Glaeser, 2007-11-01 Not for profit organizations play a critical role in the American economy In health care education culture and religion we trust not for profit firms to serve the interests of their donors customers employees and society at large We

know that such firms don't try to maximize profits but what do they maximize This book attempts to answer that question assembling leading experts on the economics of the not for profit sector to examine the problems of the health care industry art museums universities and even the medieval church Contributors look at a number of different aspects of not for profit operations from the problems of fundraising endowments and governance to specific issues like hospital advertising The picture that emerges is complex and surprising In some cases not for profit firms appear to work extremely well competition for workers customers and donors leads not for profit organizations to function as efficiently as any for profit firm In other contexts large endowments and weak governance allow elite workers to maximize their own interests rather than those of their donors customers or society at large Taken together these papers greatly advance our knowledge of the dynamics and operations of not for profit organizations revealing the under explored systems of pressures and challenges that shape their governance
