Rodrik, 2012-11-21. The economics of growth has come a long way since it regained center stage for economists in the mid 1980s. Here for the first time is a series of country studies guided by that research. The thirteen essays by leading economists shed light on some of the most important growth puzzles of our time. How did China grow so rapidly despite the absence of full fledged private property rights? What happened in India after the early 1980s to more than double its growth rate? How did Botswana and Mauritius avoid the problems that other countries in sub-Saharan Africa succumbed to? How did Indonesia manage to grow over three decades despite weak institutions and distorted microeconomic policies and why did it suffer such a collapse after 1997? What emerges from this collective effort is a deeper understanding of the centrality of institutions. Economies that have performed well over the long term owe their success not to geography or trade but to institutions that have generated market oriented incentives, protected property rights and enabled stability. However, these narratives warn against a cookie cutter approach to institution building. The contributors are Daron Acemoglu, Maite Careaga, Gregory Clark, J Bradford DeLong, Georges de Menil, William Easterly, Ricardo Hausmann, Simon Johnson, Daniel Kaufmann, Massimo Mastruzzi, Ian W McLean, Lant Pritchett, Yingyi Qian, James A Robinson, Devesh Roy, Arvind Subramanian, Alan M Taylor, Jonathan Temple, Barry R Weingast, Susan Wolcott and Diego Zavaleta. **World Bank News**, 1986 **Development Beyond**

Neoliberalism? David Alan Craig, Doug Porter, 2006-09-27. This book is among the first to take the poverty reduction paradigm as its central focus. Offering a comprehensive introduction, overview and critique, it traces the emergence of the framework and illustrates its consequences with global case studies. **Stronger collaboration for an equitable and resilient recovery towards the health-related Sustainable Development Goals**, 2021-05-19. countries around the Indian Ocean on 26 December 2004 evoked international sympathy on a scale beyond any previous
natural disaster The international relief effort broke all records both in scale and diversity with seven billion U S dollars
donated from all over the world through public and private agencies for Sumatra alone Simply as a reconstruction effort
therefore the disbursement of those funds and the rebuilding of housing infrastructure and economy posed major national
and international challenges However this was not simply a reconstruction effort Aceh at that time was a war zone with
Indonesia s military engaged in a major operation to crush a separatist rebellion that had been simmering since 1976 Even
though the funds had been donated for tsunami relief any real reconstruction of Aceh had to consider the impact of the
conflict on the well being of the population as well as governance and administrative capacities This volumes serves the
purpose not only of discussing some of the lessons of the Aceh reconstruction and peace processes but also of maintaining
critical links between Aceh and the international community after the initial tranches of aid expire *The World Bank*
