English Fiction of the Romantic Period, 1789-1830 Gary Kelly, 1989 English Fiction of the Romantic Period 1789 1830 is the first comprehensive historical survey of fiction from that period for many decades It combines a clear awareness of the period s social history with recent developments in literary criticism theory and history and explains the astounding variety of forms in Romantic fiction in terms of the various cultural political social regional and gender conflicts of the time It provides a broad ranging survey from the major authors and works through to the sub genres of the period Jan Austin and Sir Alter Scott are discussed alongside the Gothic Romance political and feminist fiction social satire and regional rural and historical novels It also provides a comparison of the methods of distribution and marketing and the availability of books then and now examines cheap popular fiction and children s fiction and considers the recent debate about the place of prose fiction in a Romantic literature hitherto dominated by poetry *The Cambridge bibliography of English literature. 3. 1800 - 1900* Frederick Wilse Bateson, 1940 English Poetry and Prose of the Romantic Movement George Benjamin Woods, 1920

Creeger, Joseph W. Reed, 1964 **A Guide to English Literature** F. W. Bateson, 2017-09-04 At first glance A Guide to English Literature may seem to be no more than a short bibliography of English literature with perhaps rather more extensive and certainly more outspoken comments on the principal editions commentaries biographies and critical works

than bibliographies usually provide But it is something more this guide contains long inter chapters that provide reinterpretations of the principal periods of English literature in the light of modern research as well as two final sections summarizing in unusual detail the literary criticism that exists in English and recent scholarship in the field The purpose of this book then is to provide the reader with convenient access to a disciplined study of the texts themselves This guide proposes itself as a new kind of literary history The conventional history of literature has often tended to become a substitute for the reading of the literature it describes the better the history the greater the temptation to substitute it The present combination of reading lists and inter chapters cannot be a substitute for anything else Meaningless as literature in themselves they nevertheless provide the necessary preliminary information to meaningful reading Since oddities of arrangement derive from these assumptions the authors are not arranged alphabetically Instead there are chronological compartments with the divisions circa 1500 1650 and 1800 in which authors succeed each other in the order of their births This pioneering handbook is primarily a bibliographical laborsaving device It is meant mostly for students and the general reader in that it stops where original research by the reader is expected to begin However the last chapter on literary scholarship is devoted specifically to the research specialist and provides indispensable equipment for the reader There is also a general section on literary criticism which will be of use to all
