**Disequilibrium, Growth and Labor Market Dynamics** Carl Chiarella, Peter Flaschel, Gangolf Groh, Willi Semmler, 2013-06-29 In this book on disequilibrium growth and labor market dynamics we take predominantly a macroeconomic perspective We present a working model that can easily be varied in different directions in order to subsume innovations in the literature on macroeconomics old and new and to contribute to important currently discussed macroeconomic issues Our working model is set up in a way that there is a close relationship between our presented dynamic models and modern macro econometric models with disequilibrium both in the labor and the goods markets One of our objectives is therefore to narrow the gap between theoretical and applied structural macrodynamic model building We hope that the book will be a useful reference for all researchers academic teachers and practitioners of macroeconomic and macro econometric model building who are interested in economic dynamics independently of whether they use equilibrium or disequilibrium methods in their own research We base this hope on the fact that our approach contains a number of unique features The emphasis on the identification and analysis of the basic feedback mechanisms at work in modern macro economies A detailed study of the partial as well as integrated dynamic interaction between these feedback mechanisms that constitute the interdependence of markets and sectors of the modern macro economy The relationship between the macroeconomic framework of our working model and the Walrasian Non Walrasian and New Keynesian reformulations of macroeconomics

Modelling Economic Series Clive William John Granger, 1990 This is a volume of readings for graduate students especially those taking courses in applied econometrics who need to learn how to evaluate the validity of present theories and techniques The aim of the text is to aid readers in the difficult task of actually constructing models The essays vary in the degree of technical sophistication used but each paper intends to provide students with a sound knowledge of the practical difficulties of model specification evaluation and interpretation as well as advice on tackling these difficulties

Specification, Estimation, and Analysis of Macroeconometric Models Ray C. Fair, 1984 This book gives a practical applications oriented account of the latest techniques for estimating and analyzing large nonlinear macroeconomic models Ray Fair demonstrates the application of these techniques in a detailed presentation of several actual models including his United States model his multicountry model Sargent's classical macroeconomic model autoregressive and vector

autoregressive models and a small twelve equation linear structural model He devotes a good deal of attention to the difficult and often neglected problem of moving from theoretical to econometric models In addition he provides an extensive discussion of optimal control techniques and methods for estimating and analyzing rational expectations models A computer program that handles all the techniques in the book is available from the author making it possible to use the techniques with little additional programming The book presents the logic of this program A smaller program for personal microcomputers for analysis of Fair's United States model is available from Urban Systems Research Engineering Inc Anyone wanting to learn how to use large macroeconomic models including researchers graduate students economic forecasters and people in business and government both in the United States and abroad will find this an essential guidebook     The Elgar Companion to Feminist Economics Janice Peterson, Margaret Lewis, 2001-01-01 Comprehensive reference work introducing readers to the field of feminist economics It addresses key concepts as well as feminist economic critiques and reconstructions of major economic theories and policy debates
