor markets, the contributions of the external sectors to economic growth, the lessons of the Chinese experience for transitional economies and the challenges for economic theory. *Growth without Miracles* brings together thirty widely cited articles by prominent economists in the field of China studies to offer authoritative and thorough assessment and analyses of China's experience during the reform period. It provides a complete story for teachers and students of courses on the Chinese economy and will be of considerable interest to researchers, officials and business people who want to understand past experiences, current problems and the future direction of the Chinese economy.

**The East Asian Financial Crisis** Shiqing Xie, 2000 *Asia and Africa in the Global Economy* Ernest Aryeetey, 2003 This publication considers the different economic experiences of countries in Southeast Asia and sub-Saharan Africa in terms of policy, institutional and structural aspects, divergence in economic growth and performance levels and the extent of their integration into the global economy. Chapters discuss a variety of issues including the dynamics of globalisation, local entrepreneurship, exports, foreign direct investment, management of financial flows, foreign aid, debt and development.
